

Vaccine Tips

May 2016

Do you know when your thermometers' Certificates of Calibration expire?

- ✓ Thermometers used to monitor vaccine temperatures must be professionally calibrated and have a valid Certificate of Calibration.
- ✓ Every Certificate of Calibration shows an expiration date.
- ✓ Double check your expiration dates.
- ✓ If any of your thermometers expires in 2016, replace it with a digital data logger. Give yourself a head start! **
- ✓ Digital data loggers go by different names, including temperature logger, continuous temperature monitoring device, temperature data recorder, data logger, etc.

**** Beginning in 2017, all VFC providers will be required to use digital data loggers to monitor temps in their storage units.**
