# Vaccine Tips

---

May 2017

## ***May is Toddler Immunization Month!***

### **Are all the toddlers in your practice up-to-date on their vaccines?**

A baby's 1st birthday is not just an occasion for cake; it's an important health milestone. One-year-olds need a well-child check-up and routine vaccines.

Children between 12 and 15 months old are recommended to receive Hep A, MMR, Varicella, Hib, and PCV. Kids 15-18 months old need a 4<sup>th</sup> dose of DTaP. Some patients might need a catch-up dose or a flu vaccine, so check every child's shot record at every visit. **Never miss an opportunity to vaccinate.**

[EZIZ.org](http://EZIZ.org) has lots of great staff resources. Download and review these today:
