Varicella  
Zoster | Outbreak/Special Situation 317 Funded Vaccines |
| **Children and Adults** (All ages) | | | State General Fund Vaccines |

1VFC-funded vaccines may be used to immunize underinsured children ONLY if the LHD has a FQHC or RHC designation. Otherwise, underinsured children presenting to a LHD clinic or HDAS must be referred to a FQHC or RHC.
2Fully insured children and adults are not eligible to receive 317 vaccine routinely (adults enrolled in Medi-Cal/Medi-Cal managed care plans are considered fully insured). 317 vaccine may not be used in travel clinic settings.
3Depending on funding, State General Fund vaccines may vary.
4Adults with Medicare Part B (without Part D) are eligible if they are at low-risk for Hepatitis B.
5Available in limited quantities.
6Adults with Medicare Part B (without Part D) are eligible if they are receiving it as a routine vaccine (i.e., do not have a wound).
7For outbreak control and post-exposure prophylaxis. Available as funding permits.
