

The first  
Provider Webinar

# Welcome to the Final COVID-19 Vaccine Specific Provider Webinar

Friday, September 29, 2023

9:00AM – 10:30AM

# Questions

**During today's webinar, please use the Q&A panel to ask your questions so CDPH subject matter experts can respond directly.**

Resource links will be  
dropped into, "Chat"

# Housekeeping

## Reminder to Panelists:

Please mute yourself when not speaking.

**Please present on video today!**

Please monitor the Q&A panel for questions you may be able to answer.

## Reminder to Attendees:

Today's session is being recorded. Access today's slides and archived presentations at:  
[EZIZ COVID Education](#)

If you have post-webinar questions, please email [leslie.amani@cdph.ca.gov](mailto:leslie.amani@cdph.ca.gov)

# Friday Provider Webinar Transition Timeline

# Friday, December 4, 2020

## Agenda

- Vaccine Updates
- Provider Enrollment
- Vaccine Distribution
- Data Reporting Requirements
- Ordering and Storage and Handling
- Resources
- Questions

**From the Archives:  
The agenda for the first  
California COVID-19 Provider Webinar**

**Since beginning, number of Friday Provider webinars estimated at  
150 with attendees numbering close to 50,000!**

# Agenda: Friday, September 29, 2023

No.	Item	Speaker	Time (AM)
1	Welcome and Announcements	Leslie Amani (CDPH)	9:00 – 9:05
2	A Moment of Gratitude	Robert Schechter, MD (CDPH)	9:05 – 9:10
3	Potential Impacts: Federal Government Shutdown	Maria Volk (CDPH)	9:10 – 9:15
4	Vaccine Administration Data	Sharon Brummitt (CDPH)	9:15 – 9:20
5	Clinical Update	Caterina Liu, MD (CDPH)	9:20 – 9:25
6	COVID-19 Vaccine Access	Claudia Aguiluz (CDPH)	9:25 – 9:30
7	Storage and Handling	Katherine McHugh and Alan Hendrickson (CDPH)	9:30 – 9:35
8	Vaccine Management	Josh Pocus (My Turn) and Claudia Aguiluz (myCAvax)	9:35 – 9:40
9	COVID-19 Vaccine Quality Assurance	Eugene Beronilla and Francisco Borboa (CDPH)	9:40 – 9:45
10	COVID-19 Testing and Therapeutics	Jessica deJarnette, MD (CDPH)	9:45 – 9:50
11	COVID-19 Oral Antivirals Commercialization	Edward Salaguinto, PharmD, RPh (CDPH)	9:50 – 9:55
12	Resources	CDPH Subject Matter Experts	9:55 – 10:00
13	Sharing and Q&A	Attendees, SMEs, and Panelists	10:00 – 10:30

**Thank you, California COVID-19 Vaccination Program Providers!**

# A Moment of Gratitude

Robert Schechter, MD, CDPH

# Announcements

Leslie Amani, CDPH

- ❖ Work directly with eTrueNorth to enroll your pharmacy location in the Bridge Access Program.
- ❖ eTrueNorth makes participation easy by providing a secure online platform for convenient patient sign-up and participating pharmacy reimbursement.
- ❖ Interested pharmacies can visit [www.joinetrue north.com](http://www.joinetrue north.com) to enroll.

**To register, visit:**  
**[www.joinetrue north.com](http://www.joinetrue north.com)**

The Bridge Access Program is funded by the U.S. Department of Health and Human Services and the Center for Disease Control and Prevention.

All pharmacy applications are subject to approval by HHS.

## Bridge Access Program

**eTrueNorth, in partnership with HHS,\* is helping expand free COVID-19 vaccine access in communities across the U.S.**

Through the Bridge Access Program, pharmacies enrolled with eTrueNorth can receive reimbursement for administering no-cost COVID-19 vaccines to uninsured and underinsured adults.

**By encouraging enrollment, you can:**

Help pharmacies **expand access to the underserved**

Streamline **access to reimbursement** for vaccinations administered to the

Support more **robust IIS reporting**.

# CDPH Required Training

## IMMUNIZATION BRANCH

### COVID-19 Vaccine Training

#### Training and Resources

- COVID-19 Vaccine Product Training
- Technical Resources for New Vaccinators

#### Required Training for Participation in the California Bridge Access Program

Providers and key practice staff storing, handling, managing, or administering vaccines must complete the required training to meet federal and state program requirements.

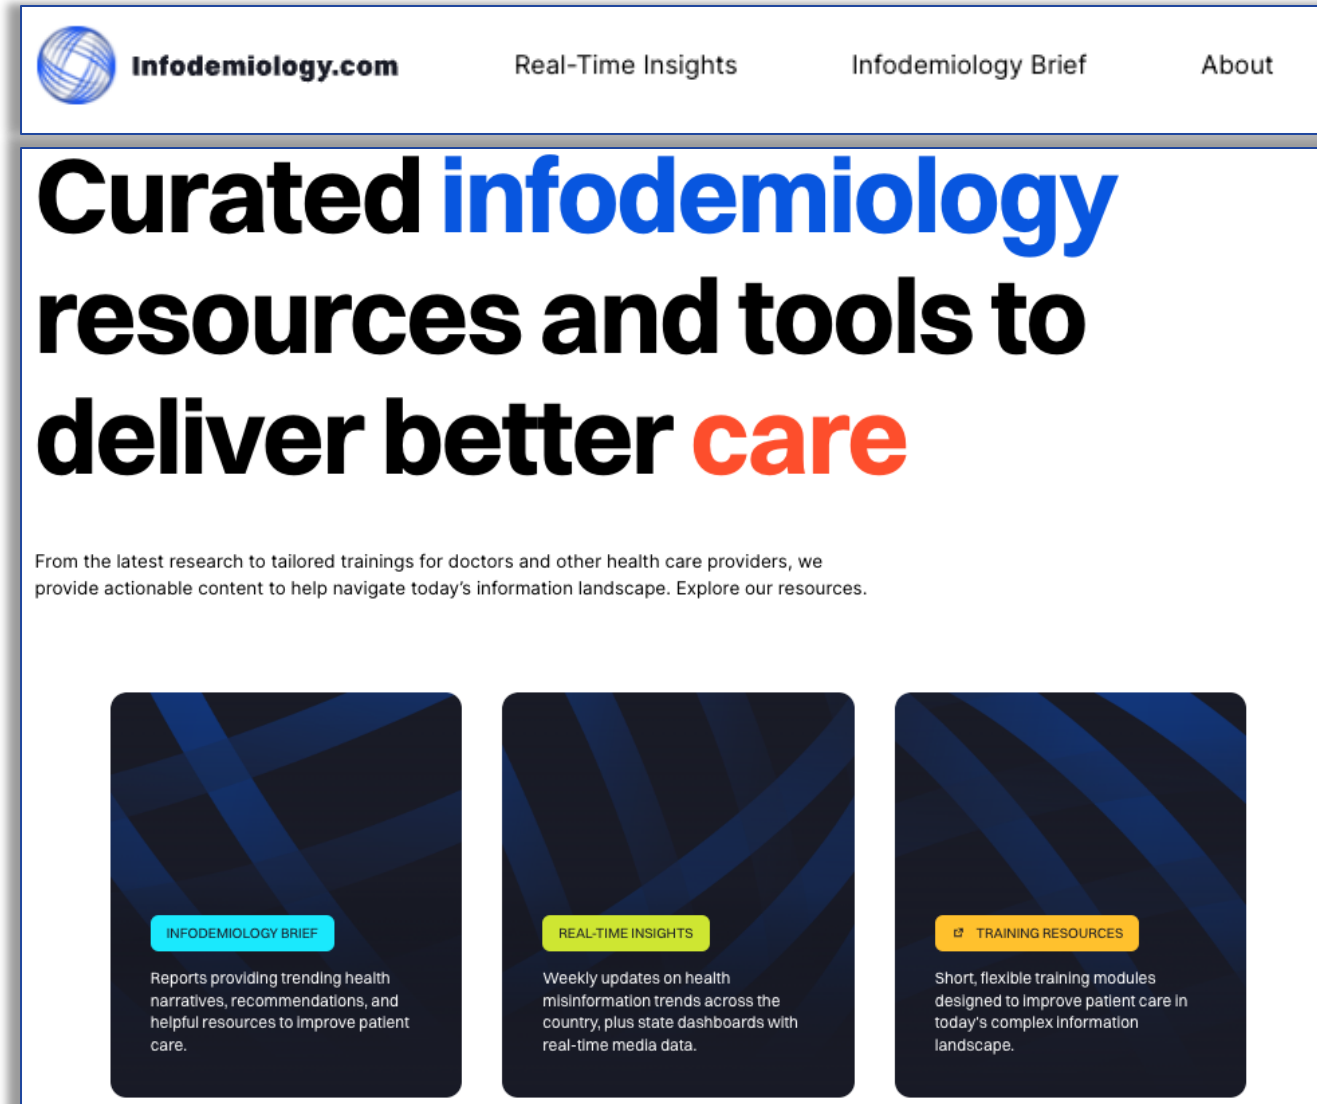

#### Program Training

This training prepares sites to incorporate program requirements into clinic protocols and identifies key resources for use on the job. Organization & Location Coordinators must complete the required program training in myCAVax during enrollment but may access the lessons below. Review times are approximate.

