

TO: EZIZ Users
FROM: CDPH
SUBJECT: Tdap for all Pregnant Moms
DATE: 5/5/14

Dear EZIZ users,

Sunday is Mother's Day—a great reminder that pregnant moms need a Tdap shot.

Tdap immunization is recommended between 27 and 36 weeks gestation. Immunize with every pregnancy, even if your patient received Tdap before becoming pregnant.

You can also:

- Order FREE copies of the [Immunizations for a Healthy Pregnancy](#) brochure (also available in [Spanish](#)) from your [local health department](#)
- Download and display copies of the [Expecting? Protect Your Baby from Whooping Cough](#) flyer (also available in [Spanish](#)) at your clinics
- Send CDC's health e-card: [Pregnant? Get Tdap](#)
- Distribute CDC's [Immunizations and Pregnancy](#) flyer.

Happy Mother's Day to all of the EZIZ moms. Thank you for your tireless efforts in protecting the health of our children!
