

California Department of Public Health Immunization Updates for Providers

Friday, July 12, 2024

9:00 am – 10:30 am

Housekeeping

Reminder to Attendees:

Today's session is being recorded. For slides, webinar recordings, and other postings, see the [CDPH Weekly Immunization Updates for Providers](#)

To be added to the CDPH email messaging listserv for providers, please email your request to blanca.corona@cdph.ca.gov

If you have post-webinar-related questions, please email leslie.amani@cdph.ca.gov

Reminder to Panelists:

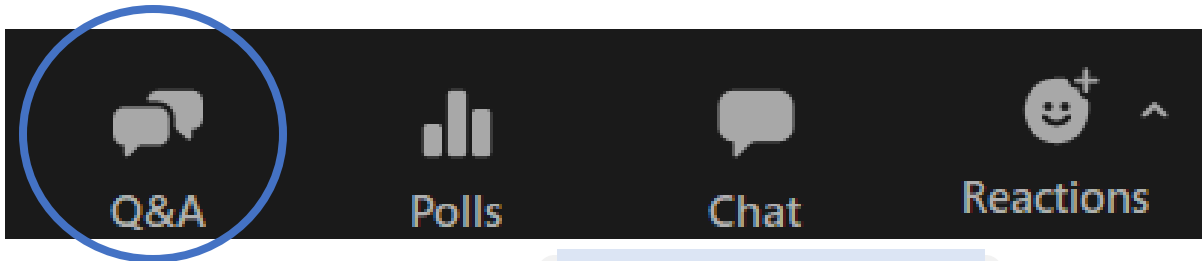

Please mute yourself when not speaking.

Please monitor the Q&A panel for questions you may be able to answer.

Questions

During today's webinar, please use the Q&A panel to ask your questions so CDPH panelists and subject matter experts (SMEs) can respond.

Resource links will be dropped into, "Chat"

Friday, July 12, 2024

No.	Item	Speaker(s)	Time (AM)
1	Welcome and Announcements	Leslie Amani (CDPH)	9:00 – 9:10
2	Vaccines for Children (VFC)	Christina Sapad (CDPH)	9:10 – 9:15
3	Child Health and Disability Prevention Program	Sabrina Atoyebi, Medical Operations and Policy Branch Chief	9:15 – 9:25
4	California Immunization Registry (CAIR)	Michael Powell (CDPH)	9:25 – 9:30
5	Storage and Handling	Kelley Leung, RN (CDPH)	9:30 – 9:35
6	Clinical	Caterina Liu, MD (CDPH)	9:35 – 9:50
7	Mpox: JYNNEOS Vaccine Availability	Brenda Meza (CDPH)	9:50 – 9:55
8	CDPH Quality Assurance	Francisco Borboa (CDPH)	9:55 – 10:00
9	Vaccines for Adults	Christina Sapad (CDPH)	10:00 – 10:05
10	Vaccine Management Updates	Josh Pocus (My Turn) and Claudia Aguiluz (myCAvax)	10:05 – 10:15
11	Resources and Q&A	Leslie Amani (CDPH)	10:15 – 10:30

Thank you for attending today's session!

Announcements

Leslie Amani, CDPH

AIM Webinar

Association of
Immunization
Managers

Date: Monday, July 15, 2024

Time: 10:00 am – 11:00 am, PT

Description: Register now for AIM's webinar, Slam Dunk Strategies for Adolescent Immunization: Utilizing Sports-Based Approaches to Increase Catch-up and Engagement.

Registration Link: [July 15, 2024, AIM Webinar Registration](#)

AIM Webinar

Association of
Immunization
Managers

Date: Tuesday, July 16, 2024

Time: 10:00 am – 11:00 am, PT

Description: Register now for AIM's next vaccine confidence webinar, Utilizing Infodemiology to Improve Vaccine Confidence: Resources for Immunization Programs and Partners

Registration Link: [July 16, 2024, AIM Webinar Registration](#)

Crucial Conversations Webinar

Title: Talking to Parents about School-Required Immunizations

Description: Please join Dr. Eric Ball to learn conversational methodologies for effectively talking with parents about school-required immunizations.

When: Tuesday, July 30, 2024

Time: 12:00 pm - 1:00 pm, PT

EZIZ Email Updates

Are you signed up to receive CDPH Immunization Branch EZIZ Email updates for providers?

To be added, please email Blanca.corona@cdph.ca.gov

The screenshot shows the top portion of an email. The header features the CDPH logo and the text 'EZIZ Update' on the left, and 'Immunization Branch' on the right. Below this is a blue bar with the date 'May 2, 2024'. The main content area has a blue heading 'Latest Updates and Resources' followed by a horizontal line. Below the line is the text 'In this message:' followed by a numbered list of four items. Another horizontal line is below the list. The final section has a blue heading 'May is Hepatitis Awareness and Asian American and Pacific Islander Heritage (AAPI) month!' followed by a paragraph of text.

CDPH | EZIZ Update

Immunization Branch

May 2, 2024

Latest Updates and Resources

In this message:

1. Hepatitis Awareness & Asian American and Pacific Islander Heritage Month
2. May - July Holiday Cadence Calendars for BAP and SGF
3. CDPH Immunization Updates for Providers Webinar Reminder
4. VFC Transition to myCAvax

May is Hepatitis Awareness and Asian American and Pacific Islander Heritage (AAPI) month!

Did you know? About 9 in 10 adults with chronic hepatitis B in California are Asian and Pacific Islanders, especially those born in China, Korea, Vietnam, and the Pacific Islands.

Vaccines for Children

Christina Sapad, CDPH

VFC Vaccine Returns

- 2023-2024 Flu Vaccine has expired as of June 30th.
- Submit a Vaccine Return Form in myCAvax to receive a return shipment label to send back any unused doses to McKesson.
- 2 options for receiving return labels:
 1. **Email:** Return label will be sent to the Primary Vaccine Coordinator usually on the day the return is submitted, from McKesson Specialty Dist. [mailto:pkginfo@ups.com], subject line “UPS Label Delivery, <Label tracking Number>.”
 2. **Standard mail:** Return labels will be mailed to the provider location. The envelope containing the return label will have the wording “Return Label for Expired Vaccines” in red font.
 - If you do not receive your return label from McKesson within 7 days, contact the VFC Program for further assistance.
- Return nonviable vaccine within 30 days before the return labels expire.

VFC Eligibility and Changes to CHDP

- The Child Health and Disability Prevention (CHDP) Program has transitioned as part of Medi-Cal as of Monday, July 1, 2024.
- Children 18 years of age or younger, originally under CHDP will still qualify for VFC as they would now be under Medi-Cal.
- VFC resources have been updated to reflect the change.

VFC Eligibility Screening & Documentation Requirements

1. Screen for VFC Eligibility at Every Immunization Visit

You are required to screen ALL children (birth through 18 years) in your practice at every immunization encounter prior to administering VFC vaccines.

2. Determine Which Eligibility Criterion Is Met

To be VFC-eligible, patients must meet at least one of these four criteria:

- **Medicaid-eligible (or enrolled):** Has Medi-Cal as primary or secondary coverage
- **American Indian (AI) or Alaska Native (AN):** As defined by the Indian Health Care Improvement Act
- **Uninsured:** A child who has no health insurance coverage
Underinsured: A child who has private health insurance, but the coverage does not include vaccines; a child whose insurance covers only selected vaccines.
- **Underinsured:** A child who has private health insurance, but the coverage does not include vaccines; a child whose insurance covers only selected vaccines. Underinsured children are eligible to receive VFC vaccine only through a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC).

Verification of patient/parent response or self-identification of eligibility criterion (or criteria) is not required. No other factor may be considered when screening for VFC eligibility.

