Dear VFA Provider:

Today is the last day to submit your orders for VFA vaccine. After today, you will not be able to place an order until the next ordering period, projected to open on April 2nd, 2019.

Before placing an order for hepatitis B vaccine, assess your current VFA hepatitis B supply and plan to draw down that supply. You must administer current supply of hepatitis B vaccine even as you order HEPLISAV-B® (HepB-CpG). **Any unexpired doses on hand cannot not be returned to the program and will be considered wasted.**

See the CDPH HEPLISAV-B® [clinical letter](#) for more information.