**CDPH Required Training Page**  
**Product trainings for the updated 2023-24 COVID-19 vaccines are now live."**

# Infodemiology.com

- New resource for clinicians and other health care providers.
- **Infodemiology Brief:** Monthly newsletter with reports on trending health narratives and helpful resources. [Sign up](#).
- **Insights & Dashboards:** Weekly misinformation updates and national and state dashboards with real-time media data.
- **Infodemiology Training Program:** Learn how to identify and respond to trending health narratives. [Join the waitlist for the October launch](#).

The image shows a screenshot of the Infodemiology.com website. At the top is a navigation bar with the Infodemiology logo, the website name, and links for 'Real-Time Insights', 'Infodemiology Brief', and 'About'. The main headline reads 'Curated infodemiology resources and tools to deliver better care', with 'infodemiology' in blue and 'care' in red. Below the headline is a sub-header: 'From the latest research to tailored trainings for doctors and other health care providers, we provide actionable content to help navigate today's information landscape. Explore our resources.' At the bottom are three dark blue cards with diagonal stripes. The first card is for the 'INFODEMIOLOGY BRIEF', described as reports providing trending health narratives, recommendations, and helpful resources. The second card is for 'REAL-TIME INSIGHTS', described as weekly updates on health misinformation trends and state dashboards. The third card is for 'TRAINING RESOURCES', described as short, flexible training modules to improve patient care.

Infodemiology.com Real-Time Insights Infodemiology Brief About

## Curated infodemiology resources and tools to deliver better care

From the latest research to tailored trainings for doctors and other health care providers, we provide actionable content to help navigate today's information landscape. Explore our resources.

**INFODEMIOLOGY BRIEF**

Reports providing trending health narratives, recommendations, and helpful resources to improve patient care.

**REAL-TIME INSIGHTS**

Weekly updates on health misinformation trends across the country, plus state dashboards with real-time media data.

**TRAINING RESOURCES**

Short, flexible training modules designed to improve patient care in today's complex information landscape.

# Archived COVID-19 Crucial Conversations Webinar

**Topic:** Talking with Patients about the Updated COVID-19 Vaccine

**Description:** Learn conversation methodologies for effectively talking with patients about the updated 2023-2024 COVID-19 vaccine.

**Speaker:** Dr. Alex McDonald, cofounder of [#ThisIsOurShot](#)

Link to [Slides](#)

#THIS IS OUR SHOT #VACU NATE YA

# Shot by Shot: Cinthya's Story

## Cinthya's Story

COVID-19

Adult

English

Infographic

Download  
Infographic

“ I would see the tubes there at my bedside and wondered if I would need to be intubated, and if so, would I ever go home again? ”

I'm 36 and I've been a registered nurse and the director of a surgical center in Beverly Hills for about six years. When the pandemic hit in 2020, we had to make a lot of changes in the way we did our business to keep everyone

safe, especially infection control procedures in cleaning and everyone wearing masks. Also, we restricted who could come into the clinic, and patients couldn't bring family members with them anymore. We were trying to protect patients, their family members, and us, the clinic staff.

## My Message About COVID-19 and the COVID-19 Vaccine

I'm sharing my story because I want everyone to know how seriously ill COVID-19 made me, a healthy nurse and mom at age 36. It's so contagious and the fact that my mom was just in another room during my home recovery was stressful too. Now that we have the COVID-19 vaccine I hope everyone will get vaccinated as soon as it's available. Thank goodness my story has a happy ending. Too many people who end up in the ICU with COVID-19 don't go home.

# COVID-19 Vaccine Poll: Life Events 2020 - Present

What life event changes happened to you and your family during the pandemic?

Choose as many as apply:

- ☐ Change in relationship status
- ☐ New job
- ☐ Welcomed a new baby(ies)
- ☐ Moved
- ☐ Had a family member or friend die
- ☐ Adopted a pet
- ☐ Had a pet die
- ☐ Adopted a new fitness plan
- ☐ Adult child(ren) moved back in
- ☐ Accomplished bucket list item(s)

# Potential Impacts: Federal Government Shutdown

Maria Volk, CDPH

# Impacts to Immunization (IZ) Services

- Many CDC staff will be furloughed. If the furlough is extended, would anticipate longer wait times for responses from CDC and could impact the delivery of routine work products.
- CDC staff that work on vaccine ordering and allocations have been exempted, so CDPH does not anticipate any issues with vaccine ordering, delivery, or allocations (for all funding sources).
- CDC Grants that have already been awarded will have no impacts (IZ grants have already been awarded for this FY!)
- Immunization Branch staff will not be impacted (Exception: CDC Public Health Advisors) .

# Clinical Update

Caterina Liu, MD, CDPH

# Calendario de la Vacuna COVID-19 2023-24

Calendario de la Vacuna COVID-19 2023-24 –Calendario Rutinario			
Edad*	Vacuna	Si no está vacunado	Si recibió alguna dosis anterior, administre 2023-24 dosis:
6 meses–4 años†	Pfizer–Bebés/Niños Pequeños	1ra Dosis → 3-8 semanas → 2da Dosis → ≥8 semanas → 3ra Dosis	Si 1 dosis previa, entonces: 3-8** semanas → 1 → ≥8 semanas → 2 Si ≥2 dosis previas, entonces: ≥8 semanas → 1
	Moderna–Pediátrico*	1ra Dosis → 4-8 semanas → 2da Dosis	Si 1 dosis previa, entonces: 4-8 semanas → 1 Si ≥2 dosis anteriores entonces: ≥8 semanas → 1
5–11 años	Moderna–Pediátrico*	1 Dosis	Si 1 o más dosis previas (de cualquiera de las marcas), entonces*: ≥2 meses → Formulación actualizada 2023-24 Moderna/Pfizer
	Pfizer–Pediátrico	1 Dosis	
12+ años	Pfizer–Adol/Adulto (Comirnaty)	1 Dosis	
	Moderna–Adol/Adulto (Spikevax)	1 Dosis	
	Novavax (2021)	1ra Dosis → 3-8 semanas → 2da Dosis	2023-24 formulación próximamente!

\* Consulte las recomendaciones de los CDC para niños en transición de un grupo de edad más joven a uno mayor.  
† Los niños de 6 meses a 4 años deben recibir la misma marca de vacuna actualizada que las dosis anteriores que recibieron.  
\*\* Para algunas personas, puede ser preferible un intervalo de 8 semanas, especialmente para hombres de 12 a 39 años.  
‡ Todas las dosis de Moderna de 6 meses a 11 años son de 0.25 ml (25 mcg).  
^ La vacuna Janssen (J & J) ha sido desautorizada. Siga el calendario de los que tienen más de 12 años para cualquier dosis anterior.  
Consulte las Consideraciones Clínicas Provisionales Para el Uso de las Vacunas Contra el COVID-19 para obtener más detalles. El horario está sujeto a cambios.

