

California COVID-19 Vaccination Program Update

CDC & Western States Issue Multiple Recommendations Regarding mRNA COVID-19 Vaccine Boosters and Additional Doses

The CDC and the Western States Scientific Safety Review Workgroup (WSSSRW) have issued several recent recommendations to expand the use of the COVID-19 vaccine mRNA vaccines.

Expanding Pfizer Booster Vaccine Eligibility to Individuals 12+ Years

Persons 12-to-17-years-old should get a Pfizer booster shot 5 months after their primary Pfizer vaccine series.

Decrease the mRNA Booster Interval from 6 Months to 5 Months

Individuals 12-years and older who initially received an mRNA vaccine series (two doses of Moderna for those 18-years-of-age and older or two doses of Pfizer-BioNTech for those 12-years-of-age and older) can now receive an mRNA booster shot 5 months after completing their initial series.

Add an Additional Pfizer Dose for Immunocompromised Children 5-to-11-Years-Old

Immunocompromised children ages 5-to-11 should receive an additional dose of Pfizer vaccine 28 days after their second shot.