Clinical

Caterina Liu, MD, CDPH

CDC's Advisory Committee on Immunization Practices (ACIP) Meeting: June 26 – 28, 2024

Topics Covered:

- RSV Vaccines: Adult (Vote), Maternal/Pediatric
- COVID-19 Vaccines (Vote)
- Influenza Vaccines (Vote)
- Pneumococcal Vaccines (Vote)
- Combined DTaP-IPV-HIB-Hep B vaccine (Vaxelis) (Vote, VFC Vote)
- Meningococcal, HPV, Chikungunya, Dengue Vaccines

[Presentations](#) | [Agenda](#) | [Webcast Recordings](#)

[ACIP Recent Meeting Recommendations](#)

Adult RSV Vaccine Recommendations

- ACIP now recommends the following older adults receive a single dose of RSV vaccine:
 - **All adults 75 years of age and older**
 - **Adults 60–74 years of age and older who are at increased risk of severe RSV disease**
 - RSV vaccination is recommended as a single lifetime dose only. Persons who have already received RSV vaccination are NOT recommended to receive another dose.
 - These recommendations supplant the current recommendation that adults 60 years of age and older may receive RSV vaccination, using shared clinical decision-making. Adults 60–74 years of age who are **not** at increased risk of severe RSV disease are NOT recommended to receive RSV vaccination.
 - CDC will publish Clinical Considerations that describe chronic medical conditions and other risk factors for severe RSV disease for use in this risk-based recommendation.
- No preferential recommendation between products: Arexvy (GSK), Abrysvo (Pfizer), **mRESVIA - *New, mRNA vaccine (Moderna)**
- The Work Group discussed RSV vaccination for adults 50 – 59 years and concluded there is insufficient information at this time to move forward with a recommendation.

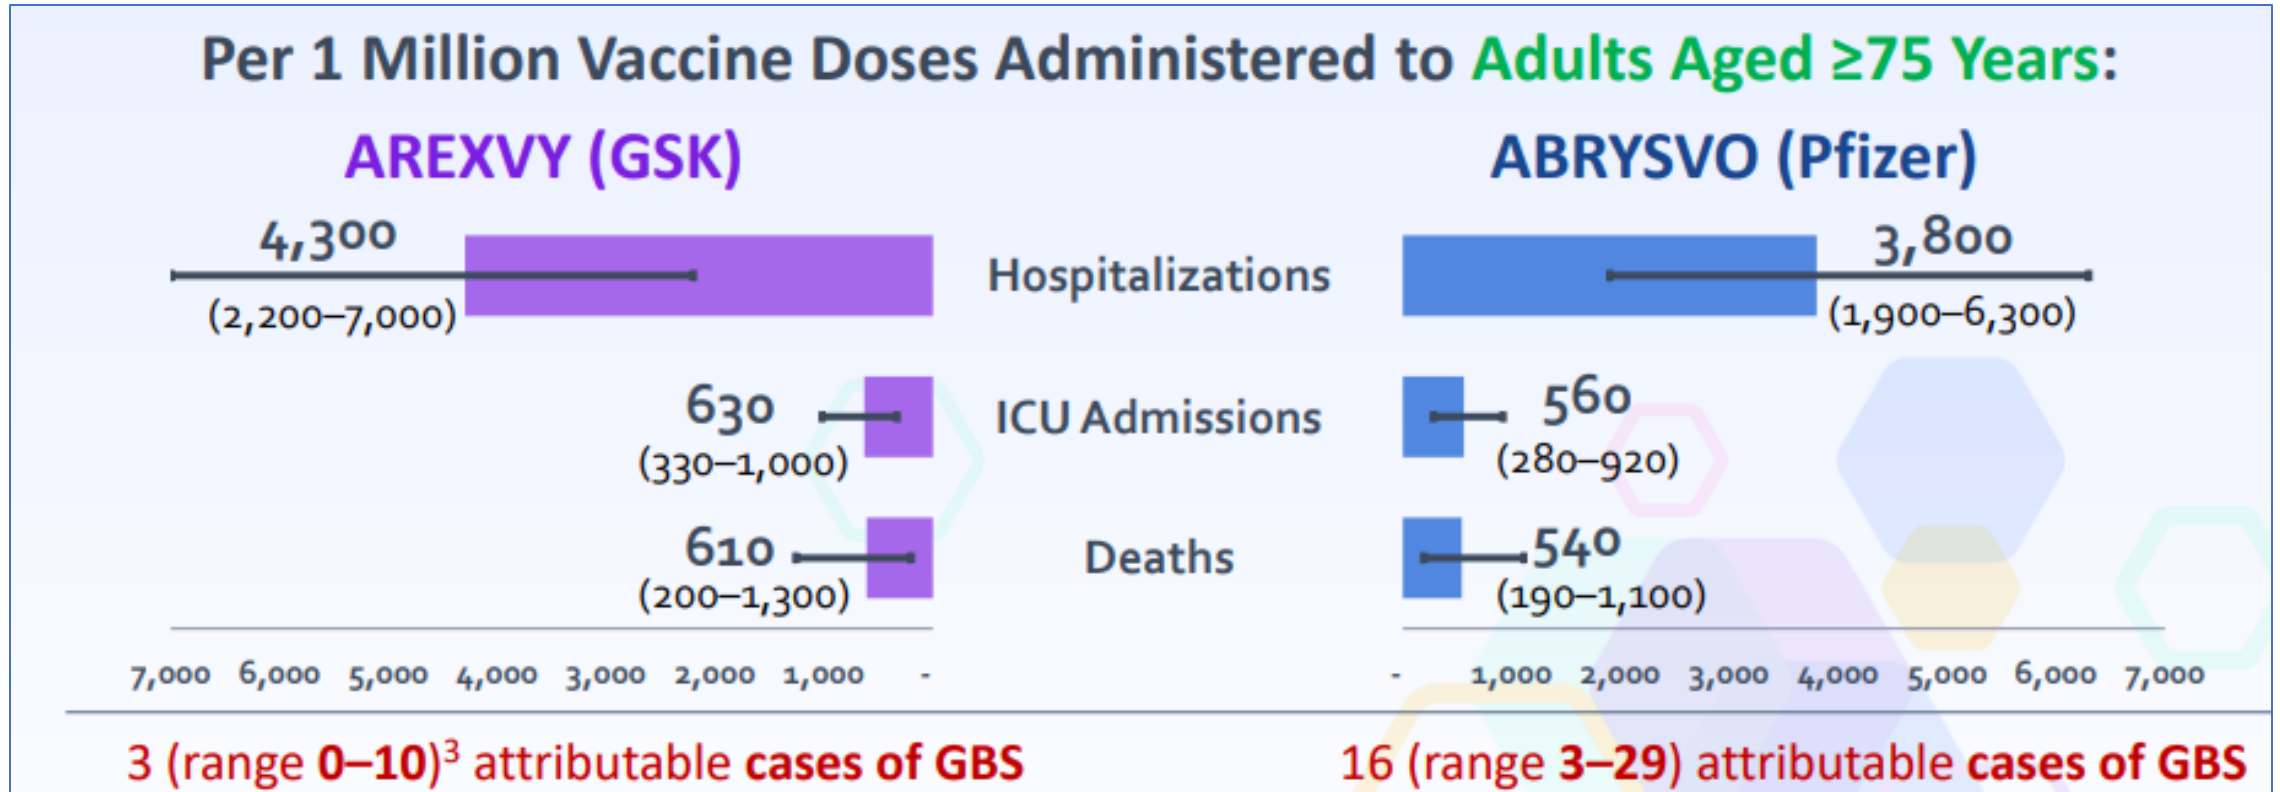

[ACIP 6/26/24 Presentation](#); [ACIP Recent Mtg. Recs.](#); [CDC Updates RSV Adult Recommendations](#)