California Department of Public Health, Immunization Branch IMM-1396S (9/27/23) Pagina 1 of 2

Calendario de la Vacuna COVID-19 2023-24 Si Está Moderadamente o Gravemente Inmunocomprometido			
Edad	Vacuna	Si no está vacunado:	Si recibió alguna dosis anterior, administre las dosis de 2023-24:
6 meses–4 años	Pfizer–Bebés/Niños Pequeños	1ra Dosis → 3 semanas → 2da Dosis → ≥8 semanas → 3ra Dosis → ≥2 meses → Dosis Opcional*	1 dosis previa: 3 w → 1 → ≥8 w → 2 → ≥2 m → Dosis Opcional* ≥2 dosis previa: ≥8 w → 1 → ≥2 m → Dosis Opcional*
	Moderna–Pediátrico	1ra Dosis → 4 semanas → 2da Dosis → ≥4 semanas → 3ra Dosis → ≥2 meses → Dosis Opcional*	1 dosis previa: 4 w → 1 → ≥4 w → 2 → ≥2 m → Dosis Opcional* 2 dosis previa: ≥4 w → 1 → ≥2 m → Dosis Opcional*
5–11 años	Moderna–Pediátrico	1ra Dosis → 4 semanas → 2da Dosis → ≥4 semanas → 3ra Dosis	≥2 meses → Dosis Opcional* (Moderna/Pfizer) 1 dosis previa: ≥8 w → 1 → ≥2 m → Dosis Opcional* 2 dosis previa: ≥4 w → 1 → ≥2 m → Dosis Opcional* ≥3 dosis previa (para mayores de 5 años, la dosis de Pfizer también está bien): ≥8 w → 1 → ≥2 m → Dosis Opcional*
	Pfizer–Pediátrico	1ra Dosis → 3 semanas → 2da Dosis → ≥4 semanas → 3ra Dosis	
12+ años	Pfizer–Adol/Adulto (Comirnaty)	1ra Dosis → 3 semanas → 2da Dosis → ≥4 semanas → 3ra Dosis	1 dosis previa: 3 w → 1 → ≥4 w → 2 → ≥2 m → Dosis Opcional* (Moderna/Pfizer) 2 dosis previa: ≥4 w → 1 → ≥2 m → Dosis Opcional* (Moderna/Pfizer) ≥3 dosis previa**: ≥8 w → 1 → ≥2 m → Dosis Opcional* (Moderna/Pfizer)
	Moderna–Adol/Adulto (Spikevax)	1ra Dosis → 4 semanas → 2da Dosis → ≥4 semanas → 3ra Dosis	1 dosis previa: 4 w → 1 → ≥4 w → 2 → ≥2 m → Dosis Opcional* (Moderna/Pfizer) 2 dosis previa: ≥4 w → 1 → ≥2 m → Dosis Opcional* (Moderna/Pfizer) ≥3 dosis previa**: ≥8 w → 1 → ≥2 m → Dosis Opcional* (Moderna/Pfizer)
	Novavax (2021)	2023-24 formulación próximamente!	Si 1 o más dosis previas, entonces: ≥8 semanas → Formulación actualizada 2023-24 Moderna/Pfizer → ≥2 m → Dosis Opcional* (Moderna/Pfizer)

\*Se puede administrar una dosis opcional ≥2 meses después de la última dosis. Se pueden administrar dosis adicionales a discreción del proveedor de atención médica. Consulte la Tabla 2 para el vial y la dosis.  
\*\* Las edades de 5 años o más pueden recibir Moderna o Pfizer después de ≥3 dosis previas.

# Updated COVID-19 Vaccine Timing Guide 2023-2024

COVID-19 Vaccine Timing 2023-24 –Routine Schedule			
Age*	Vaccine	If unvaccinated:	If had any prior doses, give 2023-24 doses:
6 months–4 years†	Pfizer–Infant/Toddler	1st Dose → 3–8 weeks → 2nd Dose → ≥8 weeks → 3rd Dose	If 1 prior dose, then: 3–8 weeks 1 ≥8 weeks 2 If ≥2 prior doses, then: ≥8 weeks 1
	Moderna–Pediatric*	1st Dose → 4–8 weeks → 2nd Dose	If 1 prior dose, then: 1 month 1 If ≥2 prior doses then: 2 months 1
5–11 years	Moderna–Pediatric*	1 Dose	If 1 or more prior doses (of any of the 4 brands), then*: ≥2 months Updated 2023-24 Formulation Moderna/Pfizer
	Pfizer–Pediatric	1 Dose	
12+ years	Pfizer–Adol/Adult (Comirnaty)	1 Dose	
	Moderna–Adol/Adult (Spikevax)	1 Dose	
	Novavax (2021)	1st Dose → 3–8 weeks → 2nd Dose 2023-24 formulation coming soon!	

\* See CDC recommendations for children transitioning from a younger to older age group.  
† Children 6 months – 4 years should receive the same brand of the updated vaccine as the prior doses they received.  
\*\* An 8-week interval may be preferable for some people, especially for males 12–39 years.  
\* All Moderna doses 6 months – 11 years are 0.25 mL (25 mcg).  
^ Janssen (J & J) vaccine has been deauthorized. Follow schedule for 12+ years for any prior doses.

View [Interim Clinical Considerations for Use of COVID-19 Vaccines](#) for details. Schedule is subject to change.

California Department of Public Health, Immunization Branch IMM-1396 (9/14/23) Page 1 of 2

COVID-19 Vaccine Timing 2023-24 if Moderately/Severely Immunocompromised			
Age	Vaccine	If unvaccinated:	If had any prior doses give 2023-24 doses:
6 months–4 years	Pfizer Infant/Toddler	1st Dose → 3 weeks → 2nd Dose → ≥8 weeks → 3rd Dose → ≥2 months → Optional Dose*	1 prior dose: 3 w 1 ≥8 w 2 ≥2 m Optional Dose* ≥2 prior doses: ≥8 w 1 ≥2 m Optional Dose*
	Moderna–Pediatric	1st Dose → 4 weeks → 2nd Dose → ≥4 weeks → 3rd Dose → ≥2 months → Optional Dose*	1 prior dose: 4 w 1 ≥4 w 2 ≥2 m Optional Dose* 2 prior doses: ≥4 w 1 ≥2 m Optional Dose* ≥3 prior doses: ≥8 w 1 (for ages 5+ yrs, Pfizer dose is also OK)
5–11 years	Moderna–Pediatric	1st Dose → 4 weeks → 2nd Dose → ≥4 weeks → 3rd Dose	≥2 months Optional Dose* (Moderna/Pfizer)
	Pfizer–Pediatric	1st Dose → 3 weeks → 2nd Dose → ≥4 weeks → 3rd Dose	
12+ years	Pfizer–Adol/Adult (Comirnaty)	1st Dose → 3 weeks → 2nd Dose → ≥4 weeks → 3rd Dose	1 prior dose: 3 w 1 ≥4 w 2 ≥2 m Optional Dose* (Moderna/Pfizer) 2 prior doses: ≥4 w 1 ≥2 m Optional Dose* (Moderna/Pfizer) ≥3 prior doses**: ≥8 w 1
	Moderna–Adol/Adult (Spikevax)	1st Dose → 4 weeks → 2nd Dose → ≥4 weeks → 3rd Dose	1 prior dose: 4 w 1 ≥4 w 2 ≥2 m Optional Dose* (Moderna/Pfizer) 2 prior doses: ≥4 w 1 ≥2 m Optional Dose* (Moderna/Pfizer) ≥3 prior doses**: ≥8 w 1
	Novavax (2021)	2023-24 formulation coming soon!	If 1 or more prior doses, then: ≥8 weeks Updated 2023-24 Formulation Moderna/Pfizer ≥2 m Optional Dose* (Moderna/Pfizer)
	Novavax (2021)	1st Dose → 3 weeks → 2nd Dose →	

\* An optional dose may be given ≥2 months after the last dose. Further doses may be given at the healthcare provider's discretion. See Table 2 for vial and dosage.  
\*\* Ages 5+ years may be given Moderna or Pfizer after ≥3 prior doses.

# Vaccine Product Fact Sheets Updated in BAP POM

Receiving & Storing Vaccines

## Moderna Spikevax Vaccine 12Y+ Fact Sheet

Approval of Spikevax (COVID-19 Vaccine, mRNA) to include the 2023-2024 formula, a change to a single dose for individuals 18Y+ and approval of a single dose for individuals 12-17Y. Updated to include a monovalent (single) component that corresponds to the Omicron variant XBB.1.5.

