CDPH is pleased to share.....

April is Oral Cancer Awareness Month!

HPV viruses are a leading cause of oropharyngeal cancers with an [estimated 11,000 HPV-related oral cancers estimated annually](#). Evidence suggests the HPV9 vaccine will be protective against these cancers. Learn more!

Archived webinar

sponsored by the Head and Neck Cancer Alliance and the National HPV Vaccine Roundtable
[Understanding Oropharyngeal Cancers Caused by HPV](#) (watch or bookmark now!)

Video stories in the first person about HPV and oral cancers

Share with your clinic staff, patients, and community: two oral cancer survivors, and one head and neck cancer surgeon speak out.
