# Third Party Administrator Blue Shield of California

Marta Green, Project Coordinator for Statewide Vaccine Network

Aliza Arjoyan, Senior Vice President of Network Management Provider Partnerships

# Accelerating Vaccine Distribution and Administration for Californians

February 25, 2021

**California's  
Statewide Vaccine  
Network is designed  
to save more lives.**

**Delivering an improved  
and connected  
experience**

## **More options to vaccinate Californians faster**

- Statewide network of providers
- Geographically diverse mega sites
- Home visits
- Mobile providers
- Pharmacies

## **More resources to reach diverse communities**

- Network designed to reach the most vulnerable and those disproportionately affected by COVID-19 infection and death
- Support to providers and local health jurisdictions for FEMA-eligible costs associated with supporting the transition to a new system and workflow
- Patient navigators
- Support services, including extended hours, language capacity, accommodations for physical accessibility and mobile clinics

## **More user data and reporting for transparency**

- A more consistent and reliable user experience for all Californians
- Timely data sharing
- Daily allocation reports to ensure equity, efficiency, and speed of network
- Ongoing community and stakeholder engagement

## Current state

---

- ✘ Recorded on **multiple systems** (including paper-based at some sites)
- ✘ **Lags** in data reporting
- ✘ **Gaps** in data reported
- ✘ **Difficulty supporting real-time** decision-making
- ✘ **Missing or unaccounted** for vaccines
- ✘ **Inconsistent user experience** for access to and getting vaccinated

## Future state

---

- ✓ **One system** for data collection – from appointments to vaccine administration
- ✓ **Enhanced availability of data** for data monitoring and tracking as well as reporting
- ✓ **User-friendly tool for the public** to register (via My Turn) for vaccinations
- ✓ Consistent **tracking for follow-up doses**
- ✓ Consistent and **integrated user experience**

... while supporting the local health jurisdictions and current vaccinators through the power of “and”

## How we will support...

Develop a rigorous, reliable, **statewide** performance management system

*and*

Maintain and enhance the performance of local health jurisdictions

Get all network providers to adopt the operational and technical changes needed to support the new performance management system

*and*

Position network providers to succeed without disruption

Vaccinate equitably, ensuring we are prioritizing the highest risk populations first

*and*

Vaccinate efficiently, effectively, and rapidly

AND TIME IS OF THE ESSENCE

Source: CA COVID-19 Vaccine Task Force

- Meeting CDC's requirements as CDC COVID-19 Vaccination Program provider
- Willingness to participate in payment incentives as appropriate and local community efforts to ensure the state meets its equity goals
- Ability to reach vulnerable populations and communities disproportionately impacted by COVID-19
- Ability to work with the technology platform(s) as identified by the TPA for appointment scheduling, vaccine administration and management
- Agreement to submit daily data feed with respect to capacity, throughput and other data as needed to assess equity, effectiveness and efficiency of administration
- Willingness to vaccinate all who are eligible, including the most vulnerable, whether insured or not – and without any preference for specific provider affiliation or residency
- Multi-county coverage preferred, but not required with ability and willingness to provide services to underserved communities
- Must be able to bill Medicare, Medi-Cal, HRSA for uninsured members and large insurance carriers (as appropriate for the type of provider) with ability to bill directly for those services
- Willingness to coordinate with supportive services as provided by the state to meet equity goals

# To achieve these outcomes, Blue Shield as the TPA will begin managing the statewide vaccination network, effective March 1st

## Now through March 31<sup>st</sup>

Provider status in the current network does not change

Providers who wish to continue vaccinating post March 31<sup>st</sup> will need to join the TPA network by March 22<sup>nd</sup>.

Blue Shield will be making recommendations regarding vaccine allocation to providers in part based on key performance measures

Blue Shield will co-create with all local health jurisdictions a transition plan

## Additional details

- All providers currently approved in the system to vaccinate will maintain that status and will continue to receive doses through the transition period.

Key performance measures include (but are not limited to):

- Contribution to equitable administration of vaccine
- Signing a contract
- Committing to adopt the performance management system, including My Turn

Transition plan will include:

- Achieving equity goals
- The transition of all jurisdictions to a new performance management system by March 31st

## California COVID-19 Vaccination Program Updates

The state of California has signed a new Third Party Administrator (TPA) [contract](#) with Blue Shield of California to help the state optimize and accelerate COVID-19 vaccine allocation and distribution equitably, efficiently, safely throughout the state. The TPA will be working closely with local health departments to identify facilities that have the capacity to properly maintain COVID-19 vaccine and meet additional federal and state requirements.

Providers currently enrolled or in the process of enrolling in the California COVID-19 Vaccination Program can access program-related resources and communicate through this website.