**Product Profile:** NDC 80777-0102-04 [Provider Letter](#) | [Package Insert](#)

-  Vaccine ships frozen between -50°C and -15°C (-58°F and 5°F). For receiving, see [How to Receive Moderna Vaccines](#).
- Ships as 10-pack carton, single-dose vials (minimum 10 doses).
-  Storage & handling requirements remain the same as for bivalent.
- Store unpunctured vials in a freezer at -50°C to -15°C (-58°F to 5°F) **until expiration** or refrigerator at 2°C to 8°C (36°F to 46°F) for up to **30 days** or hold at 8°C to 25°C (46°F to 77°F) for up to **24 hours** before puncture.
- [Organize storage units](#) to reduce administration errors; group products by age and label cartons, baskets, or shelf space in large letters.
- Apply storage and beyond-use date tracking labels (**TBD**) to prevent administration errors.

- Look for blue age-indicator label & Spikevax. Read label carefully; don't rely on cap color.
- Spikevax was previously approved as a two-dose series for individuals 18 years of age and older.
- Dosing volume: 0.5 mL (50 mcg). **DO NOT DILUTE.**
- Expiration date: Scan QR code on carton or expiry checker (**TBD**).
- Use-by limit: Discard after single use.
- Do not use vaccine after earliest expiration or beyond-use date.**

## Moderna Spikevax Vaccine 12Y+ Fact Sheet

Receiving & Storing Vaccines

## Pfizer-BioNTech Comirnaty Vaccine 12Y+ Fact Sheet

Approval of Comirnaty (COVID-19 Vaccine, mRNA) to include 2023-2024 formula, and a change to a single dose for individuals 12Y+. Updated to include a monovalent (single) component that corresponds to the Omicron variant XBB.1.5. **DO NOT DILUTE.**

**Product Profile:** NDC 00069-2362-10 [Provider Letter](#) | [Package Inserts](#)

-  Vaccines ship from the manufacturer with dry ice and between -90°C and -60°C (-130°F to -76°F); ensure staff are trained on [dry ice safety](#).
- Ships as 10-pack carton, single-dose vials (minimum 10 doses).
- For receiving, see [How to Receive Pfizer-BioNTech Vaccines](#) or [this video](#).
-  Storage & handling requirements remain the same as for bivalent.
- Store unpunctured vials in ULT unit (-90 to -60°C) **until expiration** or refrigerator at 2-8°C (36-46°F) for up to **10 weeks** or at 8°C to 25°C (46°F to 77°F) for up to **12 hours** before puncture. **DON'T FREEZE.**
- [Organize storage units](#) to reduce administration errors; group products by age and label cartons, baskets, or shelf space in large letters.
- Apply storage and beyond-use date tracking labels (**TBD**) to prevent administration errors.

- Read label carefully; don't rely on cap color.
- Comirnaty was previously approved as a two-dose series for individuals 12 years of age and older.
- Dosing volume: 0.3 mL (30 mcg). **DO NOT DILUTE.**
- Expiration date: Scan QR code on carton or expiry checker (**TBD**).
- Use-by limit: Discard after single use.
- Do not use vaccine after earliest expiration or beyond-use date.**

# Coadministration of COVID-19 Vaccine and Other Vaccines

In accordance with [General Best Practice Guidelines for Immunization](#), routine administration of all age-appropriate doses of vaccines simultaneously (coadministration) is recommended for children, adolescents, and adults if there are no contraindications at the time of the healthcare visit.

Providers may simultaneously administer COVID-19, influenza, and respiratory syncytial virus (RSV) vaccines to eligible patients.

## COVID-19 Vaccine Coadministration Tips

Vaccinate All 58

**Routine and flu vaccines may be administered on the same day as COVID-19 vaccines.**

**Considerations—What are the risks of:**

- Missing recommended vaccines and catching COVID-19 or other vaccine-preventable diseases before the next appointment?
- Reactions from each vaccine?

**Organize syringes:**

- Label each syringe with vaccine name, dosage, lot number, initials of the preparer, and the exact beyond-use time.
- Place syringes on a clean tray, grouping vaccines by administration site.

**Patient Care:**

- When possible, administer the COVID-19 vaccine in a different arm from vaccines more likely to cause a local reaction (e.g., tetanus-toxoid-containing vaccines).
- Give the most painful injections last (e.g., MMR, HPV).
- If patient is anxious, try using these tips to ease anxiety during vaccination.
- After administration, observe patient for 15 minutes (30 minutes if at increased risk for anaphylaxis). Report any adverse events to VAERS.

**Examples for preteens and kids:**

**Right Deltoid (IM)**  
Tdap  
MenB  
HPV

**Left Deltoid (IM)**  
COVID-19  
Flu  
MenACWY

**Right (IM)**  
DTaP  
IPV

**Left (IM)**  
COVID-19  
Flu

**Tricep Area (SC)**  
MMRV

**Separate injection sites by 1 inch or more, if possible.**

**Administer COVID-19 vaccines by intramuscular (IM) injection.**

**Age: 3 years and older**

- **Site:** Deltoid muscle, above the level of the armpit
- **Needle:** 1 inch, 22-25 gauge (1 1/2 inches for larger patients)
- Bunch up the muscle and insert entire needle at a 90° angle

Refer to CDC product info for administration steps by product.

**Under 3 years**

- **Site:** Vastus lateralis muscle, in the anterolateral thigh (outside of the leg in the mid- to upper-thigh)
- **Needle:** 1 inch, 22-25 gauge
- Bunch up the muscle and insert entire needle at a 90° angle

California COVID-19 Vaccination Program

IMM-1389 (8/10/22)

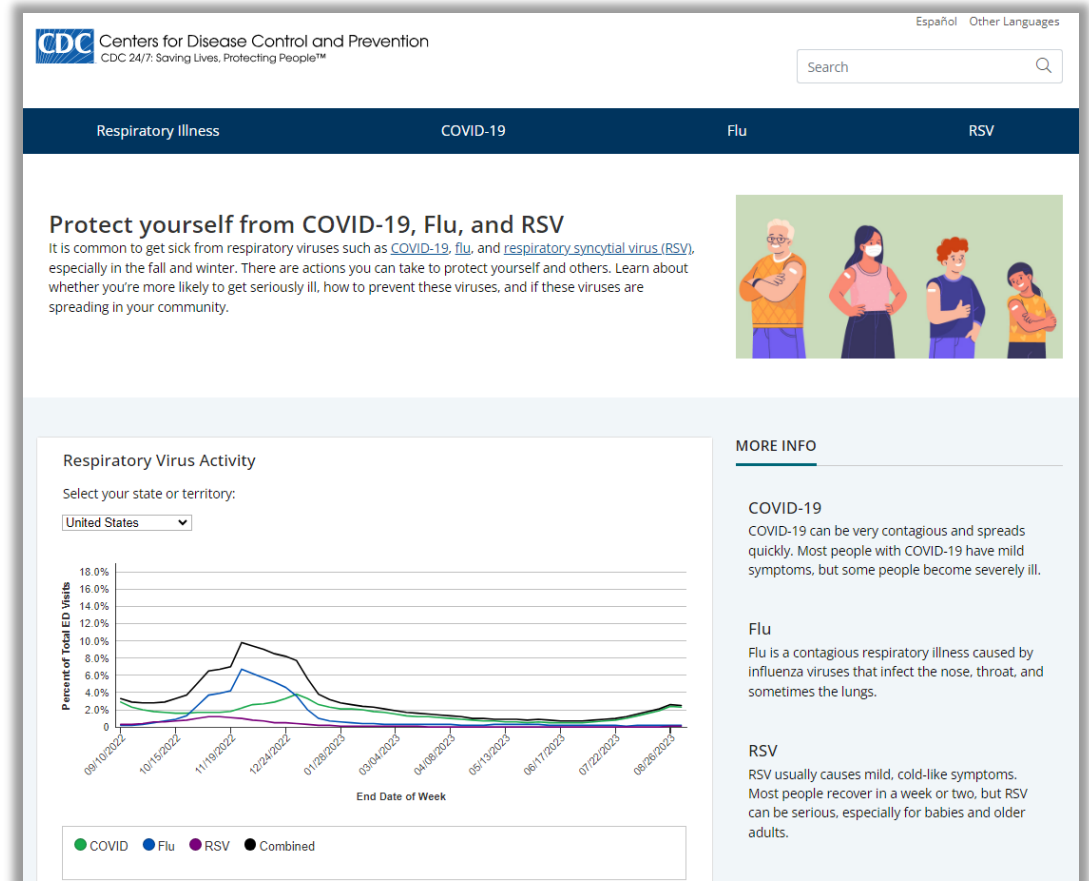

## [COVID-19 Vaccine Coadministration Tips](#)

# Protect yourself from COVID-19, Flu and RSV

## CDC Respiratory Viruses page

[www.cdc.gov/respiratory-viruses/index.htm](https://www.cdc.gov/respiratory-viruses/index.htm)

- CDC recommends that everyone 6 months and older stay up to date on [COVID-19 vaccines](#) and receive a [seasonal flu vaccine](#).
- If you are 60 years and older, talk to your healthcare provider to see if RSV vaccination is right for you.
- CDC recommends [RSV vaccine during 32 through 36 weeks of pregnancy](#) to prevent RSV in infants.
- CDC also recommends nirsevimab for all infants younger than 8 months who are born during or entering their first RSV season, as well as older babies 8 to 19 months old including American Indian or Alaska Native (AIAN) children.

