**Comments**

- Licensed in 2005
- Boosters are recommended for those who remain at high risk. See ACIP recommendations.
- Does not protect against Meningococcal serogroup B
- For routine recommendations, refer to *Meningococcal Vaccines—Routine Risk*
- For recommendations for high-risk patients, refer to *Meningococcal Vaccines—High Risk Populations*
- If Menactra is given to children with HIV infection or asplenia (including sickle cell disease), complete the PCV13 series and wait at least age 2 years before giving Menactra. See ACIP recommendations. These restrictions do not apply to Menveo.
- It is recommended that Menactra be given either before, or concomitantly with, the next recommended dose of DTaP vaccine.

- Licensed in 2010
- Boosters are recommended for those who remain at high risk. See ACIP recommendations.
