SUBJECT: NIAM: 3 things providers can do to promote adult vaccinations
DATE: 8/18/14

Adult vaccines prevent serious diseases such as influenza, shingles, pneumonia caused by pneumococcal bacteria, hepatitis, meningitis and whooping cough.

Here's **3** things you can do to promote immunizations for adults:

- 1. Encourage adult patients--or parents of your young patients—to get caught up on recommended for vaccinations.** Hand out the CDC's [easy-to-read adult immunization schedule](#) or refer adult patients to their [interactive online personal vaccine scheduler](#).
- 2. Share this CDC flyer** [Do You Know What Adult Vaccines You Might Need?](#)
- 3. Register your flu clinic** at <http://flushot.healthmap.org> (if you intend to offer flu vaccinations to the community).