RSV Vaccine - Adult

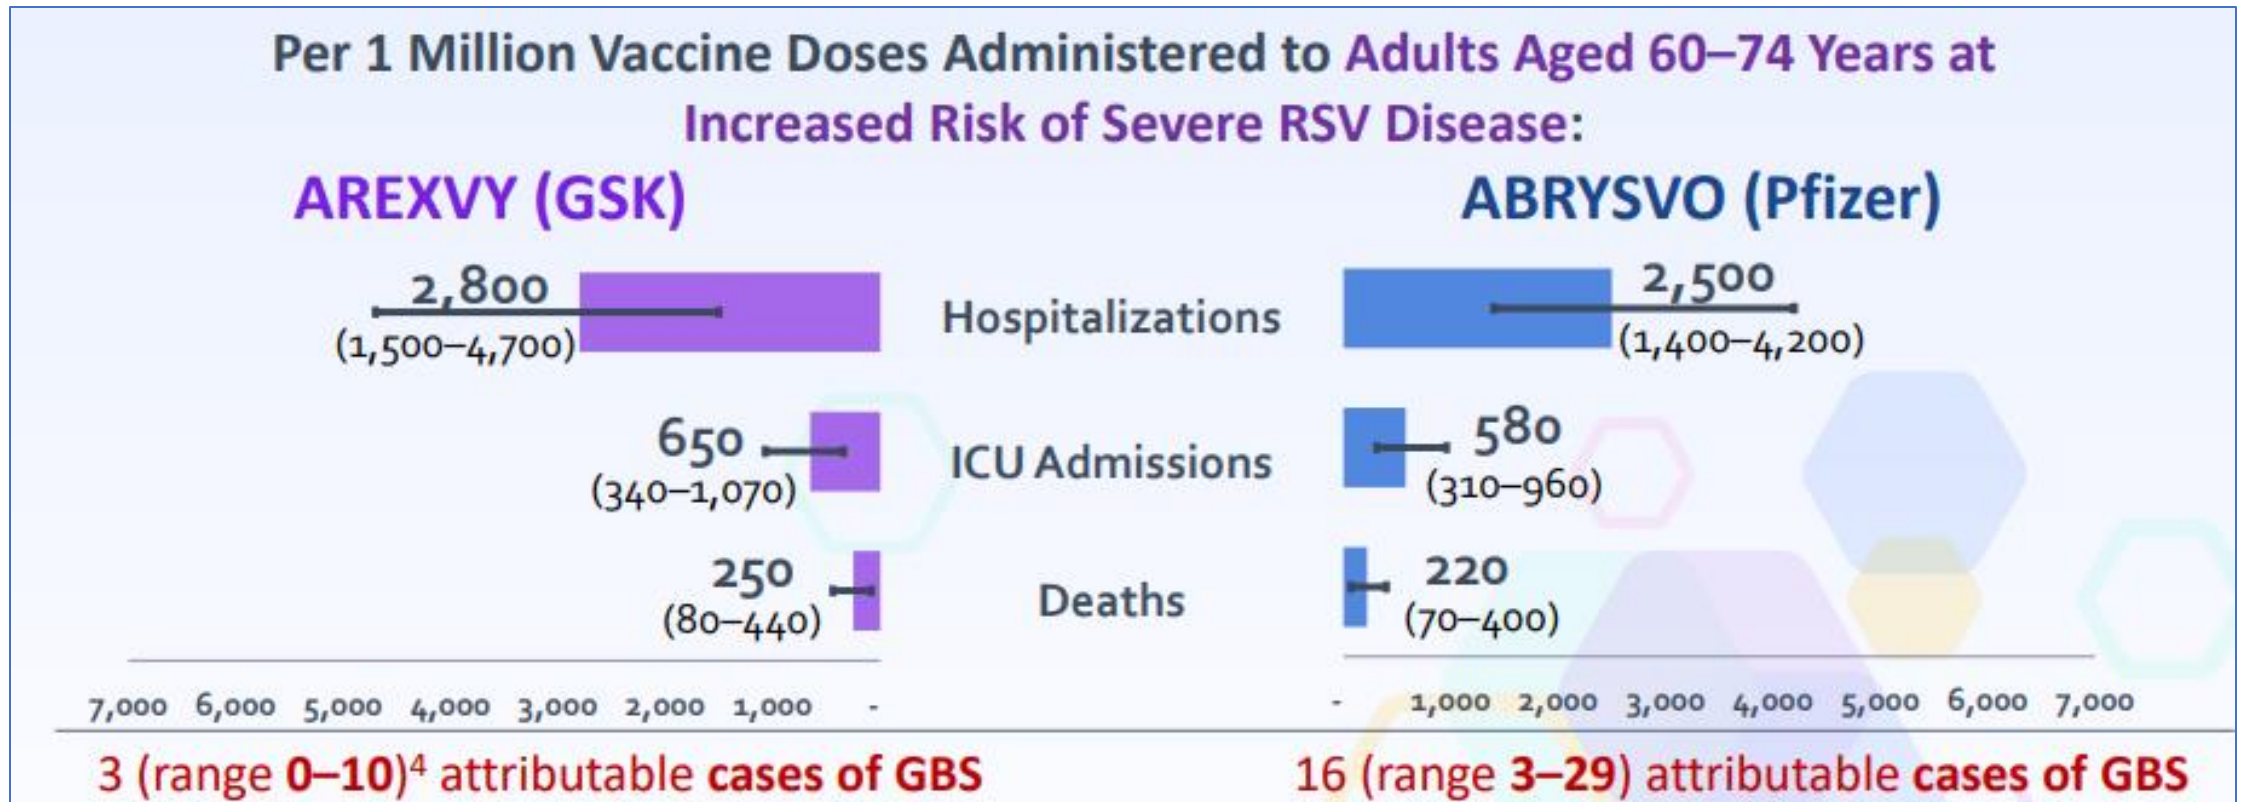

- Manufacturers presented data on duration of protection, revaccination, safety, co-administration, and use in 50-59y.
- Real-world evidence of robust protection against severe RSV during the first season after vaccination among adults 60+.
- Uncertainty remains regarding the magnitude of potential risk of Guillain-Barré syndrome (GBS).
 - Vaccine Safety Datalink (VSD) analysis found 7 GBS cases, but not deemed statistically significant.
 - FDA evaluation in 65+ found an elevated incidence of GBS following Pfizer vaccination, but not significant after adjustment.

[ACIP 6/26/24 Presentation](#); [FDA mRESVIA](#)

Estimated RSV-Associated Outcomes¹ Preventable over 2 RSV Seasons vs. potential cases of GBS (*positive predictive value-adjusted* attributable risk of GBS in FDA-CMS partnership data among adults aged ≥65 years, 42-day risk interval²)

Estimated RSV-Associated Outcomes¹ Preventable over 2 RSV Seasons vs. potential cases of GBS (*positive predictive value-adjusted attributable risk of GBS in FDA-CMS partnership data among adults aged ≥65 years, 42-day risk interval*^{2,3})