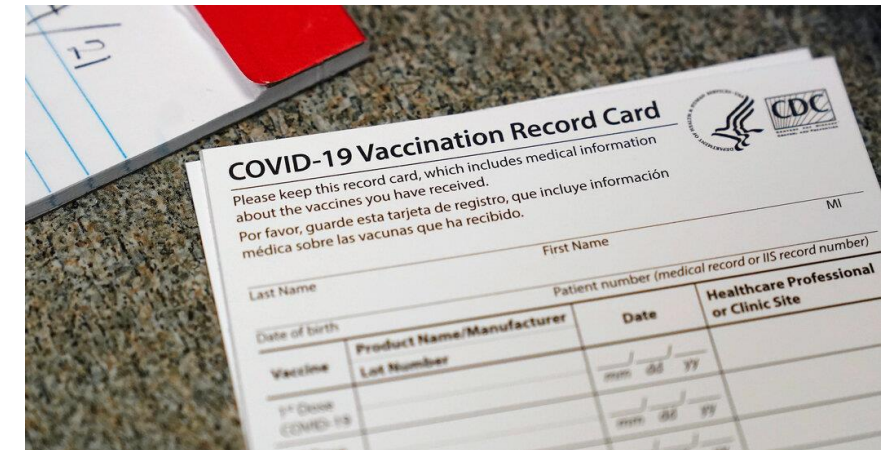

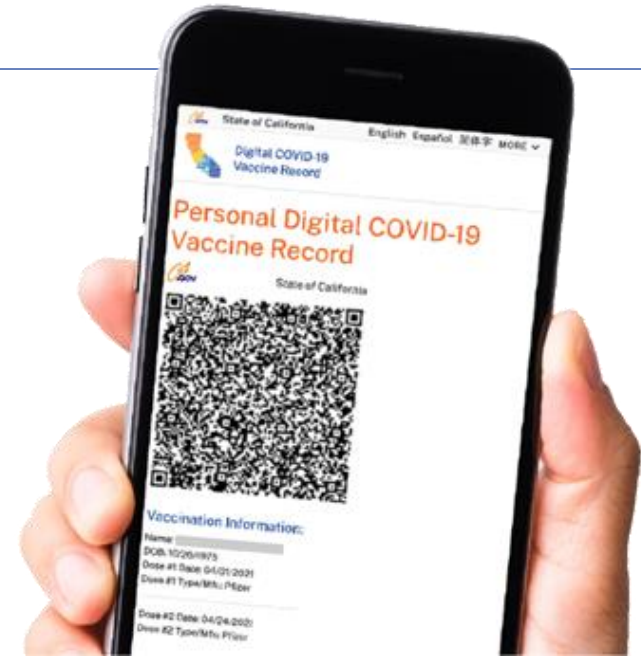

# Recording Doses

## Electronic Records – options include

- Digital Vaccine Record
- California Immunization Registry (CAIR)
- Electronic Health Record (EHR) systems

## Paper Records

- CDC record cards may continue to be used if helpful, but are no longer mandatory
  - Please shred unneeded cards
- Other formats may be used as well

# Digital Vaccine Record

## GET YOUR DIGITAL VACCINE RECORD

Private. Convenient. Secure.

**What is a Digital Vaccine Record (DVR)?**  
Your Digital Vaccine Record (DVR) is an electronic vaccination record from the California Immunization Registry (CAIR) and is an official record of the state of California.

**What information does the DVR include?**  
The DVR has your name, date of birth, vaccination dates, and the vaccines you received.

**Where do I access my Digital Vaccine Record?**  
Visit [myvaccinerecord.cdph.ca.gov](https://myvaccinerecord.cdph.ca.gov) to access your record. You will need to enter your first and last name, date of birth, and mobile number or email address. You will create a PIN which will be required to obtain your DVR when the link to your record is provided to you.

For more DVR questions, visit [myvaccinerecord.cdph.ca.gov/faq](https://myvaccinerecord.cdph.ca.gov/faq) or call 1-833-422-4255 (open M-F 8AM-8PM, SA-SU 8AM-5PM).

California Department of Public Health, Immunization Branch

IMM-1461 (3/9/23)

## DVR Fact Sheet

## OBTENGA SU REGISTRO DIGITAL DE VACUNACIÓN

PRIVADO. COVENIENTE. SEGURO.

**Registro Digital de Vacunación (DVR)**  
Su Registro Digital de Vacunación (DVR, por sus siglas en inglés) es un registro electrónico de vacunación procedente del Registro de Vacunación de California (CAIR, por sus siglas en inglés) y es un registro oficial del estado de California.

**¿Qué información incluye el DVR?**  
El DVR tiene su nombre, fecha de nacimiento, fechas de vacunación y las vacunas que recibió.

**¿Dónde accedo mi Registro Digital de Vacunación?**  
Visite [myvaccinerecord.cdph.ca.gov](https://myvaccinerecord.cdph.ca.gov) para acceder su registro. Necesita ingresar su primer nombre y apellido, fecha de nacimiento y número de celular o correo electrónico. Necesitará crear un PIN para poder obtener su DVR cuando se le proporcione el enlace a su registro.

**¿Qué registros digitales puedo acceder desde el Portal DVR?**  
Hay dos tipos de registros a los que puede acceder desde el Portal DVR:

- **Código QR de COVID-19** que (cuando es escaneado por un lector de tarjetas SMART Health) mostrará la misma información que su tarjeta de papel de los CDC: su nombre, fecha de nacimiento, fechas de vacunación y las vacunas.
- **Registro de todas las vacunas** que informaron las farmacias y otros proveedores de salud a CAIR. Tome en cuenta que es posible que su historial de vacunación no se haya ingresado a CAIR.

Para más preguntas sobre el DVR, visite [myvaccinerecord.cdph.ca.gov/faq-es/](https://myvaccinerecord.cdph.ca.gov/faq-es/) o llame al 1-833-422-4255 (L—V 8AM-8PM, S-D 8AM-5PM).

California Department of Public Health, Immunization Branch

IMM-1461S (3/30/23)

## Spanish Version

- To access their DVR, patients should visit the [Digital Vaccine Record \(DVR\) portal](https://myvaccinerecord.cdph.ca.gov) ([myvaccinerecord.cdph.ca.gov](https://myvaccinerecord.cdph.ca.gov))
- Flyers are also available in [Arabic](#), [Simplified Chinese](#) and [Traditional Chinese](#), [Korean](#), [Tagalog](#) and [Vietnamese](#).
- The DVR request form is also available in the languages listed above to support easy communication. Records are also printable in these languages! See our [DVR FAQs](#) for more information.

# COVID-19 Vaccine Trivia

Who received the first dose of COVID-19 vaccine in California?

- ☐ Governor Gavin Newsom
- ☐ Helen Cordova, ICU Nurse
- ☐ Dr. Tomás Aragón
- ☐ Amy Pine, CDPH

# COVID-19 Vaccine Trivia

Who received the first dose of COVID-19 vaccine in California?

- ☐ Governor Gavin Newsom
- ☒ Helen Cordova, ICU Nurse
- ☐ Dr. Tomás Aragón
- ☐ Amy Pine, CDPH

“I’m excited. I’m hopeful,” she said. “I really encourage everyone to consider receiving the vaccine so we can start putting an end to this pandemic.”

Helen Cordova, an intensive-care nurse at Kaiser Permanente in Los Angeles, was the first person to get the vaccine in California.

Thank you to  
California's Public  
Health Medical Officers  
for your tireless support!

