**Introduction**

The annual child care assessment is conducted each fall to monitor compliance with the California School Immunization Law. Results from this assessment are used to measure immunization coverage among children entering licensed child care facilities. This report presents results from this year’s child care assessment and the attached tables present comparisons of immunization coverage in child care facilities by county.

**Methods and Participants**

This year’s child care assessment was conducted in 9,498 of California’s licensed child care facilities. Child care facility staff completed assessment reports and submitted them to local health departments and the Immunization Branch. The age group assessed is 2 years to 4 years, 11 months. Roughly one-third of children in this age group attend licensed child care facilities. The following data are only for children in licensed child care facilities that have reported and may not be representative of the entire population of California children in this age group.

**Results and Discussion**

A summary of results from the Fall 2013-14 child care assessment are found below (Table 1). This year, 89.3% of the 486,526 children enrolled in reporting child care facilities received all required immunizations (4+ DTP, 3+ Polio, 1+ MMR, 1+ Hib, 3+ Hep B, and 1+ Vari or physician-documented varicella disease). There were 1,402 (0.29%) children with permanent medical exemptions (PMEs) and 14,325 (2.94%) children with personal belief exemptions (PBEs). For all facilities, immunization coverage was greater than or equal to 93% for each vaccine.

| Table 1: Child Care Immunization Assessment, 2013-2014* |
|---------------------------------|-----|------|-------|----------------|
|                                 | All | Public | Private | Head Start |
| Number of Schools               | 9,498 | 2,209 | 5,866 | 1,423 |
| Number of Students              | 486,526 | 110,924 | 299,773 | 75,829 |
| All Required Immunizations      | 89.3% | 90.7% | 86.9% | 96.3% |
| Conditional Entrants            | 7.5% | 7.7% | 8.6% | 2.9% |
| Permanent Medical Exemptions    | 0.29% | 0.24% | 0.34% | 0.15% |
| Personal Belief Exemptions      | 2.94% | 1.37% | 4.11% | 0.63% |
| 4+ DTP                          | 93.8% | 94.2% | 92.6% | 97.8% |
| 3+ Polio                        | 95.7% | 96.5% | 94.6% | 98.9% |
| 1+ MMR                          | 95.7% | 96.3% | 94.7% | 99.0% |
| 1+ Hib                          | 96.7% | 96.3% | 96.4% | 98.6% |
| 3+ Hep B                        | 93.9% | 95.4% | 92.2% | 98.6% |
| 1+ Vari (or physician-documented disease) | 95.1% | 96.1% | 93.8% | 98.9% |

*Individual antigen status is unavailable for students with Personal Beliefs Exemptions. Therefore, individual antigen immunization coverage may be underestimated; anecdotal evidence suggests a small percentage of students may have some but not all required immunizations.

**Conditional Entrant is a student who does not meet all requirements. This student must be followed up because he/she: lacks (i.e., is not yet due for) at least one dose and does not have a personal beliefs or permanent medical exemption; or has a physician affidavit of Temporary Medical Exemption for one or more doses; or is a transfer student who has no record available yet.
The percentage of children receiving required vaccines and exemptions differed depending on facility type (Table 1). Head Start Facilities reported a higher percentage of children having received all required immunizations (Figure 1 and 2), and a lower percentage of conditional entrants (Figure 3) as well as children with exemptions (Figure 4 and 5) compared with public or private facilities. Private facilities reported a higher percentage of conditional entrants (Figure 3) and children with exemptions (Figure 4 and 5) compared with other facility types.

Figure 1: Percentage of California Child Care Enrollees with All Required Immunizations by Facility Type

![Bar chart showing percentage of California child care enrollees with all required immunizations by facility type.]

Figure 2: Percentage of California Child Care Enrollees Completing Required Vaccine Series by Facility Type

![Bar chart showing percentage of California child care enrollees completing required vaccine series by facility type.]
Figure 3: Percentage of Conditional Entrants Among California Child Care Enrollees by Facility Type

Figure 4: Percentage of Child Care Enrollees in California with Permanent Medical Exemptions by Facility Type

Figure 5: Percentage of Child Care Enrollees in California with a Personal Beliefs Exemption by Facility Type
Over the past five years, the percentage of California child care enrollees completing all required immunizations for all facilities has decreased by approximately 3% (Figure 6). Head Start enrollees have consistently had the highest percentage of all required immunizations over the past five years, followed by public, then private facility enrollees. Though the percentage of enrollees with all required immunizations in both public and private facilities decreased over the past five years, the percentage of enrollees in Head Start facilities with all required immunizations has tended to remain the same.

**Figure 6: Percentage of California Child Care Enrollees Completing All Required Immunizations By Facility Type, 2009-10 to 2013-14 School Years**

The percentage of conditional entrants among California child care enrollees has increased over the past five years by 1.7 percent (Figure 7). The percentage of conditional entrants among Head Start enrollees over the past five years has consistently been the lowest, followed by public, then private facility enrollees.

**Figure 7: Percentage of Conditional Entrants Among California Child Care Enrollees By Facility Type, 2009-10 to 2013-14 School Years**
The percentage of California child care enrollees with PMEs over the past five years has increased for all facility types by about a half percentage (Figure 8). Child care enrollees in Head Start facilities have consistently had the lowest percentage of PMEs followed by public then private facility enrollees.

Figure 8: Percentage of California Child Care Enrollees with a Permanent Medical Exemption By Facility Type, 2009-10 to 2013-14 School Years

During the 2009-10 to the 2013-14 school years, the percentage of California child care enrollees with a PBE has increased by about one percent (Figure 8). PBE rates have increased at a faster rate among private facility enrollees compared with all other facility types.

Figure 8: Percentage of California Child Care Enrollees with a Personal Beliefs Exemption By Facility Type, 2009-10 to 2013-14 School Years
Over the past five years, the percentage of California child care enrollees with the required vaccines has decreased for each required vaccine except 4+DTP which has increased slightly since 2009-10 (Figure 10). The percentage of child care enrollees completing the 3-dose series of Hepatitis B has decreased at a faster rate over the past five years compared with all other vaccines with an overall decrease of 1.4%.

**Figure 10: Percentage of California Child Care Enrollees Completing Required Vaccines By Facility Type, 2009-10 to 2013-14 School Years**

Description of Attached Tables
Enclosed is a full set of tables showing this year’s results. Tables 2, 2a, 2b, and 2c show total enrollment and admission status by county among different types of facilities (all facilities, public, private, and Head Start). Tables 3, 3a, 3b, and 3c show children adequately immunized for each vaccine by county among different types of facilities. Table 4 shows the number of facilities reporting by county and facility type.

For further information, please contact Teresa Lee at (510) 620-3746 or Teresa.Lee2@cdph.ca.gov at the California Department of Public Health, Immunization Branch.

### Notes
- The percentages indicate the proportion of children immunized against various diseases.
- The data is provided for all counties in California, including major cities like Los Angeles, San Francisco, and San Diego.