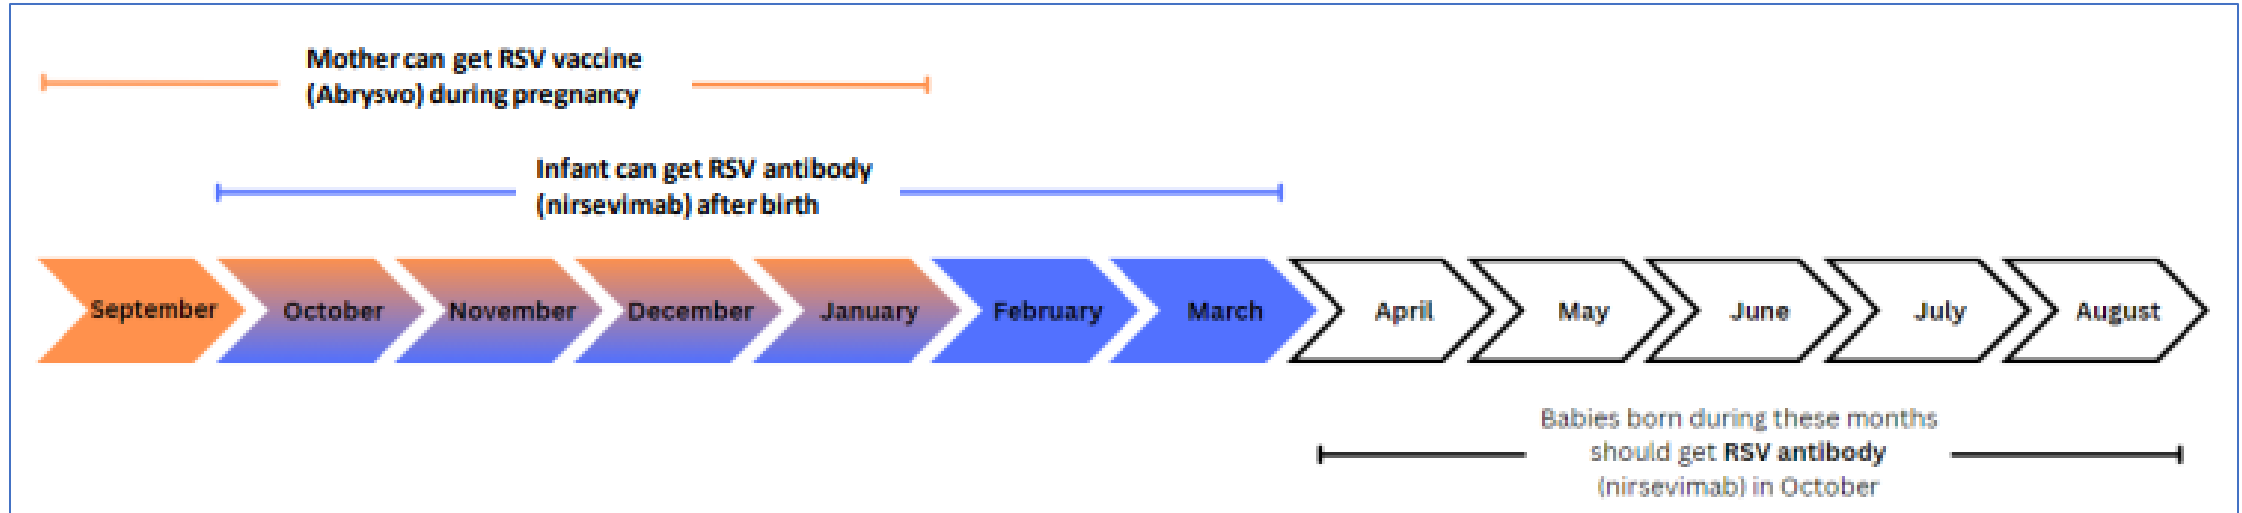

RSV Immunization – Maternal/Pediatric

- Recommendations have not changed:
 - Maternal RSV vaccine for pregnant people at 32–36 weeks' gestation, using seasonal administration (September 1 – January 31)
 - Nirsevimab for infants <8 months of age from October 1 – March 31, and infants 8-19 months of age at increased risk for severe RSV disease.
- Duration of protection is unknown; studies are ongoing.
- For people who previously received maternal RSV vaccine, during future pregnancies:
 - They are not recommended to receive additional doses,
 - Their infants should still receive nirsevimab.

[ACIP 6/28/24 Presentation; RSV Immunization for Children 19 Months & Younger | CDC](#)

Timing of RSV Vaccine and Nirsevimab

RSV Immunization – Maternal/Pediatric

- Real-world data showed nirsevimab was 91-98% effective against RSV-associated hospitalizations.
- Administration error reports received by the Vaccine Adverse Events Reporting System (VAERS):
 - Pregnant persons receiving Arexvy (GSK) instead of Abrysvo (Pfizer)
 - Children receiving RSV vaccine (Abrysvo, Arexvy) instead of monoclonal antibody (nirsevimab)
 - Wrong dose (nirsevimab) administered

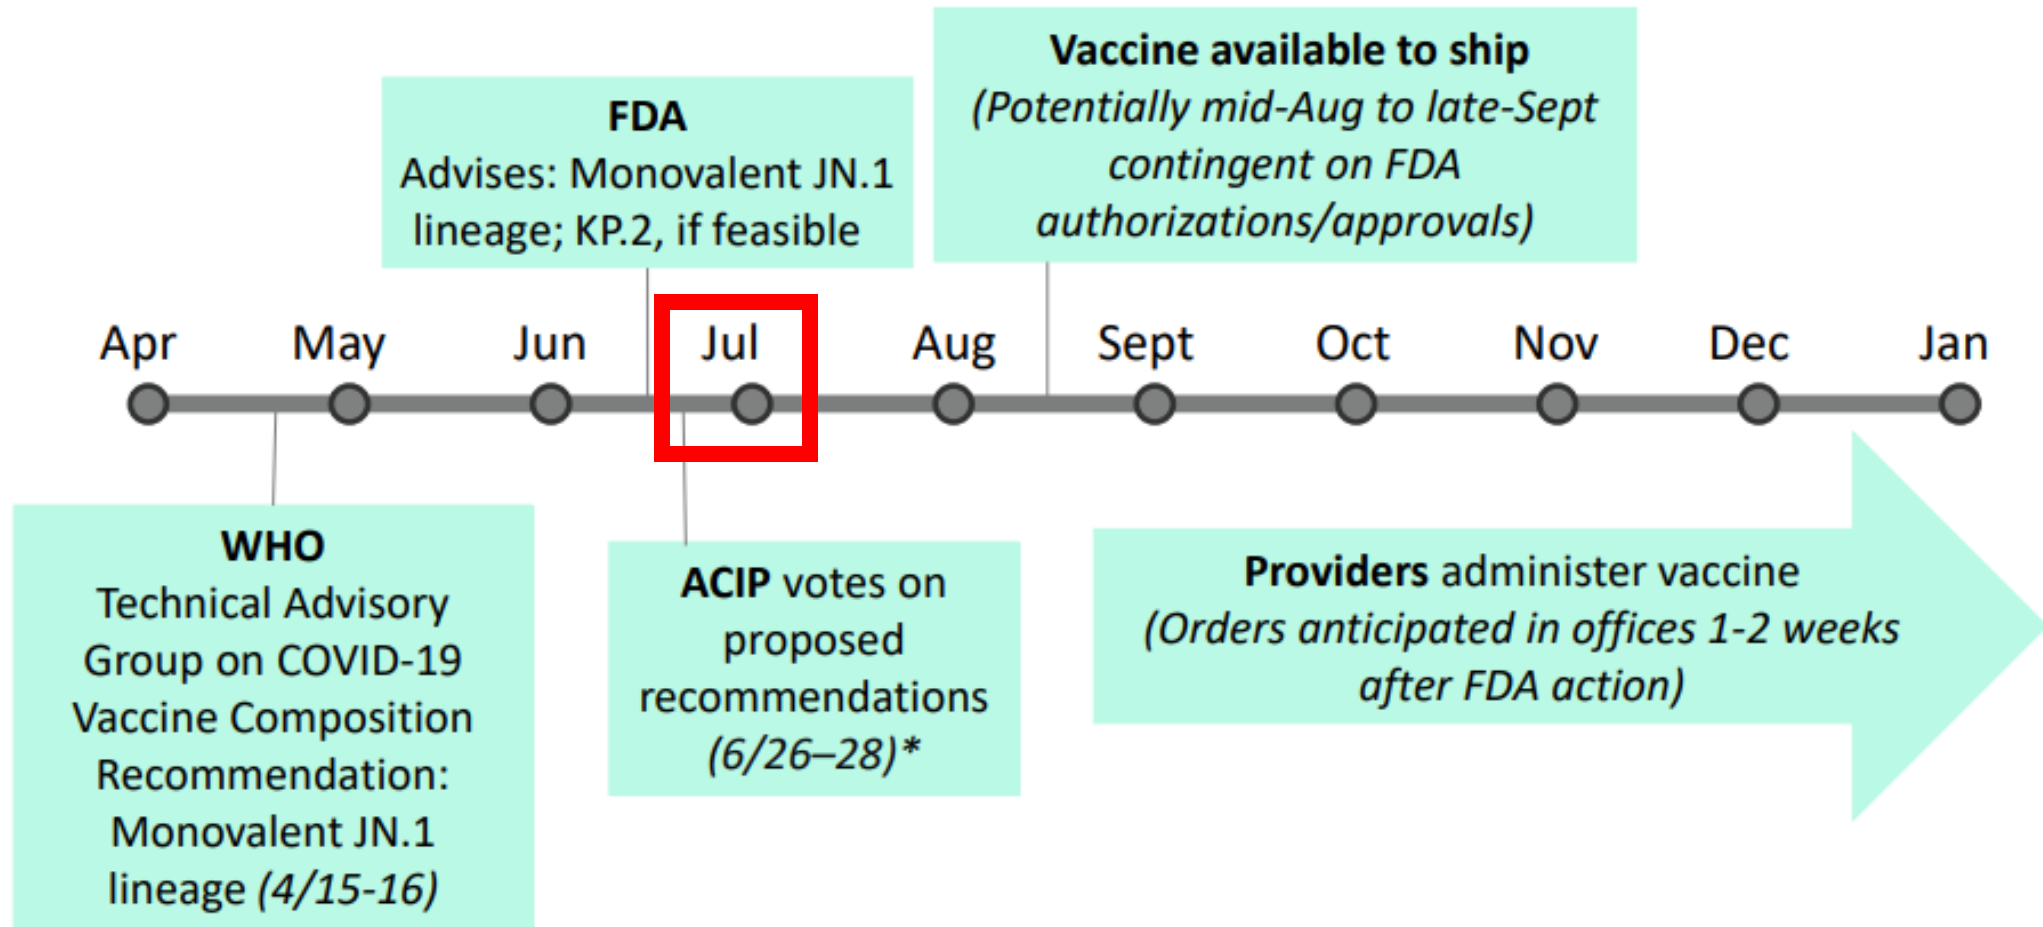

[ACIP 6/28/24; IMM-1480 Nirsevimab Guide to Prevent Severe RSV in Infants & Toddlers \(eziz.org\)](#)

