California COVID-19 Vaccination Program Update

New Vaccine Management System (CalVax) coming early 2021!

The California Department of Public Health (CDPH) is excited to announce the rollout of CalVax, a state-wide centralized system for healthcare providers enrolled or interested in participating in the California COVID-19 Vaccination Program.

CalVax will replace the existing COVIDReadi system and will be available mid-January 2021. CalVax allows providers to enroll in the California COVID-19 Vaccination Program, order vaccines, update account information, and manage vaccine reporting tasks. **If you already enrolled in COVIDReadi or are further along in the process of enrolling (completed part A and at least one part of B) before January 8th, you do not need to re-enroll in CalVax.**

More information about CalVax will be coming soon.
