

For Providers

## California COVID-19 Vaccination Program Update

# Janssen (Johnson & Johnson) Product Not Available for Standard Orders

CDPH will turn off the Janssen (Johnson & Johnson) product for Standard Ordering in myCAvax today by the end of the day due to limited supply. Providers may still submit Small Orders for this product if doses are available for local fulfillment by your Local Health Department or Multi-County Entity (MCE). Alternatively, you may utilize the [Vaccine Marketplace](#) to determine if excess doses are available from neighboring providers in your community.

Please review our [previous communication](#) regarding the preferential recommendation of mRNA COVID-19 vaccines. In light of this preferential recommendation for mRNA vaccines and product unavailability, we encourage providers stocking Janssen COVID-19 vaccine as their primary vaccine supply to order either Pfizer-BioNTech or Moderna mRNA COVID-19 vaccines. Having an mRNA vaccine in stock will prevent delays in access to vaccination for your patients.

Note to providers with open Marketplace posts in myCAvax for this product: Please ensure you have closed your posts if vaccine doses are no longer available or doses have expired. If posted doses are still available, please make sure to update expiration dates for available excess vaccines.

Should you have any questions about this please reach out to the COVID Call center at [COVIDcallcenter@cdph.ca.gov](mailto:COVIDcallcenter@cdph.ca.gov).