COVID-19 Vaccine Recommendations

- ACIP recommends 2024-2025 COVID-19 vaccines as authorized or approved by FDA in persons ≥ 6 months of age.
- **This recommendation will not take effect until 2024 – 2025 vaccines are authorized/approved by FDA, anticipated in late Summer/early Fall.**

[ACIP Recent Meeting Recs.;](#) [CDC Recommends 2024-2025 COVID-19 and Flu Vaccines for Fall/Winter Season](#)

Prospective 2024 COVID-19 Vaccine Timeline

*CDC publishes MMWR policy note following ACIP and FDA action (potentially late August to late September).

**CDC updates COVID-19 Vaccine Interim Clinical Considerations immediately following FDA action.

COVID-19 Vaccine

- COVID-19 associated hospitalization data presented (COVID-NET):
 - Hospitalization rates are highest in ≥ 75 years, followed by infants < 6 months and adults 65-74 years.
 - Among hospitalizations from October 2023-March 2024:
 - Only 5% of children 6 months – 18 years received a 2023–2024 vaccine
 - Only 11% of adults received a 2023–2024 vaccine
- The virus that causes COVID-19, SARS-CoV-2, is always changing and protection from COVID-19 vaccines declines over time.
- **Receiving an updated 2024-2025 COVID-19 vaccine can restore and enhance protection** against the virus variants currently responsible for most infections and hospitalizations in the United States.

[ACIP 6/27/24 Pres.; CDC Recommends 2024-2025 COVID-19 and Flu Vaccines for Fall/Winter Season](#)

Influenza Vaccine Recommendations

- For all ≥ 6 months, routine annual influenza vaccination is recommended if no contraindication.
- For 65 years and older, these inactivated influenza vaccines (IIVs) are preferentially recommended:
 - High-dose (HD-IIV): Fluzone, contains 4x hemagglutinin (HA) antigen than standard dose IIVs, FDA approved for 65+
 - Recombinant (RIV) : Flublok, contains 3x HA antigen, FDA approved for 18+
 - Adjuvanted (aIIV): Fluad, contains MF59 adjuvant, FDA approved for 65+
- ***New** - For solid organ transplant recipients 18-64 years on immunosuppressive medication regimens, ACIP recommends high-dose inactivated (HD-IIV3) and adjuvanted inactivated (aIIV3) influenza vaccines as acceptable options for influenza vaccination, without a preference over other age-appropriate IIV3s or RIV3.

[ACIP Recent Meeting Recs.;](#) [CDC Recommends 2024-2025 COVID-19 and Flu Vaccines for Fall/Winter Season](#)

Influenza Vaccine Recommendations

- Updated 2024-2025 flu vaccines will all be **trivalent**.
- Optimal administration for most people: **September and October**.
- Vaccinate prior to September:
 - Pregnant persons in 3rd trimester
 - Children who need 2 doses
 - Those who may not return in the fall.
- Begin influenza/fall respiratory season vaccination planning efforts now.

Respiratory Disease Immunization Recommendations for Children and Adolescents

	July	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	April	May	Jun
COVID-19 (6 months+)	Strongly recommend updated vaccine for everyone. Children ages 6 months – 4 years should complete a multi-dose initial series, with at least one dose of the updated vaccine.											
Flu (6 months+)	Vaccinate: <ul style="list-style-type: none"> • Children who need 2 doses* • Pregnant persons in third trimester • Those who may not return in the fall 		Optimal vaccination: September and October		Continue vaccinating as long as flu is circulating, and unexpired vaccine is available.							
RSV (Nirsevimab) (0 –19 months)**					Optimal administration: October 1 – March 31							

Recommended immunization timing
 IZ timing for certain situations

*Children ages 6 months – 8 years who have received less than 2 doses in previous flu seasons, need 2 doses. The first flu vaccine dose should be given as soon as vaccine is available to allow the second dose to be given > 4 weeks later and ideally by the end of October.

**Providers may adjust timing based on guidance from local public health or regional medical centers.

California Department of Public Health | Immunization Branch

 IMM-1527 (5/24)

Vaxelis (DTap-IPV-HiB-HepB) Recommendations

- ACIP now recommends Vaxelis (DTap-IPV-HiB-HepB) be included with PRP-OMP (PedvaxHIB) in the preferential recommendation for American Indian and Alaska Native infants based on Haemophilus influenzae type b (Hib) component.
- ACIP recommends the approval of the Vaccines for Children (VFC) resolution for vaccines to prevent Hib.
- Background
 - American Indian/Alaska Native children aged < 5 year have a 31-fold higher incidence of invasive disease from Haemophilus influenzae type b (Hib) disease than non-Native children
 - Historically, Hib meningitis peaked at an earlier age among AI/AN infants
 - Vaccination with a 2 dose primary series of a Hib vaccine that contains PRP-OMP (PedvaxHIB) was preferred for AI/AN infants to provide early protection

[ACIP Recent Meeting Recommendations](#)

Pneumococcal Vaccine Recommendations

- ACIP recommends PCV 21 (Capvaxive) as an option for adults ≥ 19 years who currently have a recommendation to receive a dose of PCV
- No current preference for PCV21 over other adult pneumococcal vaccine options (PCV20 or PCV15+PPSV23)
- Full clinical guidance will be published in Morbidity and Mortality Weekly Report (MMWR).

[Capvaxive \(FDA\)](#)

PCV21 Serotypes

	1	3	4	5	6 A	6 B	7 F	9 V	1 4	1 8 C	1 9 A	1 9 F	2 3 F	2 2 F	3 3 F	8	1 0 A	1 1 A	1 2 F	1 5 B	2	9 N	1 7 F	2 0	1 5 A	1 5 C	1 6 F	2 3 A	2 3 B	2 4 F	3 1	3 5 B		
PCV15																																		
PCV20																																		
PPSV23																																		
PCV21																																		

PCV21 composition differs from other pneumococcal vaccines

- 77 – 85% of invasive pneumococcal disease (IPD) in adults caused by PCV21 serotypes.
- 54 – 62% of IPD in adults caused by PCV20 serotypes.
- Does not contain serotype 4, which disproportionately affects some adult populations (AI/AN, PEH).

