### Poliovirus

**Brand Name and Manufacturer**
- **IPOL®**
- Sanofi Pasteur

**Routine Schedule**
- Four dose (4) series: 2, 4, and 6-18 months, and 4-6 years

**Minimum Intervals**
- 4 week minimum interval between dose 1 and 2
- 4 week minimum interval between dose 2 and 3
- 6 month minimum interval between dose 3 and 4

**Approved for use in**
- Persons aged 6 weeks and older

**Administration**
- Intramuscular (IM) injection or Subcutaneous (SC) injection

**Packaging**
- Vaccine is packaged as a 10-dose multi-dose vial

**Storage**
- Refrigerate between 35°F and 46°F (2°C to 8°C)
- **DO NOT FREEZE**

**Full ACIP Recommendations**
- [http://www.cdc.gov/vaccines/pubs/pinkbook/polio.html](http://www.cdc.gov/vaccines/pubs/pinkbook/polio.html)

**VFC Letter**
- [http://eziz.org/assets/docs/IMM-1061.pdf](http://eziz.org/assets/docs/IMM-1061.pdf)

**Billing Codes**
- CHDP code: 39
- CPT code for vaccine: 90713
- CPT code for administration: 90460
- Medi-Cal Fee-For-Service (FFS) administration: 90713-SL
- ICD-9-CM code: v04.0

**Comments**
- Licensed in 1990
- In the first 6 months of life, the minimum age and minimum intervals are only recommended if the infant is at risk of imminent exposure to the disease (i.e., travel to a polio-endemic region or during an outbreak).
- A fourth dose is not necessary if the third dose was given at 4 years of age or older and at least 6 months after the second dose.
- IPV is not routinely recommended for U.S. residents aged 18 years or older.
