California COVID-19 Vaccination Program Update

#CrucialCOVIDConversations Social Media Alert

We need your help on social media to guide the public, answer questions, and fight back against the latest misinformation.

We are encouraging all healthcare providers to post at least one message on the social media platform of your choice this week using the hashtag **#CrucialCOVIDConversations**.

Key Social Media Message of the Week (tailor for your platform and voice):

In February 2022, unvaccinated Californians were 17.1 times more likely to die and 8.9 times more likely to be hospitalized from COVID-19 than Californians who received their booster dose. If breakthrough cases are worrying you, remember that COVID-19 vaccines are still doing their job. Vaccines are the difference between mild and severe illness.

Sample Social Media Post #2:

Vaccines help protect our children from preventable diseases. Here are some tips on making that process easier: Be honest about the process, explain how vaccines keep kids healthy, give advanced warning, use a distraction, and ready a reward.