Other ACIP Topics

- Meningococcal vaccine
 - Updated guidance expected February 2025
 - GSK MenABCWY vaccine under review by FDA
- HPV vaccine recommendations under review by ACIP workgroup
- Chikungunya vaccine recommendations under development
- Dengue vaccine (Dengvaxia) discontinued by manufacturer

Mpox: JYNNEOS Vaccine Availability

Brenda Meza, CDPH

JYNNEOS Supply and Ordering Update

- Reminder: JYNNEOS vaccine is available to order commercially.
 - List of distributors can be found here: [Bavarian Nordic Contact Information](#)
- CDPH has limited supply and is prioritizing orders by LHDs for PRIDE events and to support providers without access to commercial vaccine
 - Contact your Local Health Department to request JYNNEOS
- [Update to standing orders](#) – information on intradermal removed as the commercial product is not authorized for intradermal use
- Questions? Please contact the mpox team via email at mpoxvaccine@cdph.ca.gov

Poll: JYNNEOS Vaccine

1. Are you administering JYNNEOS vaccine?
 - Yes
 - No
 - N/A
2. Have you purchased the commercial JYNNEOS vaccine product?
 - Yes
 - No
 - N/A
3. If “No”, to question 2, do you plan to do so in the future?
 - Yes
 - No
 - N/A
4. If you do not plan to purchase JYNNEOS vaccine, please share why not.
 - Yes
 - No
 - N/A

Christina Sapad, CDPH

VFA Ordering Update

Anticipated Quarter 3 Ordering Window: July 15 – 26, 2024

Ordering Policy:

1. HPV vaccine will be temporarily unavailable to order this quarter.
 - Alternative methods of Access: Effective July 1, 2022, HPV vaccine will be added as a covered benefit for [Family PACT](#) patients ages 19 through 45 years. We strongly encourage you to utilize this benefit for VFA-eligible, Family PACT patients where HPV vaccination is recommended. Please contact the Family PACT program (Family.Pact@dhcs.ca.gov or 916-650-0414) with questions.
2. Vaccine dose requests for PCV and Zoster vaccines will be reduced by 65% of the practice's historical pre-cap ordering data (Q2 2022)
3. Order caps for all other vaccines remain the same as the previous quarterly order periods.

VFA Ordering Update

Reminders:

- Vaccine requests must be based on the needs of your eligible patient population of uninsured and underinsured adults. The VFA Doses Administered inventory must match the immunization registry (CAIR/Healthy Futures). **The VFA Program requires reported doses administered with each VFA order be based on doses recorded in CAIR as “317.”**
 - Please work with your EHR vendor, Local CAIR Representative, and/or CAIR Data Exchange Specialist to identify and resolve issues as soon as possible. Refer to the steps on CAIR documentation improvement [here!](#)
- If requesting vaccine over the recommended order size or the designated cap, provide a justification in “Step 2 – Review Doses Requested and Confirm Additional Details” of the myCAvax order form. **These special requests will be reviewed and approved on a case-by-case basis.**
- The VFA Program does not offer supplemental orders.

Claudia Aguiluz, myCAvax

My Turn Release Roadmap

Past Release
June 26, 2024 (R50)

Release 50

Super clinics

- ✓ Enhancements and bug fixes as needed / requested

Public portal updates

- ✓ Update vaccine tags for the traditional flu flow to match super clinic flow
- ✓ Remove nasal spray eligibility questions/error messages from traditional flu flow
- ✓ Provider Locator tool (MVP)
- ✓ Transition EZIZ Locator tool to My Turn site
- ✓ Will incorporate opt-out providers through enrollment process / form options

Super clinic updates

- ✓ new vaccine types to super clinic flow for both public and clinic (Anthrax, Shingles, RSV, and Pneumonia)

Current
July 18, 2024 (R51)

Release 51

Prescribing Provider

- ✓ Create a new Prescribing Provider role
- ✓ Include this new contact creation in the My Turn Digital enrollment and Add User feature
- ✓ Add prescribing provider fields to CQE

Public Portal

- ✓ Google Translate
- ✓ Mpox evergreen carousel & Shots for School banners
- ✓ Activating FY 24/25 Flu products

Future
September 4, 2024 (R52)

Release 52

Outbreak Vaccine Support

- ✓ additional vaccine support to CAIR quick entry for outbreak vaccines

Super Clinic Updates

- ✓ Smallpox vaccine as a new vaccine type on the clinic and public portal
- ✓ New screening questions for Anthrax
- ✓ CDPH Configurable Screening Questions for unplanned outbreak scenarios

General Clinic Enhancements

- ✓ Download appointment report from appointment search

Provider Locator

- ✓ Redesigned popup reminder
- ✓ General Enhancements

What's Next in My Turn? – Release 51 (1 of 3)

New updates for patients will launch on **Thursday, July 18, 2024!**

Release Highlights

Patients will be able to view:

- ✓ Translated text on the Public portal by selecting their choice of language from the 'Select Language' dropdown in the main navigation bar.
- ✓ The Evergreen mpox carousel module on the My Turn home page after the end of Pride month.
- ✓ Enhancements on the Testing sites page, aligned with the new Vaccine Locator layout, including rounded corners for Search and Clear buttons, and a redesigned 'Find a location' section.
- ✓ A new banner on My Turn site in support of school vaccinations.

My Turn Public

What's Next in My Turn? – Release 51 (2 of 3)

New updates for Clinic Managers and Vaccine Administrators will launch on **Thursday, July 18, 2024!**

Release Highlights

Clinic Managers will be able to:

Dashboards and Reports and IIS Registry:

- ✓ View a new banner with a message about CDC requirements for prescribing providers and a link to the 'Manage Users' tab, which will be displayed for 2 months.

Add Contact / User:

- ✓ View the new 'Add New Contact / User' button on the 'Manage Users' tab.
- ✓ Add contacts or users on the 'Add Contact or User' pop-up window enabling them to search and select existing contacts from the location.
- ✓ Create a new role from the 'Role' dropdown filter on the 'Contacts' subtab and a contact list that displays the new 'Roles' column.

New My Turn Users and Clinic Managers will be able to:

Digital Enrollment:

- ✓ View the new 'Key Roles' section consisting of detailed descriptions of the 'Provider of Record,' 'Clinic Manager,' and 'Prescribing Provider'.
- ✓ View role-specific pop-up windows for adding information about new contacts and the fields that pre-populate upon selecting the existing contact details.
- ✓ View an error message with Help Desk contact information if duplicates are detected upon submitting a contact.
- ✓ View the 'Key Roles' dropdown along with the details of contacts on the 'Enrollment Request Submitted' page.
- ✓ Verify the information on the SmartyStreets from the 'Address Street Line 2' field under the 'Organization Address' section on the 'Provider Location' page.

What's Next in My Turn? – Release 51 (3 of 3)

New updates for Clinic Managers and Vaccine Administrators will launch on **Thursday, July 18, 2024!**

Release Highlights

Clinic Managers and Vaccine Administrators will be able to:

Vaccine Administration:

- ✓ View the new 'Prescribing Provider' field under the new 'Prescribing Provider' section while scheduling appointments via VA, Walk-in, and IIS flows.

Appointment Bulk-Upload:

- ✓ View the new 'Prescribing Provider' field while bulk-uploading appointments via the CSV / Inline Bulk-upload flows.
- ✓ View an error message if the entered prescribing provider is not an existing prescribing provider for that location.

IIS Registry:

- ✓ View that the 'Prescribing Provider' field gets disabled while viewing an appointment that is sent to IIS in the VA flow.

New My Turn Users and Clinic Managers will be able to:

CAIR Quick Entry:

- ✓ View new prescribing provider-related dropdowns while uploading the IIS records via the Inline / CSV Bulk-upload flow.
- ✓ View an error message when:
 - A number is entered in the 'Prescribing Provider First Name,' 'Prescribing Provider Middle Name,' or 'Prescribing Provider Last Name' fields.
 - The entered email address in the 'Prescribing Provider Email' field is not in the correct format, such as 'name@example.com' or 'name@example.ca.gov'.
 - The entered NPI ID in the 'Prescribing Provider NPI' field is invalid or does not consist of 10 digits.

My Turn – Known Issues and Workarounds

Known Issues

Greyed Out Pre-Screening Questions if Accessing Certain Appointments through the 'Additional Appointments' Pop-Up Window

- ✓ If navigating to an appointment that only has one product (traditional or Super clinic appointment with one product) via the 'Additional appointments' pop-up window, the pre-screening questions are greyed out.

Prescribing Provider Required in CAIR for Vaccine Record Submissions

- ✓ CAIR now requires the Prescribing Provider to be specified for vaccine record submissions. Failure to specify one will result in a warning response from CAIR2. The Prescribing Provider data is currently not captured in My Turn.

Workaround / Next Steps

- ✓ Estimated Fix: **TBD**
 - ✓ Workaround: Access the appointment through the 'Appointments' tab.
- ✓ Estimated Fix: **Thursday, July 18, 2024**
 - ✓ Workaround: Fill in prescribing provider field directly in CAIR

My Turn – Survey

Question #1

Do you currently host public clinics that offer HIB and/or Rotavirus?