# COVID-19 Vaccine Access post Commercialization

## Adult populations:

- **CA Bridge Access Program (BAP)** for uninsured/under insured adults.
  - 584 Active BAP Providers
  - 580 Pending BAP Program enrollment
- **Bridge Access Program for Retail Pharmacies** have begun supporting adult uninsured/underinsured vaccination through select enrolled pharmacies.
- **Healthcare providers** are in process of making vaccines available for insured adults, as they work with private suppliers, redistributors, and manufacturers on acquiring private supply.

COVID-19 vaccines are still available at no cost to most people through their private health insurance, Medicare, and Medicaid plans.

# COVID-19 Vaccine Access post Commercialization

## Pediatric populations:

- Vaccines are now available through the **Vaccines for Children (VFC) Program** for eligible children under 19 years of age.
  - COVID-19 vaccines are now part of the VFC Order Form available for routine vaccine ordering by over 3,500 active CA VFC Providers
- **Healthcare providers** are in process of making vaccines available for insured pediatric populations, as they work with private suppliers, redistributors, and manufacturers on acquiring private supply.

COVID-19 vaccines are still available at no cost to most people through their private health insurance.

Ask about the Vaccines for Children Program. We're helping California's families.

Children must be 18 years of age or younger who meet one of these criteria:

- Be eligible for Medi-Cal or Child Health and Disability Prevention Program (CHDP), or
- Have no health insurance coverage, or
- Be American Indian or Alaskan Native

Our staff will check if you qualify every time your child gets immunized.

There may be a vaccine administration fee for non-Medi-Cal patients. VFC vaccines cannot be denied even if you can't pay.

**What if you have private insurance that does not cover vaccines?**

You can receive VFC vaccines for no cost at a Federally Qualified Health Center or a Rural Health Center.

[www.eziz.org](http://www.eziz.org) This medical office is enrolled in the California Vaccines for Children Program.

# Storage and Handling with Kate and Al

Katherine McHugh and Alan Hendrickson, CDPH

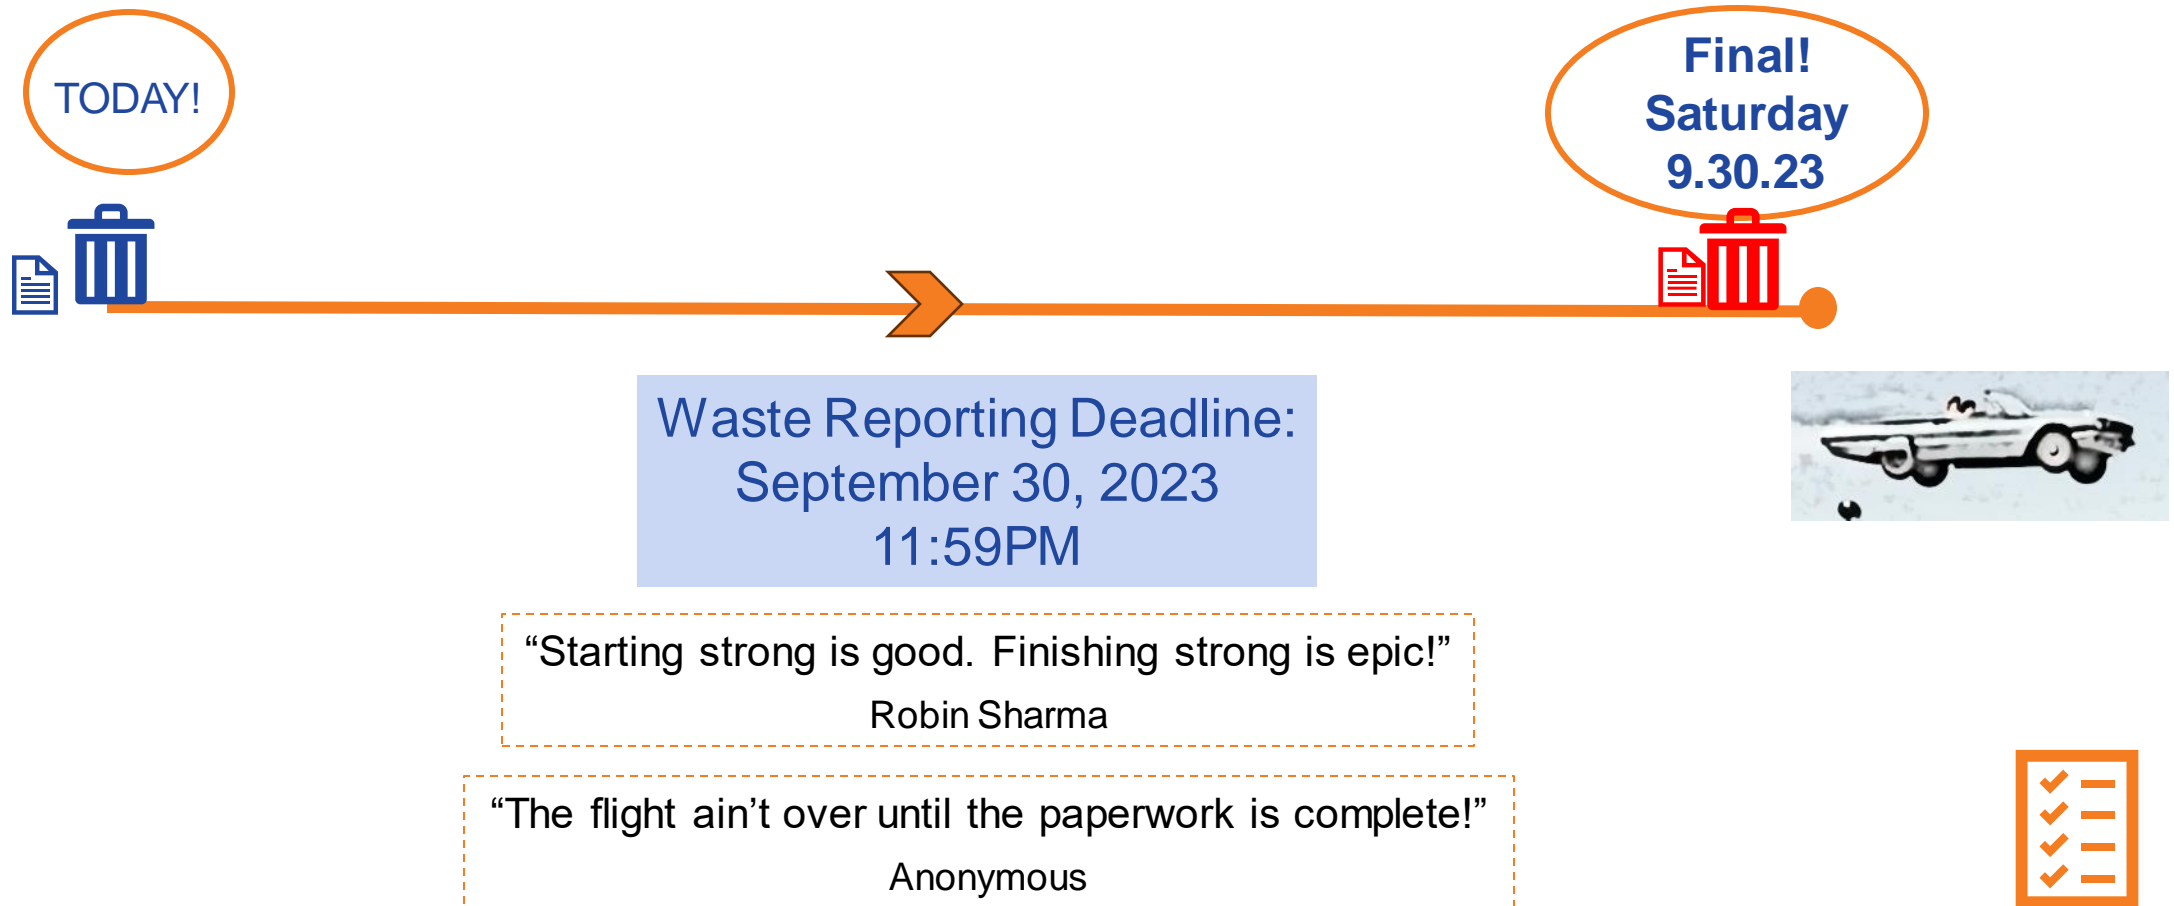

## Pfizer Diluent

- Pfizer vaccine for ages 6mo-4 years requires diluent: 1.1mL of normal saline
- Pfizer vaccine for ages 6mo-4 years supplied by the government will come with diluent!
- The diluent should arrive before the vaccine. If you do not receive the diluent by the time you receive the vaccine, you should report this as a shipping incident
- Do NOT use diluent from other vaccines (MMR, etc., for example) for the Pfizer vaccine. Use **only** the diluent supplied for the vaccine with which it was supplied with!

