## **Implementing Immunization Requirements at California Colleges – This is How We Do It!**

The California Department of Public Health, Immunization Branch will be hosting a free webinar for California colleges/student health centers to learn about the different ways other colleges implement immunization requirements. A panel of speakers from various colleges will share their experiences and strategies for getting students immunization status documented and enrolled on-time. We will have a live Q&A session, with discussions on various topics, such as using EMR/CAIR systems, processes for holding registration, handling exemptions, and challenges regarding insurance coverage.

By the end of the webinar, participants will be able to:

- Describe how 3 colleges successfully implement college immunization requirements
- Identify 3 ways electronic systems (EHRs, CAIR, IIS, Point n' Click, etc.) can be useful in documenting students' immunization statuses
- Identify at least 3 resources to assist in implementing college immunization requirements

More details regarding the webinar, along with instructions for how to register will be emailed to you soon.