- Yes
- No
- N/A

Question #2

Do you need My Turn to support scheduling for HIB and Rotavirus Public clinics?

- Yes
- No
- N/A

NOTE: Public clinics in this case means open to the Public

- ✓ Organization Vaccine Coordinator
- ✓ Provider types updated to match PEAR

Current
July 18, 2024 (R48)

Release 48

VFC

- ✓ Flu allocations enhancements

VFA / 317 / VFC

- ✓ Address validation
- ✓ Storage and handling triaging
- ✓ Excursions data migration
- ✓ Next order due date and order frequency
- ✓ Expiration emails for orders
- ✓ Inventory link on provider ordering
- ✓ Ability to manage storage units from Program Location

All Programs

- ✓ Provider dashboards

Future
August 15, 2024 (R49)

Release 49

BAP

- ✓ Update programs to the 'Inactive' status
- ✓ Remove BAP references from the home pages

All Programs

- ✓ Enhance vaccine inventory management product selection
- ✓ Enable storage unit management page for providers
- ✓ Enable look up program by PIN on orders
- ✓ Add VFC regions to Accounts and Program Locations
- ✓ Clean up the Knowledge Center

What's Next in myCAvax? – Release 48 (1 of 2)

New updates for providers will launch on **Thursday, July 18, 2024!**

Providers

Release Highlights

Providers will be able to:

Transfers

- ✓ View the new 'Other' option in the 'What is the transport container type?' dropdown and the options in the 'Storage Unit' dropdown based on the chosen transport container.

Address Validation

- ✓ Update their address using the new 'Update Address' button on the location account or Program Location and get it verified by SmartyStreets.
- ✓ Receive email notifications if the address on the location account or Program Location has been changed (Organization and Primary Vaccine Coordinators only).

Excursions Triage

- ✓ View the new Triage feature that determines the action the provider should take and filter the Excursions by triage results.

Dashboards

- ✓ View the dashboards for different programs.

What's Next in myCAvax? – Release 48 (2 of 2)

New updates for providers will launch on **Thursday, July 18, 2024!**

Release Highlights

Providers enrolled in the VFA / VFC / LHD 317 program will be able to:

Order Expiration Emails

- ✓ Receive email notifications for an expiring order in the 'Draft' or 'Corrections Needed' status after 7 / 12 days from the last modified date.

Ordering

- ✓ View details about the next order due date, practice volume and order frequency, and a link to view provider inventory.
- ✓ View the value in the 'Recommended order size' column based on the doses administered and order frequency.

Program Location

- ✓ View updated page layouts on Program Locations.

Providers enrolled in the VFC program will be able to:

VFC Allocations

- ✓ View a warning message to request doses within their allocation limit or to provide a justification if the number of doses requested exceeds the allocation while ordering vaccines.

Enrollment

- ✓ Edit blank fields while updating the vaccines stored in an existing storage unit.
- ✓ View a privacy policy note about entering only business contact information on the recertification and enrollment flows.

myCAvax R48: Storage and Handling Triaging Feature

Providers will be able to view the **new Triage feature** while reporting temperature Excursions in myCAvax.

- Triaging determines what action the provider must take based on the storage units involved, the minimum and maximum temperatures during the Excursion, and the duration of the Excursion.
- Providers will see one of the following three warning messages on the screen upon entering the Excursion information.

Based on the information provided, it has been determined that the reported incident needs to be reported to the vaccine manufacturers to obtain sustainability information - [Manufacturer Contact Information](#).

Based on the information provided, no further action is needed at this time and you may continue vaccination services. Click Submit to document the excursion.

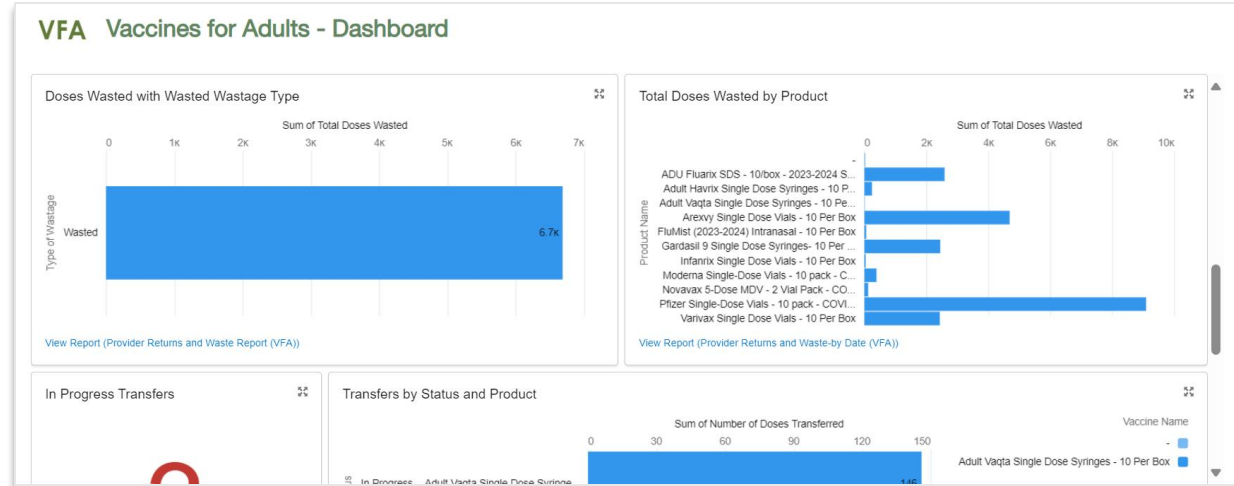

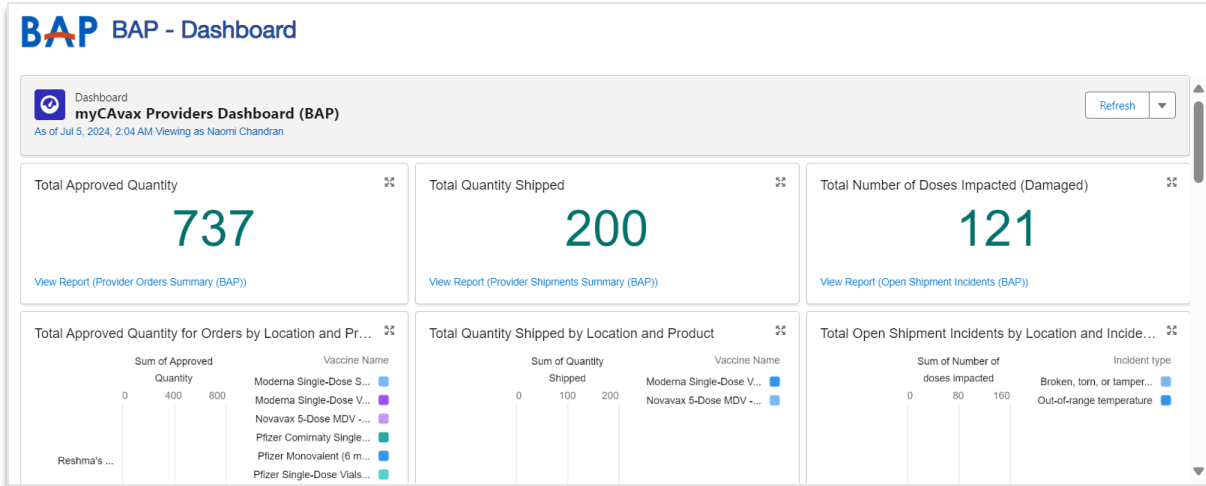

Based on the information provided, do not use the vaccines and label them as 'Do not use'. Continue to store and monitor the vaccines. CDPH will be contacting you regarding next steps.

myCAvax R48: Dashboards Feature

Providers will be able to view **dashboards for different programs** by selecting the 'myCAvax Dashboard' option from the 'More' dropdown on the navigation bar.

- The dashboards present a collection of various reports displaying assorted information on a central topic.
- Providers will be able to only view data related to the locations they manage.

PCC & VFC Customer Service Center Call Drivers

1. Inventory

- To ensure the **doses administered** and **doses in inventory** are accurate, providers should:
 - Use the Inventory Summary columns in the myCAVax order form to find Estimated Inventory and Variance quantities.

2. Order Status

- View the **status of your vaccine order** requests at anytime in myCAVax. By clicking the unique **Order Number**, view related details and review specific vaccine products ordered.
- If the status of your order is in '**Corrections Needed**', remember to review the notes CSR added when sending the order back for corrections, double check the information provided in doses used / inventory, etc.) to see what information might be missing in the order.
- New '**Order size reason**' **column** – As a reminder, providers need to provide a reason for each vaccine they're ordering above the 'Recommended Order size' field quantity. This is a change compared to what they would previously do in a MyVFCVaccines order, which was only entering one reason in the 'Comments' section of the order.

3. myCAVax – Password Reset / Locked User

4. myCAVax Account and Organization Modifications

5. Technical Support

6. Vaccine Management – Storage / Handling / Receiving

myCAvax Printing Tips

To print the screen:

1. Take a screenshot of the required portion of the screen using either the 'print screen / prt scr' button or the 'Windows + Shift + S' buttons on your keyboard.
2. Open a Word document and paste the captured screenshot.
3. Press the 'Ctrl + P' buttons to open the print dialog box.
4. Select your printer and adjust any settings as needed.
5. Click the 'Print' button to print the screenshot.

To print a page:

1. Navigate to the page you want to print and press the 'Ctrl + P' buttons to open the print dialog box. Alternatively, click the menu in the top right corner of your browser and select the 'Print' option.
2. Select the 'Save as PDF' option if you want to save the page as a PDF.
3. Select your printer and adjust any settings as needed.
4. Click the 'Print' button to print the page.

**The above instructions are for Windows OS.*

Accessing the VFC Program in myCAvax as a Brand-New Provider

Primary and Backup Vaccine Coordinators should have activated their accounts using the links in the welcome email from no-reply-mycavax@cdph.ca.gov. As a VFC provider, it is important to be ready to order and properly manage VFC vaccines in myCAvax to better serve the VFC community.

As soon as you log in to the Provider Community portal with the login credentials, you will see the 'Vaccines for Children - Home' page.

Accessing the VFC Program in myCAvax as an Existing Provider

Primary and Backup Vaccine Coordinators should have received system access automatically, based on the information provided in MyVFCvaccines.

As soon as you log in to the Provider Community portal, you will see the 'Vaccines for Children' tile added to your landing page along with the other existing program tiles.

Reminder: Return Flu Vaccines and Report in myCAvax

Expired SGF and VFC supplied vaccines must be returned to McKesson and reported in myCAvax.

Remove the expired doses from your storage unit immediately.

DO NOT return any expired privately purchased vaccine doses, broken vials or syringes, or open multi-dose vials.

Record a Returns and Waste event in myCAvax. You can select the 'Email' or 'Mail' return label shipping method while recording a Returns and Waste event.

Return shipping labels are only valid for 30 days; ensure expired flu doses are returned to McKesson as soon as possible.

Place all the return labels inside the box if there are multiple.

Viewing Support Resources

The screenshot shows the EZIZ website with a navigation menu on the left and a main content area. The main content area features a banner for 'myCAvax California Vaccine Management System' and a section titled 'VFC vaccine ordering moved to myCAvax on June 10, 2024!'. Below this, there is a 'Starting June 10, log in to myCAvax!' section with a list of instructions for existing users and a 'Recorded Trainings and FAQs' section with a list of training sessions.

Frequently Asked Questions

Move to myCAvax

myCAvax
California Vaccine Management System

VFC vaccine ordering moved to myCAvax on June 10, 2024!

The Vaccines for Children (VFC) Program moved its vaccine ordering and provider management system to myCAvax, on June 10, 2024. Use myCAvax to view/submit vaccine orders and report transfers, waste, returns, temperature excursions and shipping incidents!

Reminder: The following ordering policies/procedures remain the same:

- Report doses administered and on hand inventory on each order
- Timeframes for order submission and order processing will not change
- Vaccine Coordinators receive email confirmations once orders are approved and are being filled by McKesson or directly (Merck/Pfizer)
- Provider can request shipping labels for returning doses

Starting June 10, log in to myCAvax!

Primary and backup vaccine coordinator will receive a myCAvax welcome email on June 10, 2024, which will ask them to finish setting up their myCAvax account. (Unique login credentials will be created using Vaccine Coordinators information from MyVFCvaccines).

- Log in to myCAvax to familiarize yourself with all VFC functions now available!
- Submit vaccine orders in myCAvax!
- Attend Office hours as needed.
 - Note: Existing myCAvax users will see a new VFC Program tile upon logging in. Access all the new VFC functions available to you there.

For existing myCAvax users:
The VFC program will be added to your account on June 10, 2024.

- Update storage units as soon as possible in myCAvax. Make a new storage unit and indicate that VFC vaccines are stored in it OR add the VFC Program to the storage unit accordingly (if your VFC vaccine is stored in a storage unit already tracked in myCAvax). For more information on updating/adding storage units, view the Managing myCAvax Provider Accounts Job aid on the Knowledge Center (myCAvax login required).

All Vaccine Coordinators will be able to complete the following VFC activities for their VFC locations:

- View and place orders
- View and place transfers
- View and report waste or returns
- Report shipping incidents

If an additional Vaccine Coordinator needs to be added to your account to complete the above activities, please fill out this online form: [Additional Vaccine Coordinator Request Form](#).

Recorded Trainings and FAQs:

All VFC providers should attend the following trainings. Multiple sessions will be offered for each training. Please see the registration links provided below to sign up for available sessions.

- Getting Started with myCAvax for Brand New Users | FAQ
 - Wednesday May 22, 2024, from 10:00-10:30am | Recording and deck
 - Wednesday May 29, 2024, from 9:00-9:30am | Recording and deck
 - Tuesday June 4, 2024, from 12:30-1:00pm | Recording and deck
 - Friday June 7, 2024, from 11:30am-12:00pm | Recording and deck
 - Zoom registration link

The screenshot shows a document titled 'VFC Provider Training FAQs v.2_06.03.24'. The document is a table of contents for a support resource. It lists various topics and their corresponding page numbers.

For Program and Policy needs, you can contact the VFC Customer Service Center at (877) 243-8832 or via email to MyVFCVaccines@cdph.ca.gov.

For myCAvax Technical Support, contact the Provider Call Center by calling the VFC Customer Service Center and selecting option 9 on the phone tree, or via email to myCAvax.HD@cdph.ca.gov.

myCAVax – Known Issues and Workarounds (1 of 3)

Known Issues

VFC Orders for COVID-19 Products

- ✓ Some VFC providers who placed an order request that contains a COVID-19 vaccine, may receive multiple email messages, one for each individual order line item in addition to the email notification for the entire batch of orders. We are actively working on a fix, but you may experience the issue again if you submit an order prior to the estimated fix date of **Thursday, July 18, 2024**.

Workaround / Next Steps

- ✓ Estimated Fix: **Thursday, July 18, 2024**
- ✓ If this happens to you, please make note of the first email titled 'Important Notice: Your [Location Account Name] - Vaccines for Children order has been approved!' and ignore all the subsequent emails titled 'Vaccines for Children Vaccine requests Processed.'

	myCAVax ... Vaccines for Children Vaccine requests Processed CAUTION: External email. Be cautious with links and attachments.

myCAvax – Known Issues and Workarounds (3 of 3)

Known Issues

VFC-Only Providers Unable to See Alerts under the 'myCAvax Program Messages' Section

- ✓ We are currently investigating why some users who are only staffed on their location's VFC program are unable to see alerts under the 'myCAvax Program Messages' section on their home page.

VFC-Only Providers Unable to See Transfers from the Related List Views of their VFC Program Locations

- ✓ We are working on a fix to make sure users, who are only staffed on their location's VFC program, can view their 'Transfers Received' and 'Transfers Sent' records from their VFC Program Location record's 'Related' tab.

Workaround / Next Steps

- ✓ Estimated Fix: **Thursday, July 18, 2024**

- ✓ Estimated Fix: **Thursday, July 18, 2024**

- ✓ For the time being this Transfer information can be found on the provider location account related list view. You can navigate from your VFC Program Location into the provider location account by clicking the 'Account Name' field.