# What's New in My Turn? – Release 43

New updates for My Turn Public and Clinic launched on  
**Wednesday, September 20, 2023!**

## Release Highlights

### My Turn Public

When scheduling vaccine appointments, patients **are able to view:**

- ✓ A filter on the clinics that serve either insured or uninsured / under-insured patients based on the health insurance question
- ✓ The clinic phone number in the 'Clinic Details' section
- ✓ An updated description on the clinic card that says "Please contact the clinic to confirm the patient's insurance is accepted"

When scheduling vaccine appointments, patients **are no longer be able to view:**

- ✓ The 'Yes, but cannot provide information' option on the health insurance question

## Release Highlights

### My Turn Clinic

Clinic Managers and Vaccine Administrators **are able to:**

- ✓ Add multiple funding sources to a single vaccine inventory
- ✓ Select / update funding source on the Walk-in, IIS Edit, Inline / Bulk Upload, and Vaccine Administration flows
- ✓ Select vaccine supply for publicly or privately funded vaccines on clinic setup and clinic vaccine supply pages
- ✓ View / download new reports that include vaccine funding source and patient insurance information for billing purposes
- ✓ Add privately purchased vaccines to the clinic inventory

# Updated My Turn Dashboard: View Appointments by Funding Source

Clinic Managers can now view a new tile on the My Turn Clinic dashboard that displays details about appointments completed through various funding sources.

# What to Expect: My Turn and COVID-19 Vaccine Updates

## Privately-funded COVID-19 Vaccine Providers will need to:

Remove deauthorized vaccine supply. Do not remove deauthorized vaccine inventory to ensure continued historical vaccine appointment upload.

Add new vaccine supply\* and inventory. Mark the supply for **insured** populations. Add / update a required clinic phone number and clinic availability.

Cancel / update all existing appointments for the deauthorized COVID-19 vaccine.

## BAP Providers will need to:

Remove deauthorized vaccine supply. Do not remove deauthorized vaccine inventory to ensure continued historical vaccine appointment upload.

Add new vaccine supply\* and inventory. Mark the supply for **uninsured** populations. Add / update a required clinic phone number and clinic availability.

Cancel / update all existing appointments for the deauthorized COVID-19 vaccine.

**\*NOTE:** Vaccine supply is now distinguished by insurance status and will impact public clinic tags and scheduling.

# What's New in myCAvax? – Release 43

## New updates for Providers launched on Friday, September 22, 2023!

### Providers

#### Release Highlights

Providers can:

##### Shipment Incident

- ✓ See updated fields on the 'New Shipment Incident' pop-up window

##### Provider Community Site

- ✓ See an updated landing page displaying program tiles based on the Provider's program enrollment permissions
- ✓ See the 'Program Selected' dropdown on multiple pages based on the Provider's program enrollment permissions
- ✓ See orders on the 'Vaccine Orders' page based on the program selected from the 'Program Selected' dropdown
- ✓ See the COVID-19 or SGF 'Shipment Incidents' page based on the program selected from the 'Program Selected' dropdown
- ✓ See the COVID-19 or SGF 'Dashboard' page based on the program selected from the 'Program Selected' dropdown
- ✓ No longer see the 'Open Transfer Orders' pop-up window on the landing page

#### Vaccine Ordering – Provider

- ✓ See the COVID-19 or SGF 'Vaccine Order Request' page based on the program selected from the 'Program Selected' dropdown
- ✓ Be able to place vaccine order requests for SGF flu vaccine on the 'State General Fund - Vaccine Order Request' page
- ✓ Receive email notifications when their vaccine order request has been rejected or progressed to 'Fulfillment Pending'
- ✓ Receive a reminder email for an expiring COVID-19 or Outbreak draft order four days after the order creation date
- ✓ Have their draft orders deleted seven days after the order creation date; they will also receive a confirmation email for the same
- ✓ Be directed to the appropriate 'Vaccine Order Request' page when they click the 'Submit Order' button on a draft order

#### Location Account

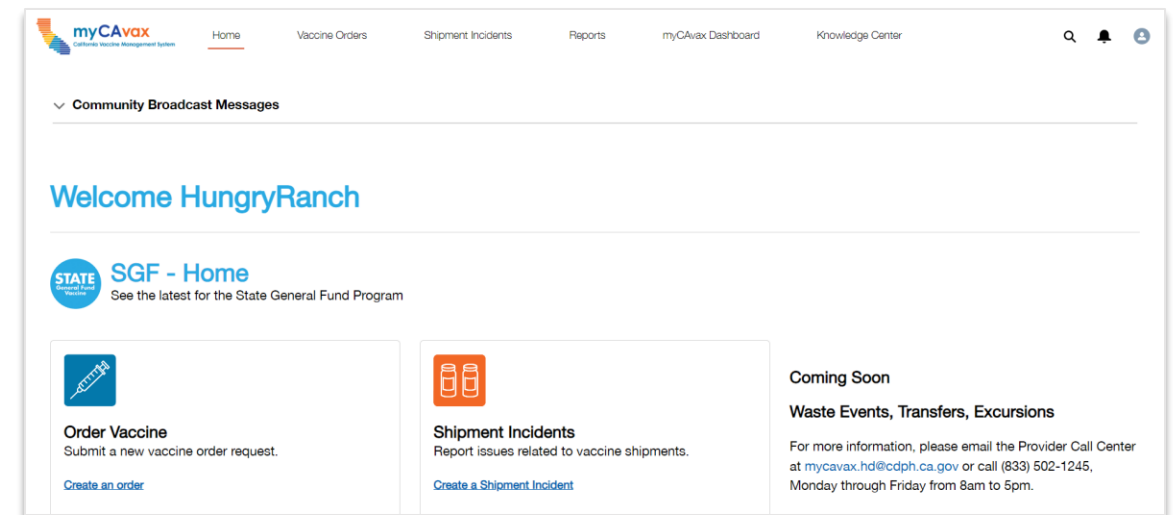

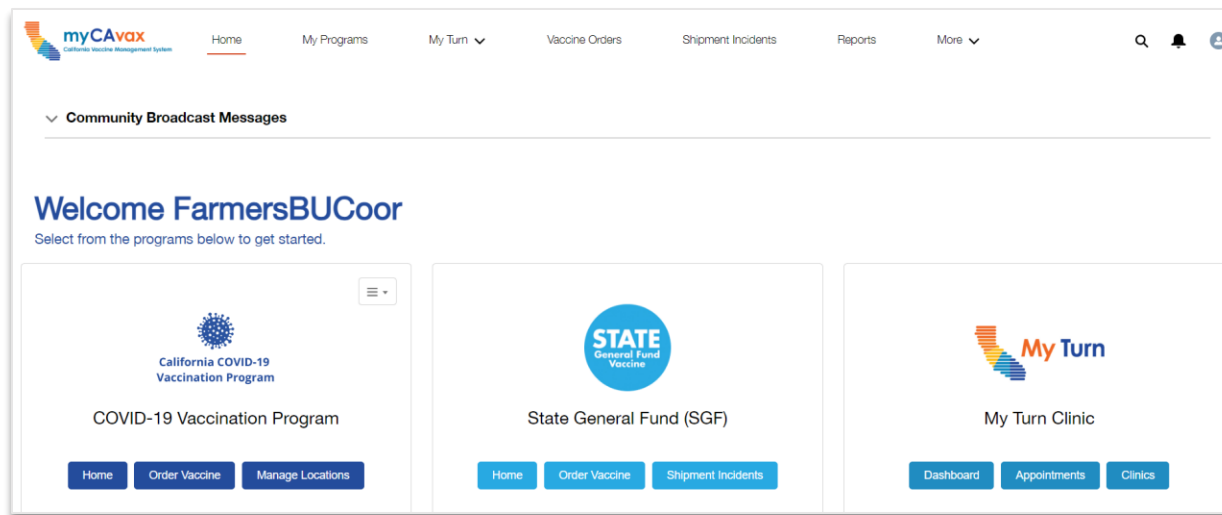

- ✓ Have their location account's sub-status updated to 'On-Hold' and the 'Reason for On-Hold' field updated with the 'Provider Account Changes' value when the shipping address fields are updated

# Personalized myCAvax Home Page

Providers participating in multiple programs will see a new multi-program home page while logging in to the Provider Community.

