

# Storing H1N1 Vaccine

Carefully organizing vaccines in a refrigerator helps protect vaccine and facilitates vaccine inventory management.

## Refrigerator-only Unit

✓ Place vaccine in breathable plastic mesh baskets and clearly label baskets by type of vaccine.

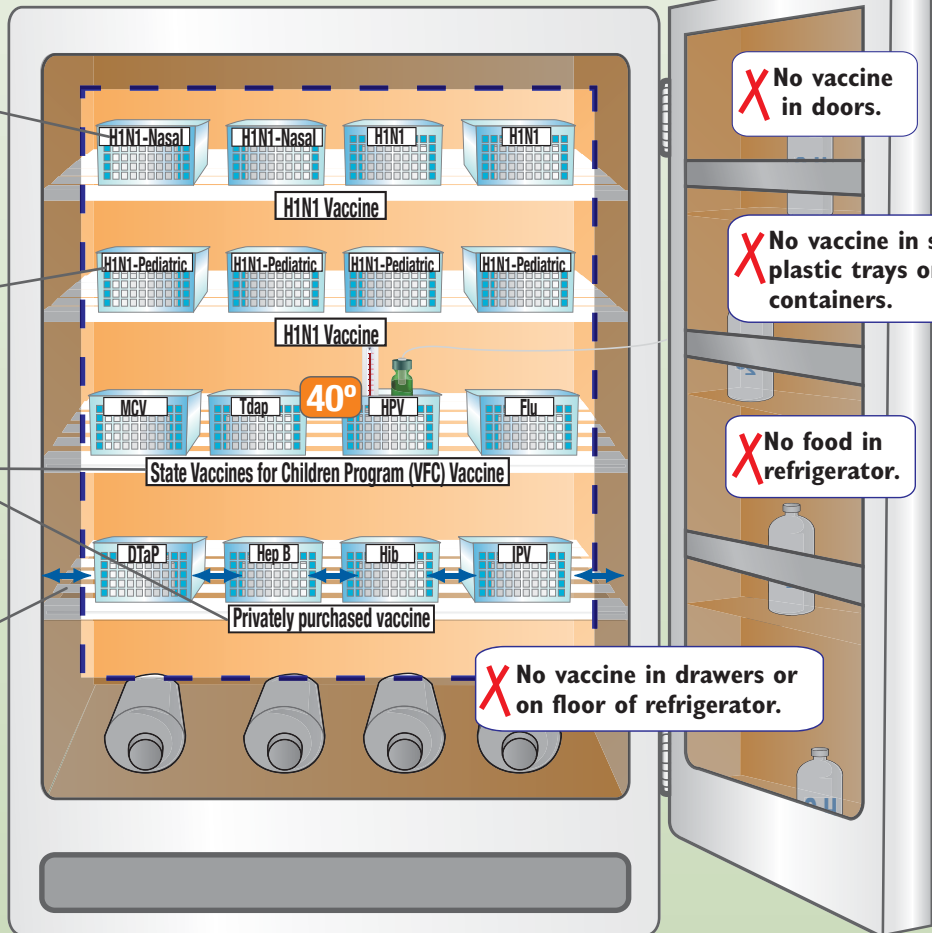

✓ Group vaccines by pediatric, adolescent, and adult types.

✓ Separate H1N1 vaccine from VFC and privately purchased vaccine.

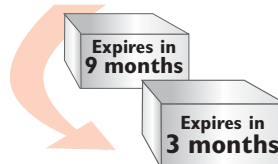

✓ Keep baskets 2-3 inches from walls and other baskets.

✓ Keep vaccines in their original boxes until you are ready to use them.

✓ Store only vaccine and other medication in vaccine storage units.

✓ Keep vaccines with shorter expiration dates to front of shelf.

If you have any problems with your refrigerator, keep the refrigerator door shut and notify the H1N1 Customer Call Center at 1-888-865-0564.
