Dear EZIZ Users,

The 2013-14 influenza VISs have been posted on CDC’s website and are dated July 26, 2013.

There are separate VISs for the inactivated and the live, attenuated intranasal vaccines. The “inactivated” vaccine influenza VIS may be used for all non-live virus formulations (e.g., trivalent, quadrivalent, cell-culture, recombinant, intradermal, high-dose). Provider Guidelines for influenza vaccine VISs will be available soon.

- **Live, Intranasal Influenza VIS**
- **Inactivated Influenza VIS**

These VISs are available online, as PDFs, as RTFs (for electronic systems), and on mobile devices. (For mobile versions, see [http://m.cdc.gov/VIS](http://m.cdc.gov/VIS))

Translation of other languages will be available at a later date.
