

California COVID-19 Vaccination Program Update

Hello COVID-19 Vaccine Providers,

We are working with COVIDReadi and PrepMod to develop a process to automatically add approved provider sites from COVIDReadi to PrepMod as organizations under their respective Local Health Jurisdiction. To help you get more acquainted with the PrepMod platform, we have provided some background information and guidance on enrollment and training.

About PrepMod

PrepMod is an end-to-end system that automates all aspects of managing a vaccine program. The system includes a web-based consent process for patients and a clinic management system for staff. PrepMod can be used by LHDs, clinics, and individual providers to schedule clinics, track vaccination distribution, and report vaccination activity.

What can PrepMod do for you?

PrepMod is a platform you can use to report doses to CAIR2 or your local IIS. Other options on how to report doses are outlined on the [COVID-19 Training Requirements](#) page.

Training and Resources

Every PrepMod user should go through the self-guided training on the platform. PrepMod Training resources are available through our [COVID-19 Training Requirements](#) page. Please start by reviewing the PrepMod Training Instructions link.

Enrollment

We plan to enroll sites the week of December 21st. When approved provider sites are added, the vaccine coordinators from each organization will be set up with provider level access in PrepMod. They will receive an email from no-reply@multistatep4p.com to set up their accounts. If a site needs access sooner, access can be requested through your local health department.

There are also a couple of [live trainings](#) scheduled this week. Please note that these trainings are not specific to the CA PrepMod site, however, will still be useful for getting familiar with the system.

Additional PrepMod Resources

Additional PrepMod resources can be found on the [COVID-19 Training Requirements](#) page.

For any questions or feedback regarding COVIDReadi or PrepMod, you can contact us at the following email addresses:
