

Welcome to the California COVID-19 Vaccination Program Multi-County Entities Updates

Wednesday, July 20, 2022

Q&A and Discussion

During today's session, please use the chat panel or use the raise your hand feature to ask your questions.

Housekeeping

Reminder! Please mute yourself when not speaking to avoid feedback and background noise.

Please introduce yourself by adding your name, role and organization into the chat.

This session is being recorded. Slides and recording will be available on <https://eziz.org/covid/education/>

Agenda: Wednesday, July 20, 2022

No.	Item	Speaker	Time (AM)
1	Welcome & Announcements	Leslie Amani (Moderator)	9:00 – 9:05
2	Therapeutics Update	Alan Hendrickson (CDPH)	9:05 – 9:10
3	COVID-19 Vaccine Clinical Update and Poll	Lily Horng, M.D. (CDPH)	9:10 – 9:20
4	COVID-19 Vaccine Storage & Handling Update	Kate McHugh (CDPH)	9:20 – 9:25
5	COVID-19 Vaccine Management	Maria Volk (CDPH)	9:25 – 9:35
Q&A and Discussion			9:35 – 9:55
6	Wrap-up & Resources	Leslie Amani (Moderator)	9:55 – 10:00

Announcements

Leslie Amani, CDPH

For Discussion

Data question:

- What is your estimated population of Under 5-years-old in your health system catchment?

Operations questions:

- How are you integrating COVID-19 immunizations into routine primary care for pediatrics, especially Under 5-years-old?
- What are barriers to integrating COVID-19 immunizations into routine primary care for pediatrics, especially Under 5-years-old?

VA58 Bi-weekly Information Digest

This briefing will help you keep up with campaign information.

Digests are released every two weeks and are organized around a specific theme with a focus on actionable insights.

Issue #6 link: [Parent Education: Part 1](#)

Discusses:

- What we all should know about the new vaccines for kids under 5.
- Why vaccines are important for this age group.
- Talking points and tips to better engage with parents.

Updated Talking Points and Test to Treat

Tips for Talking About COVID-19 English & Spanish

Test to Treat English & Spanish

CONSEJOS PARA HABLAR CON PERSONAS SOBRE LA VACUNA CONTRA EL COVID-19

¿Ya te vacunaste contra el COVID-19? O si ya lo hiciste, ¿cómo te sientes? Si estás vacunado, regresa a la normalidad.

La vacuna se ha convertido en parte de nuestras conversaciones diarias. Si bien se puede sentir la necesidad de identificar a las personas a su alrededor por su propia seguridad.

HABLANDO CON TUS AMIGOS

La mejor manera de hablar con tus amigos es compartir tu experiencia con la vacuna contra el COVID-19. Es importante contar tu propia historia. Puedes compartir:

- Por qué decidiste vacunarte
- Qué es lo que significa para ti, incluyendo la protección de los miembros de tu familia y comunidad
- Cómo fue tu experiencia (¿te dolió? ¿tuviste efectos secundarios?)

EL SER UN EXPERTO... O NO

Solo porque estás vacunado, no significa que seas un experto en COVID-19 o la vacunación, y tampoco debes sentirte la gente te pregunta - o a debatir contigo - acerca de los detalles de la vacuna o el virus, puedes decirles:

- "Yo no soy un experto, pero aquí es donde obtuve mi información..."
- "Yo no puedo contestar todas tus preguntas, pero si visitas COVID19.ca.gov, hay buena información ahí."
- "Yo solo describo mi experiencia, pero si quieres saber más, habla con tu doctor."

TIPS FOR TALKING TO OTHERS ABOUT YOUR COVID-19 VACCINE

Got your COVID-19 vaccine? Great! The more people vaccinated against COVID-19, the quicker we can return to normal life.

The vaccine has become a part of our daily conversations. While it may feel odd when others ask if you're vaccinated, many people feel the need to identify vaccinated people around them for their own safety.

TALKING TO YOUR FRIENDS

The best way to talk to your friends about your COVID-19 vaccine experience is simply to tell your own story. You can share:

- Why you got your vaccine
- What it means to you, including protecting family members and the community
- What your experience was like (Did it hurt? Did you have side effects?)

BEING AN EXPERT ... NOT

Just because you are vaccinated, it does not mean you are an expert on COVID-19 or the vaccination - and you don't need to be! If people ask you (or want to debate with you) about vaccine details or the virus, you can tell them:

- "I'm not an expert, but here's where I got my information..."
- "I can't answer all your questions, but if you visit COVID19.ca.gov, there's good information there."
- "I can only describe my experience, but if you want to know more, talk to your doctor."

GUARDIAN PERMISSION

Those under age 18 in California need guardian permission to get the COVID-19 vaccine. Some guardians won't allow their children to get the COVID-19 vaccine due to a lack of trust in vaccines or worry about the COVID-19 vaccine specifically. You can tell a friend who is trying to convince their guardians:

- Provide resources that your own guardians used to make the decision to get you vaccinated.
- Suggest that they:
 - 1) listen to their guardian's concerns
 - 2) share their personal feelings on why they want the vaccine
 - 3) share factual information on the vaccine (check cdc.gov or COVID19.ca.gov)
- Offer to have your guardians talk to their guardians.
- Provide positive support - your friends may not be able to be vaccinated, so be sure you encourage them to wear masks and wash their hands regularly. It's hard to have disagreements with our guardians, and these can lead to stress and pain.

RESOURCES

Here are some resources you or your friends can use:

- Your doctor
- VaxTeen.org
- CDC.gov
- COVID19.ca.gov
- myturn.ca.gov

To schedule your vaccine, visit [MyTurn.ca.gov](https://myturn.ca.gov) or call (833) 422-4255

COVID-19 TEST TO TREAT

WHERE CAN I GET TREATED?

Visit <https://covid-19-test-to-treat-locator-dhhs.hub.arcgis.com/>

WHAT IS TEST TO TREAT?

"One-Stop Test to Treat" provides faster, easier access to COVID-19 treatments. You can receive a prescription at one location.

WHAT TREATMENTS ARE AVAILABLE?

COVID-19 treatments include two oral pills - Pfizer's Paxlovid and Merck's Lagevrio (molnupiravir) - that can help prevent illness and hospitalization when taken soon after symptom onset. To be eligible, you must be positive and have symptoms that started five days or fewer. You must also be at risk of developing severe COVID-19.

PRUEBA PARA TRATAR

¿DÓNDE PUEDO RECIBIR TRATAMIENTO?

Visita <https://covid-19-test-to-treat-locator-dhhs.hub.arcgis.com/>

Llama al 1-800-232-0233 para encontrar un sitio de Prueba para Tratar cerca de ti para hacerte la prueba y recibir tratamiento.

¿QUÉ ES PRUEBA PARA TRATAR?

Los sitios de "One-Stop Test to Treat" brindan un acceso más rápido y fácil a los tratamientos COVID-19 que salvan vidas. Comienza por hacerte la prueba de COVID-19. Si la prueba da positivo, puedes recibir y surtir tu receta con ayuda de un proveedor de cuidado de salud, todo en un solo lugar.

¿QUÉ TRATAMIENTOS ESTÁN DISPONIBLES?

Las opciones de tratamiento de COVID-19 incluyen dos pastillas antivirales orales, Paxlovid de Pfizer y Lagevrio de Merck (molnupiravir), que pueden ayudar a prevenir enfermedades severas y hospitalización cuando se toman poco después del inicio de los síntomas. Para ser elegible, debes dar positivo y tener menos de seis días con síntomas. También debes tener un mayor riesgo de desarrollar COVID-19 severo.

What is Long COVID?

Long COVID is defined as the presence of a wide range of new, returning, or ongoing health problems experienced by people 4 or more weeks after first being infected with COVID-19 and can remain for 6 months or more.

Many people living with the disease were previously fit & healthy.

Children experience long COVID symptoms similar to adults.

Long COVID can affect people who have experienced mild, severe or even symptom-free COVID-19 infections.

Most common symptoms persisting 6 months

extreme exhaustion (fatigue)	chest pain or tightness
problems with memory and concentration (brain fog)	dizziness
	joint or muscle pain
	rashes
	depression and anxiety
	difficulty sleeping (insomnia)

Other common symptoms

- high temperature, cough, headaches, sore throat, changes to sense of smell or taste
- ringing ears, earaches
- feeling sick, diarrhea, stomach aches, loss of appetite
- shortness of breath
- fast heart rate or palpitations

Ready to get your child vaccinated?

Please discuss any lingering questions or concerns about the vaccine with your child's pediatrician. Visit myturn.ca.gov or call 1(833) 422-4255 to find a vaccination location near you.

Long COVID in Kids

Covid -19 Risk Comparison for teens (12 years+)

Not getting vaccinated.	VS	Getting vaccinated.
Risk of serious illness, hospitalization & death from COVID-19.		Small risk of serious, rare vaccine side effects including myocarditis and pericarditis (TREATABLE heart problems) - after mRNA COVID-19 vaccination.
Risk of serious illness, hospitalization & death from COVID-19 virus variants like Delta		Choosing NOT to vaccinate teens against COVID-19 is the riskier choice. <p>Visit myturn.ca.gov to find a vaccination location near you or call 1(833)422-4255.</p>
Risk of "Long COVID" - a wide range of new/ ongoing health problems that starts approx. 4-5 weeks AFTER COVID-19 infection.		
Risk of Multisystem Inflammatory Syndrome in Children (MIS-C) caused by COVID-19.		

Vaccinate ALL 58

Risk Comparison for Teens

COVID-19 Risk Comparison for youth (5-11 years)

Not getting vaccinated youth (5-11 years)	VS	Getting Vaccinated youth (5-11 years)
Risk of serious illness, hospitalization & death from COVID-19.		The side effects of the vaccine are usually mild and can include: <ul style="list-style-type: none"> soreness tiredness headache chills nausea vomiting fever
Risk of "Long COVID"- a wide range of new/ ongoing health problems that starts approx. 4-5 weeks AFTER COVID-19 infection.		Children may need to take a day or two off from school/ activities to recover from the side effects.
Risk of Multisystem Inflammatory Syndrome in Children (MIS-C) caused by COVID-19.		Millions of youth (5-11 years) have been vaccinated safely <p>1.4 MILLION 40 % California</p> <p>9.9 MILLION 35 % United States</p> <p>Data as of 5/4/22</p>
Fever PLUS 1+ of the following: <ul style="list-style-type: none"> Stomach pain Bloodshot eyes Diarrhea Dizziness or lightheadedness Skin rash Vomiting 		Choosing NOT to vaccinate youth against COVID-19 is the riskier choice.

Vaccine Timing Guide: Pediatric/Adolescent/Adult

COVID-19 Vaccine Timing–Pediatric			
Routine Schedule			
Age	Vaccine	Primary Doses	Booster Dose
6 months–4 years	Pfizer–Infant/Toddler	1st Dose → 3–8 weeks* → 2nd Dose → ≥8 weeks → 3rd Dose	
6 months–5 years	Moderna–Infant/Toddler	1st Dose → 4–8 weeks* → 2nd Dose	
5–11 years	Pfizer–Pediatric	1st Dose → 3–8 weeks* → 2nd Dose → ≥5 months → Booster	
6–11 years	Moderna–Pediatric	1st Dose → 4–8 weeks* → 2nd Dose	
Schedule if Moderately or Severely Immunocompromised			
Age	Vaccine	Primary Doses	Booster Dose
6 months–4 years	Pfizer–Infant/Toddler	1st Dose → 3 weeks → 2nd Dose → ≥8 weeks → 3rd Dose	
6 months–5 years	Moderna–Infant/Toddler	1st Dose → 4 weeks → 2nd Dose → ≥4 weeks → 3rd Dose	
5–11 years	Pfizer–Pediatric	1st Dose → 3 weeks → 2nd Dose → ≥4 weeks → 3rd Dose → ≥3 months → Booster	
6–11 years	Moderna–Pediatric	1st Dose → 4 weeks → 2nd Dose → ≥4 weeks → 3rd Dose	

^ An 8-week interval may be preferable for some people, especially for males 12–39 years.
 View [Interim Clinical Considerations for Use of COVID-19 Vaccines](#) for details. Schedule is subject to change.

California COVID-19 Vaccination Program IMM-1396 (6/28/22) Page 1 of 3

COVID-19 Vaccine Timing–Adolescent/Adult			
Routine Schedule			
Age	Vaccine	Primary Doses	Booster Doses
12–17	Moderna–Adol/Adult	1st Dose → 4–8 weeks* → 2nd Dose	
12+	Pfizer/Adol/Adult	1st Dose → 3–8 weeks* → 2nd Dose → ≥5 months → 1st Booster	Ages 12–17: Pfizer Ages 50+: Moderna/Pfizer
18+	Moderna–Adol/Adult	1st Dose → 4–8 weeks* → 2nd Dose → ≥5 months → 1st Booster	18+: Moderna/ Pfizer (mRNA preferred) or J&J* ≥4 months → 2nd Booster 18–49: Not currently recommended. (If received J&J for primary and 1st booster, may consider receiving a 2nd booster of mRNA vaccine.)
18+	Janssen (J&J) Pfizer/Moderna preferred*	1st Dose → ≥2 months → 1st Booster	18–49: Not currently recommended. (If received J&J for primary and 1st booster, may consider receiving a 2nd booster of mRNA vaccine.)

^ An 8-week interval may be preferable for some people, especially for males 12–39 years.
 * Although use of mRNA COVID-19 vaccines is preferred, the Janssen vaccine may be offered in [some situations](#).
 View [Interim Clinical Considerations for Use of COVID-19 Vaccines](#) for details. Schedule is subject to change.

Moderna COVID-19 Vaccines/mRNA 6 Mos.- 17 Yrs.

 State of California—Health and Human Services Agency
California Department of Public Health

 **GAVIN NEWSOM**
Governor

July 8, 2022 IZB-FY-22-23-01

TO: California Providers of Pediatric Services

FROM: Robert Schechter, M.D., Chief 
Center for Infectious Diseases
Division of Communicable Disease Control, Immunization Branch

SUBJECT: Moderna COVID-19 Vaccines, mRNA for children 6 months through 17 years: Preliminary information

HIGHLIGHTS

- Moderna COVID-19 Vaccine is recommended for children 6 months through 17 years of age as a two-dose primary series at varying doses according to age span, given 4-8 weeks apart ([CDPH COVID-19 Vaccine Timing](#)). The vaccine is also authorized for administration of an additional dose at least 4 weeks following the second dose to individuals 6 months through 17 years of age with certain kinds of immunocompromise.
- The vaccines for the pediatric age groups are supplied in multiple dose vials with different colored caps and label borders, depending on the age group ([CDPH COVID-19 Vaccine Product Guide](#)). Formulations for age groups should not be used interchangeably.
- Under initial standards, unopened vials may be stored frozen between -50°C to -15°C (-58°F to 5°F) until the published expiration date or for up to 30 days at 2°C to 8°C (36°F to 46°F) prior to first use.
- The information sheet about the V-safe smartphone safety monitoring system should be provided to parent/guardians, who should be encouraged to participate.
- This letter is intended to provide information common to all formulations of pediatric Moderna COVID-19 vaccine, as well as point out age-specific differences, and links to CDC, CDPH, FDA, and other resources.

Responding to Administration Errors

California COVID-19 Vaccination Program

Incorporate [this administration checklist](#) into practice protocols to help ensure your patients receive sufficient protection after vaccination and to minimize revaccination efforts due to administration errors.

Instructions

Follow these instructions to respond to administration errors following CDC requirements.

Step	Description
1.	Inform the recipient of the vaccine administration error.
2.	Refer to CDC's Interim Clinical Considerations (Appendix C) to determine whether revaccination may be recommended. Contact the manufacturer for any questions. <ul style="list-style-type: none">• Moderna: 1-866-MODERNA (1-866-663-3762)• Pfizer: Call 800-438-1985• Janssen: 1-800-Janssen (1-800-526-7736)
3.	Contact your local CAIR2/RIDE representative to determine how the dose should be entered into the CAIR, both as an administered dose and to account for inventory.
4.	Report all COVID-19 vaccine administration errors to VAERS—even those not associated with an adverse event. <ul style="list-style-type: none">• To file an electronic report, please see the VAERS website.• Reporting to VERP is not required but strongly encouraged to help prevent future errors or patient harm.
5.	Determine how the error occurred and implement strategies (e.g., education/training) to prevent it from happening again. Tip. Use this guidance to prevent administration errors from occurring again.

Audience:

Providers and immunization staff

Session Topics Include:

- New vaccine presentation (**Maroon Cap**) for individuals 6 months through 4 years of age** (Starting June 7)
- FDA approvals, authorizations - including recent authorizations
- **Gray Cap**, Comirnaty®
- Use of each vaccine presentation, including storage, handling, preparation, and administration

Therapeutics Update

Alan Hendrickson, CDPH

Therapeutics (Tx) Update

Equity

- [CDC MMWR](#) and CDPH analysis of Test-to-Treat sites in CA show equity gaps in high vulnerability zip codes
- Fewer courses of Paxlovid administered by providers located in Q1/Q2 areas

Regulatory

- FDA authorized pharmacists to prescribe Paxlovid w/ limitations
- Waiver that allows dispensing at Optum Serve sites extended to Dec 2022
- Pfizer applied for full approval of Paxlovid last week

Clinical

- FDA issued re-dosing information for Evusheld. At 6 months, patients should receive 300mg tixagevimab + 300 mg cilgavimab (i.e., 2 Evusheld prepackaged doses)

All Active Test-to-Treat Providers by HPI Q

Therapeutics (Tx) Updates

Resources

- [Test-to-Treat Playbook](#)
- DHCS and DMHC All Plan Letters
- Weekly Tx webinar for LHDs at 11 AM on Tuesdays, email CDPHTherapeutics@cdph.ca.gov to sign up
- Coming soon: Pharmacy COVID-19 therapeutics resource toolkit

Programmatic

- \$158M in FY22-23 budget for therapeutics to include:
 - Grants to safety net system to facilitate access to therapeutics, including test-to-treat
 - Public media campaign
 - State test-to-treat sites (Optum Serve)

CDPH COVID-19 Treatments: Questions and Answers

NEW

Includes resource links and answers to:

- What are COVID-19 treatments?
- What treatments are available?
- How can I get treatments?
- Do treatments replace COVID-19 vaccine?
- How much do treatments cost?

California Department of Public Health
COVID-19 Treatments

What are COVID-19 treatments?

COVID-19 treatments are medications (pills, shots, or IV) that can prevent serious symptoms and the need for hospital care after COVID-19 symptoms start.

A health care provider can tell you if you are eligible to receive treatment and which type would work best for you.

You can get treatments if you:

- Test positive for COVID-19 (get tested by your health care provider, at a Test to Treat site, pharmacy, or use an at-home test), AND
- Are more likely to get very sick (older than 50, unvaccinated, or have [certain medical conditions](#)*).

Treatments are available for both adults and children who qualify.

The sooner the better

Act quickly: Treatment must be started within days after you first develop symptoms to be effective.

How can I get treatments?

Option A: Contact your health care provider.

- If you have COVID-19 symptoms, a health care provider can help you get tested and get a prescription for a treatment. You can then go to a pharmacy to receive your medication.
- If you do not have a health care provider, call 1-877-332-6585 to find out who to talk with about your symptoms and treatment.

Option B: Go to a Test to Treat location.

- If you have COVID-19 symptoms, you can get tested, get a prescription, and receive medication – all in one place at a Test to Treat site.
- Find a location using the [Test to Treat locator](#). You can also call 1-800-232-0233 (TTY 1-888-720-7489).

What treatments are available?

There are different types of treatments. A health care provider or a Test to Treat location will tell you which treatment will be safest and work best for you. Treatments come in several forms including pills, IV, or shots.

Clinical Update

Lily Horng, M.D., CDPH

New CDC/ACIP Influenza Vaccine Recommendation

CDC director approved influenza vaccine recommendations by ACIP* in June 22-23, 2022:

- Adults aged ≥ 65 years should preferentially receive one of the following influenza vaccines: quadrivalent high-dose inactivated influenza vaccine (HD-IIV4), quadrivalent recombinant influenza vaccine (RIV4), or quadrivalent adjuvanted inactivated influenza vaccine (aIIV4).
- If none of these three vaccines is available at an opportunity for vaccine administration, then any other age-appropriate influenza vaccine should be used.

*Advisory Committee on Immunization Practices

Pediatric COVID-19 Vaccine Updates

- FDA Emergency Use Authorization (EUA) given for
 - Pfizer: In children 6 months through 4 years
 - Moderna: In children 6 months through 5 years
 - Moderna: In children 6 years through 17 years
- FDA fully approved Biologics License Application (BLA) for Pfizer-BioNTech COVID-19 vaccine (Comirnaty) for 12-15-years-old.

MMWR*: COVID-19 Vaccine Provider Availability & Vaccination Coverage for Children 5 through 11 Years Old

- U.S. county-level vaccine data 11/2021-4/2022
- 87.5% of counties had at least one active vaccine provider
 - Approximately half did not have a pediatric clinic, family medicine clinic, or FQHC
 - Most had at least one pharmacy or public health clinic
- Vaccination for 5-11-years-old was higher in counties with at least one active vaccine provider

*Morbidity and Mortality Weekly Report

Personal Doctors: Most Trusted for COVID-19 Information

- Percent of adults who say they have a **great deal** or a **fair amount** of trust in the following to provide reliable information about COVID-19 vaccines:

*Among those who are parents or guardians of children under 18. **Among those who are employed and not self-employed. ***Among those who are insured.

The survey was conducted April 13-26, 2022, among a nationally representative random digit dial telephone sample of 1,889 adults ages 18 and older.

KFF COVID-19 Vaccine Monitor (April 13-26, 2022). <https://www.kff.org/coronavirus-covid-19/poll-finding/kff-covid-19-vaccine-monitor-april-2022/> Accessed July 7, 2022

Novavax COVID-19 Vaccine Updates

- On 7/13/22, FDA Authorized Emergency Use of Novavax COVID-19 Vaccine as a 2-dose primary series in ≥ 18 years old.
- On 7/19/22, ACIP and CDC recommend Novavax for adults.
- On 7/19/22, Western States Scientific Safety Review Workgroup met to discuss Novavax.
- U.S. government is purchasing >3 million doses for distribution.

Novavax (NVX-Co2373)

- Novavax (NVX-Co2373) contains the SARS-CoV-2 recombinant spike protein and Matrix-M adjuvant.
- Granted Emergency Use Listing (EUL) by the WHO in December 2021, in 39 countries

GRADE Evidence

- Novavax phase III randomized controlled trial (RCT) (Dunkle 2022, additional data obtained from manufacturer)
- Persons ages ≥ 18 years in the United States and Mexico
- Data evaluated: Data cut-off September 27, 2021; median follow-up: 2.5 months
 - Study enrollment and efficacy follow-up occurred during December 27, 2020, to September 27, 2021, and mainly when the Alpha variant of SARS-CoV-2 was predominant
- Full analysis set: 19,963 vaccine; 9,982 placebo
- Per-protocol set: 17,272 vaccine, 8,385 placebo
 - No immunologic or virologic evidence of prior SARS-CoV-2 infection, no major protocol deviations

Outcome 1: Symptomatic Lab-confirmed COVID-19

Studies with Unvaccinated Comparator (n=1)

Population	Events/Vaccine ^a (n/N)	Events/Placebo ^a (n/N)	Vaccine efficacy (95% CI)
Primary Outcome ^b			
Ages ≥18 years	17/17272	79/8385	89.6% (82.4%, 93.8%)
Ages 18–64 years	15/15228	75/7417	90.3% (83.1%, 94.4%)
Ages ≥65 years	2/2044	4/968	76.3% (-29.1%, 95.7%)
Any comorbidity ^c (18–64 years)	6/6957	38/3451	92.2% (81.5%, 96.7%)
Any comorbidity ^c (≥65 years)	1/1125	3/580	82.8% (-64.9%, 98.2%)

a. 19,963 and 9,982 persons were randomized to vaccine and placebo

b. Cases diagnosed ≥7 days post dose 2 among persons without evidence of prior SARS-CoV-2 infection

c. Comorbidities: obesity, chronic kidney disease, chronic lung disease, cardiovascular disease, diabetes mellitus type 2

CI: confidence interval

Adverse Reactions

- Most frequently reported solicited local adverse events were tenderness and injection-site pain.
- Most common solicited systemic adverse events were headache, myalgia, fatigue, and malaise.
- Severe local reactions (grade ≥ 3) were infrequent.
- Frequency of serious adverse events were similar in groups receiving vaccine (1.0%) and placebo (1.1%).

Summary: Cases of Myocarditis and/or Pericarditis Following Novavax Vaccination, Doses Administered & Reporting Rates

Setting	Cases	Doses administered	Reporting rate** (cases/million doses administered)
Novavax COVID-19 Vaccine clinical trials ¹	4–6*	41,546	96–144
Sponsor submission of post-marketing reports in Australia, Canada, EU, New Zealand & South Korea ²	36	744,235	48
Australia post-marketing reports ³	15	160,000	94

¹ Total expanded safety population approximated from FDA EUA [Novavax Letter of Authorization](#) July 13, 2022: Study 1 = 26,151; Study 2 ≈ 10,800; Study 3 + 4 ≈ 5500. Precise denominators requested of the sponsor.

² Lee L. FDA review of effectiveness and safety of Novavax COVID-19 vaccine in adults ≥18 years of age. June 7, 2022. <https://www.fda.gov/media/159004/download>.

³ <https://www.tga.gov.au/periodic/covid-19-vaccine-safety-report-30-06-2022#section-1865>. Of these 15 cases reported in Australia, 3 were likely to represent myocarditis; 12 were likely to represent pericarditis.

*Includes a 16-year-old vaccine recipient from the adolescent safety data set; 4 = cases in temporal relationship without alternative etiology, 5 = cases in temporal relationship, with or without alternative etiology, 6 = all cases in vaccine recipients in clinical trials, regardless of temporal relationship or alternative etiology

**Reporting rate calculated as: (# cases)/(# doses administered*1,000,000)

Summary of GRADE

Outcome	Importance	Design (# of studies)	Findings	Evidence Type
Benefits				
Symptomatic lab-confirmed COVID-19	Critical	RCT (1)	Novavax COVID-19 vaccine is effective in preventing symptomatic COVID-19 during a period of Alpha variant predominance	1
Hospitalization due to COVID-19	Critical	RCT (1)	Severe COVID-19 evaluated as a surrogate for this critical outcome. Novavax COVID-19 vaccine is effective in preventing severe COVID-19.	3
Death due to COVID-19	Important	RCT (1)	No events occurred in the study included in the review of evidence.	No events
Asymptomatic SARS-CoV-2 infection	Important	No studies	No systematically collected data on outcome not available in study included in the review of evidence.	No data
Harms				
Serious adverse events	Critical	RCT (1)	SAEs were balanced between vaccine and placebo arms.	1
Reactogenicity	Important	RCT (1)	Severe reactions were more common in vaccinated; any grade ≥ 3 reaction was reported by 16.3% of vaccinated vs. 4.0% of placebo group	1

Evidence type: 1=high; 2=moderate; 3=low; 4=very low

Vaccine Administration

- Adults \geq 18 years old
- 2-dose primary series, intramuscular injection
- 3-8-week interval between doses
- At this time, Novavax is not authorized for use as booster doses.

Poll: CDPH Appreciates Your Feedback!

1. Is there patient or provider demand for Novavax COVID-19 vaccine?

☐ Yes

☐ No

☐ N/A

2. Is your MCE interested in ordering Novavax?

☐ Yes

☐ No

☐ N/A

For Discussion

Data question:

- What is your estimated population of Under 5-years-old in your health system catchment?

Operations questions:

- How are you integrating COVID-19 immunizations into routine primary care for pediatrics, especially Under 5-years-old?
- What are barriers to integrating COVID-19 immunizations into routine primary care for pediatrics, especially Under 5-years-old?

Storage and Handling

Kate McHugh, CDPH

Novavax Storage and Handling

- 10 dose multi-dose vials
- Refrigerated storage (2°C to 8°C) until expiration date
 - Expiration date will not be printed on vial or carton
- Do not freeze
- Injection volume: 0.5 mL
- No diluent required
- Storage after puncture
 - Hold the vial between 2° to 25°C (36° to 77°F) for up to 6 hours
 - Discard the vial 6 hours after the first puncture
- EUA: [Novavax HCP Fact Sheet 07132022 \(fda.gov\)](#)

Single-Dose Vials

- Pfizer single-dose vials are likely coming this fall!
- Moderna may also be manufacturing single-dose vials.
- Single dose vials will be available for adults only, for the time being.
 - Due to the concentration of pediatric vaccines, it may not currently be possible for single-dose vials to be manufactured for pediatrics.
- CDPH will share more information as it is received.

Administration Errors

- Steps include:
 - Notifying patient
 - Refer to CDC's [revaccination information](#) to determine if revaccination is necessary
 - Contacting CAIR to determine how this dose should be entered
 - Reporting to VAERS (required)
 - Implement actions to determine why the error occurred and to ensure it does not happen again
- Manufacturers can help determine if vaccine was viable
 - Moderna: 1-866-MODERNA (1-866-663-3762)
 - Pfizer: Call 800-438-1985
 - Janssen: 1-800-Janssen (1-800-526-7736)
- CDPH clinical team: COVIDVaccineClinical@cdph.ca.gov

Vaccine Management

Maria Volk, CDPH

My Turn and myCAvax Office Hours Cadence Reminder

The My Turn and myCAvax office hour session has been moved to a bi-weekly cadence. The next session will be held on Monday, July 25th.

To register for the webinar, click [here](#).

My Turn Release 29 Overview

New updates for Clinic Managers and Vaccine Administrators will launch July 27th.

Public

- ✓ Removing flu – zero out flu vaccine supplies to remove nasal spray and flu shot tags
- ✓ In-home vaccination and transportation page updates to reflect guidance for under 5 patients
- ✓ [Delivery] Update error messaging for better user experience and accessibility
- ✓ [Continued] Failure Point Notification – setting up monitoring tools throughout system to flag (potential) issues

Clinic

- ✓ [SMS/Email] Opt-out on the Walk-In flow
- ✓ [Vaccine Inventory] Entering Lot Numbers correctly
- ✓ [CAIR2] Concatenate "Cross Street 1" and "Cross Street 2"

Monkeypox Vaccine & the My Turn Outbreaks Approach

With increased interest in expanding My Turn beyond COVID and Flu to create a solution for disease outbreaks happening across California, and especially with Monkeypox being a recent driver for this expansion, we are evaluating the development of an outbreak approach.

Stay tuned as we explore solutions for expanding My Turn for Outbreaks and we will share further information once it becomes available.

Novavax Ordering for myCAvax

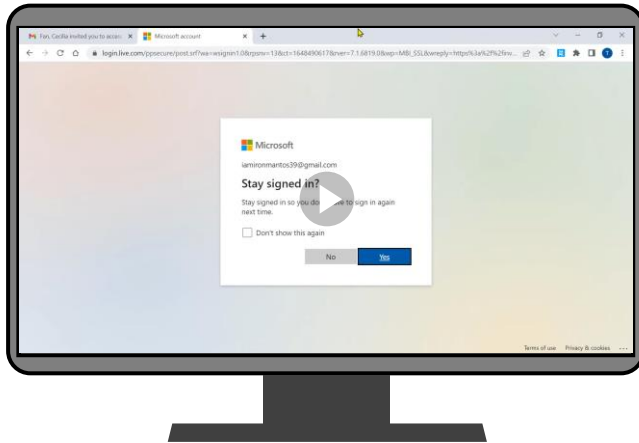

- We anticipate hearing more information later this week or early next week.
- CDC may open ordering as soon as next week.
- No information on allocations yet but anticipate limited amounts of vaccine at least initially
- 100 dose minimum order

Upcoming Login Process Changes

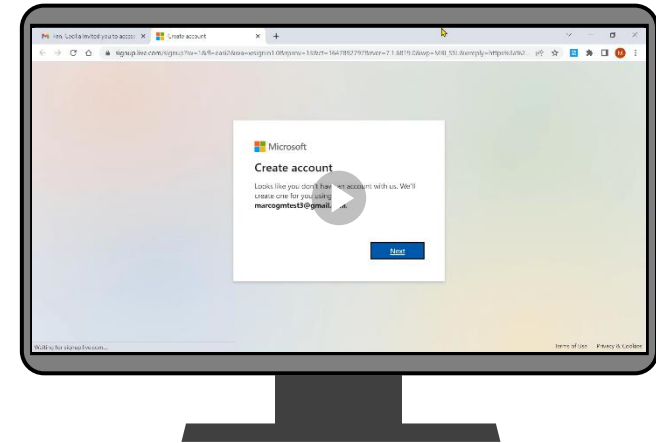

Beginning August 1, 2022, LHDs/MCEs will access the admin side of My Turn/myCAvax at: <https://myapplications.microsoft.com/cdph.onmicrosoft.com>. Providers will continue to access through the community portal with no changes.

This week, you will receive an email from **Invites@Microsoft.com**, inviting you to begin the process of setting up your new login account and MFA.

Setting up Multi-Factor Authentication (Microsoft Authenticator) with existing Microsoft Account

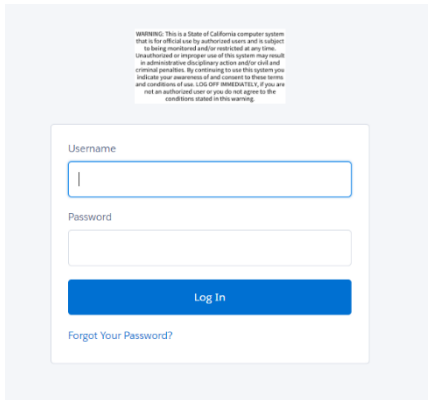

Setting up Multi-Factor Authentication (SMS Message) without an existing Microsoft Account

For LHDs/MCEs: Upcoming Login Process Changes

Change to Single Sign-On (SSO) Portal: New URL and Interface

Currently, My Turn and myCAVax production are accessed directly from:

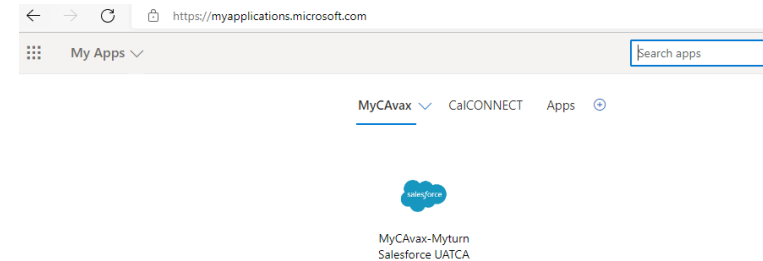

<https://cdphvax.my.salesforce.com/>

On August 1, My Turn and myCAVax production will be accessed directly from:

<https://myapps.microsoft.com>

You will get to each environment by clicking its “tile” on the portal dashboard.

Change to Sign-in Requirements: Multifactor Authentication (MFA) Needed

After inputting your username & password, the system requires identity verification via one of the following:

- Voice Call (One Time Passcode)
- SMS Text Message (One Time Passcode)
- Authenticator Mobile App (Passcode or Push Notification)

Upon receiving the authentication prompt, approve via mobile device or enter the passcode into the portal sign-in page.

Feedback Requested – myCAvax Interactive Guide

We want to hear from you!

The [myCAvax Interactive Guide](#) is a comprehensive end-to-end resource incorporating programmatic and system knowledge.

Please email any feedback to myCAvaxInfo@cdph.ca.gov.

LHD Council Call Reminder

The next LHD Council Call is Friday, July 22nd!
This call does not require registration.

Please join the meeting [here](#).

APPENDIX

myCAvax – Upcoming Enhancements - *Updated 7/18*

Enhancements

Soon to Be Links on the CDC Product Training Page

- ✓ Pfizer
 - ✓ Vaccine Preparation and Administration - 6 months through 4 years
 - ✓ Storage and Handling - 6 months through 4 years
- ✓ Moderna
 - ✓ Vaccine Preparation and Administration – 6 months through 5 years
 - ✓ Vaccine Preparation and Administration – 12 – 100+
 - ✓ Storage Handling – 6 months and older

Timeline

- ✓ Estimated Implementation: 8/11/2022

Slide Icon Key

Icon	Meaning
	This is to label slides that are referencing upcoming or existing functionality and how to use it in the system.
	This is to label slides that include important system reminders.
	This is to label slides that include tips and best practices to improve your system experience.

myCAvax Release Roadmap

RECENTLY DEPLOYED

June 16th (R27.0)

Orders

- ✓ LHDs to Move Small Orders to Standard Orders
- ✓ Order Page Layout Changes
- ✓ New order cancelation 'Status Reason' options
- ✓ Update Audit History for Orders/Transfers
- ✓ Add 'Doses Requested' to Standard Order Screen

Account

- ✓ Storing DocuSign at the Location Application

Community

- ✓ Add Knowledge Center article to account page
- ✓ Change Flow Title for Multiple Flows

Other

- ✓ Auto-Deactivate Licenses
- ✓ Default tab display on opening of records
- ✓ Remaining email templates to Lightning

RECENTLY DEPLOYED

July 14th (R28.0)

Orders

- ✓ Order Fulfillment Updates to allow multiple lots and general UI enhancements
- ✓ Allow CDPH and LHD users to update additional details on the Shipment Records such as quantity, product, expiration date, etc.
- ✓ Validate Shipping Hours
- ✓ Set Flags for Temporary Closure on Vaccine Order Review page

Account

- ✓ Temporary Closure for Location Accounts
- ✓ Add VFC Regions to Accounts
- ✓ Add Calibration Expiration date to Storage Unit List

Community

- ✓ Update Thermometer Type options
- ✓ Add Data Logger as Shipment Incident Type

Site Visits

- ✓ Provider Category
- ✓ VFC Assigned Pin

Other

- ✓ Put LHD Dashboard on LHD Homepage

UPCOMING

August 11th (R29.0)

Orders

- ✓ Draft Order Enhancements

Account

- ✓ Provider initiated Disenrollment
- ✓ Disenrollment due to inactivity

Other

- ✓ Start of Contact enhancements to remove duplicate contacts
- ✓ Sharing Rule enhancements for accounts, storage units, etc.

My Turn Public Product Roadmap

RECENTLY DEPLOYED

July 7th (R28.4)

Release 28.4

- ✓ Moderna Pediatrics 6-years-11-years two dose series
- ✓ Moderna Adolescents 12-years-17-years two dose series
- ✓ In-home vaccination and transportation page updates to reflect guidance for under 5 patients
- ✓ [Continued] Failure Point Notification – setting up monitoring tools throughout system to flag (potential) issues
- ✓ [Continued] Analysis – Consider walk-in and bulk upload appointments for clinic's Public Portal capacity and availability

CURRENT

July 27th (R29)

Release 29

- ✓ Moderna Pediatrics/Adolescents 6-years-17-years Additional Dose rollout
- ✓ Translations refresh
- ✓ Update eligibility chart to CDC link
- ✓ Display number of locations on Select a Location page
- ✓ Pfizer Infant/Toddler second dose reminder communications
- ✓ [Testing] Custom flows for vaccine type
- ✓ [Delivery] Failure Point Notification – setting up monitoring tools throughout system to flag (potential) issues
- ✓ [Testing] Consider walk-in and bulk upload appointments for clinic's Public Portal capacity and availability

UPCOMING

August 24th (R30)

Release 30

- ✓ SMS opt in
- ✓ [Testing] Custom flows for vaccine type
- ✓ [Delivery] Update error messaging for better user experience and accessibility
- ✓ [Continued] Failure Point Notification – setting up monitoring tools throughout system to flag (potential) issues
- ✓ [Testing] Consider walk-in and bulk upload appointments for clinic's Public Portal capacity and availability

My Turn Clinic Product Roadmap

RECENTLY DEPLOYED

July 7th (R28)

Release 28.4

- ✓ Moderna Pediatrics 6-years-11-years two dose series
- ✓ Moderna Adolescents 12-years-17-years two dose series ★
 - ✓ Add Vaccine Supply & Inventory
 - ✓ Bulk Walk-In Upload
 - ✓ Clinic Creation Setup
 - ✓ Walk-in Flow Update
 - ✓ Vaccine Administrator Flow Update
 - ✓ Single/Bulk Update
 - ✓ Appointment/IIS Tab Filter Update
 - ✓ Dashboard Homepage Update

CURRENT

July 27th (R29)

Release 29

- ✓ [Walk-In] Tool tips to the Homeless questions
- ✓ [Vaccine Inventory] Entering Lot Numbers correctly
- ✓ [CAIR2] Concatenate "Cross Street 1" and "Cross Street 2"
- ✓ [Clinic Creation] Pfizer Infant/Toddler 6m-4yrs checkbox visible
- ✓ [IIS Tab] Update filters to mimic the Appointment tab Filters
- ✓ Moderna Infant/Toddler 6m-17years Additional Dose
 - ✓ Walk-In flow
 - ✓ Vaccine Administration flow
 - ✓ Single/Bulk Edit update
 - ✓ Clinic Creation Setup
 - ✓ Vaccine Supply & Inventory
 - ✓ Bulk Walk-In Upload
 - ✓ Appointment/IIS Tab Filters

UPCOMING

August 24th (R30)

Release 30

- ★ ✓ [SMS/Email] Opt-out on the Walk-In flow
- ✓ [Walk-In Flow] Make the second Homelessness question optional
- ✓ Monkey Pox Flow
 - ✓ Clinic Creation Setup
 - ✓ Walk-In flow
 - ✓ Vaccine Supply & Inventory
 - ✓ Appointment/IIS tab filters
 - ✓ Vaccine Administration flow
 - ✓ Single Edit
