If you experience a power failure, do not open refrigerator/freezer doors. If it lasts more than 2 hours, call the California VFC Program at (877) 243-8832.

**Safeguard Your Power Supply**

**Protect plug and outlet**

- Plug in vaccine storage unit to a nearby outlet.
- Secure plug with a guard/cover.
- Post “Do Not Unplug” signs near outlet.

**Always avoid disruption of power**

- Do not use extension cords or power strips with an ON/OFF switch.
- Do not plug more than one appliance into an outlet. This will prevent tripping of circuit breakers.
- Never unplug the vaccine refrigerator or freezer.
- Do not use outlets that are controlled by wall switches.
- Do not use outlets that have built-in circuit switches (they have red reset buttons).
- Label fuses and circuit breakers. Post a sign to alert the Vaccine Coordinator any time the power goes out.

**Warning! Alert Vaccine Coordinator if power goes off.** Jenny 555-5555