Providers participating in only one program will only see the program-specific home page while logging in to the Provider Community.

# State General Fund Flu Vaccine Supply Update

- Additional doses of **Fluarix** (adult intention) will be added to allocations this week
- **FluBlok** will **NOT** be available this season (Sanofi does not plan to bring any more doses to the market)
- **Fluad** is the replacement product for FluBlok:
  - Preferential vaccine for 65+
  - Licensed 65+
  - LHD allocations will remain the same as FluBlok
  - Doses expected to arrive during the week of Sept 25 (full order)

# Bridge Access Program: Eligibility Refresher

As a reminder, Providers serving uninsured / underinsured adults through Public Health Departments, Federally Qualified Health Centers (FQHCs) / Rural Health Centers, Tribal Clinics, and Indian Health Services sites are eligible for the Bridge Access Program (BAP).

Additional Providers deemed eligible by LHDs may also be able to enroll in BAP.

Suggesting a Provider for BAP enrollment?  
Contact the Provider Call Center for support at  
[providercallcenter@cdph.ca.gov](mailto:providercallcenter@cdph.ca.gov) or by calling  
(833) 502-1245, M-F from 8:00 AM to 5:00 PM PT.

# Bridge Access Program: Vaccine Reporting

As a reminder, Bridge Access Program (BAP) Providers are required to report doses administered (including eligibility category of 317) using My Turn or their EHR connected to CAIR.

For more information, please review the [BAP Provider Operations Manual](#) and the [BAP Requirements at a Glance](#) document.

# Bridge Access Program: Allocation and Ordering Update

BAP vaccine ordering was made available to Providers on **Monday, September 18, 2023**. Providers may expect additional ordering updates from CDPH via email.

## To prepare to order, Providers must:

- ✓ Complete required training\*
- ✓ Enroll their location in BAP in myCAvax
- ✓ Upload their signed Provider Agreement in myCAvax

**\*NOTE:** Required CDC product training has not been released. For now, review vaccine fact sheets.

# Bridge Access Program: Enrollment Update

To enroll in the Bridge Access Program, your Organization Vaccine Coordinator and / or Primary Vaccine Coordinator can complete the following steps:

1

Log in to myCAvax.

3

Select your COVID-19 program location from the pop-up window that appears on the home page.

2

Complete the required BAP training from the 'Training' tab in myCAvax.

4

Provide the required information and upload a copy of the signed BAP Provider Agreement.

5

Click the 'Submit' button and your COVID-19 location will be placed in the 'Active' status.

**NOTE:** If you have multiple locations eligible to participate in the Bridge Access Program, you will need to enroll each location individually.

For more information, please see the new [Enrolling in the Bridge Access Program](#) deck.

# myCAvax – Known Issues – *Updated 9/21*

## Known Issues

### **'Physician's Assistant' License Type on SGF Enrollment Leading to Endless Spinner**

- ✓ For LHD users still completing their State General Fund enrollment, if you add a Provider of Record with a license type of 'Physician's Assistant,' you will be met with an endless spinner when trying to complete the enrollment.

## Workaround / Next Steps

- ✓ Estimated Fix: TBD
- ✓ Workaround: Please use the 'Other' license type instead of 'Physician's Assistant' and leave a chatter note on the 'Program Location Application' record to let the enrollment team know that your Provider of Record is a 'Physician's Assistant.'

# Thank You: My Turn and myCAvax Monday Office Hours Team

CDPH hosted the first My Turn and myCAvax Monday Office Hours Webinar on **Monday, March 8, 2021**. Since then, we've hosted 87 sessions reaching 8,624 total attendees.

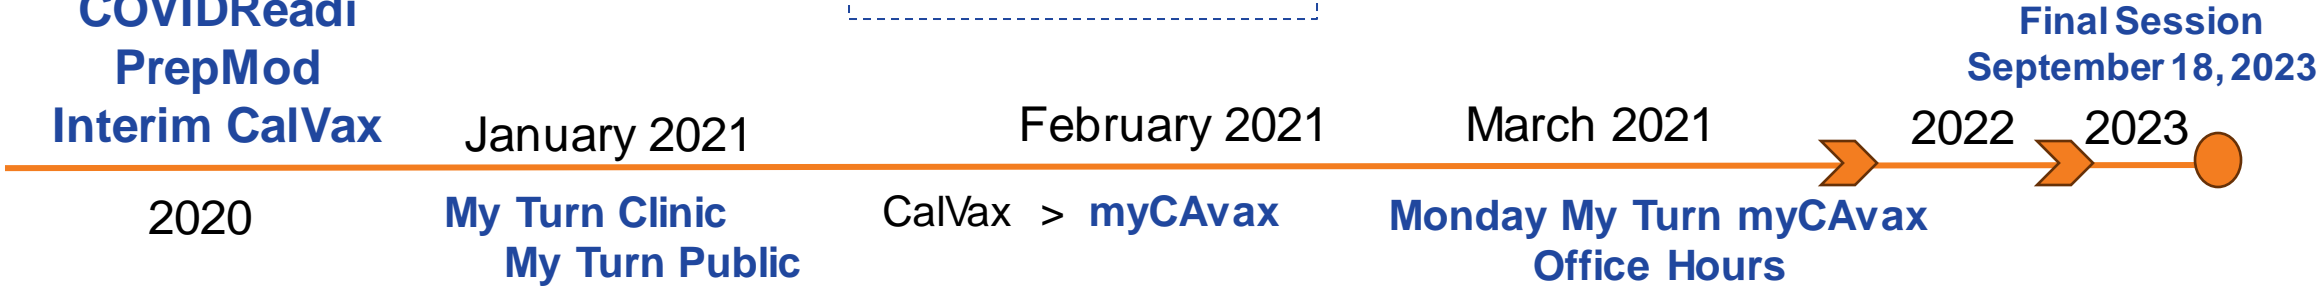

CDPH is grateful for your partnership and commitment to excellence.

And thank you, My Turn Mary!

Remember these names?

### Beyond Use Date (BUD)

The beyond use date, or BUD, is the last date or time that a vaccine can be safely used after it has been moved from one storage state to another (e.g., frozen to refrigerated) or prepared for patient use.

- The BUD replaces but does not extend the manufacturer expiration
- If vaccine has no beyond use date, use the expiration date
- Providers can use BUD storage labels to prevent vaccine administration past beyond use date or create a process to track BUDs

# COVID VACCINE QA TIPS: BEYOND USE DATES

### Use By Date

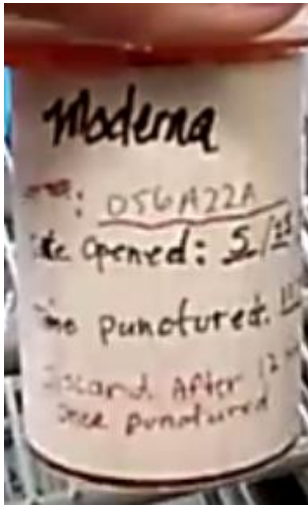

After first puncture, multidose vials have a shortened use-by-date/time; vial must be labeled with puncture date/time

- When evaluating storage units if punctured vials are present, check for use by date label or process used to track use by date.
- If vaccine has no beyond use date, use the expiration date
- Providers can use BUD storage labels to prevent vaccine administration past beyond use date or create a process to track BUDs

# COVID VACCINE QA TIPS: USE BY DATE

Vaccine	Vials Drawn	Initial Puncture	Use By Time	Doses Drawn
Pfizer Baby 6 mo - 4 yrs (0.2 mL)				1 2 3 4 5 6 7 8 9 10

# COVID-19 Testing and Therapeutics

Jessica deJarnette, MD, CDPH

# At-Home Test Eligibility and Ordering Criteria

- **CDPH is continuing to support organizations that serve the uninsured/underinsured, those with poor access to medical care, and those that are immunocompromised or over the age of 65.**
- LHDs should have received an email on September 8, 2023, advising that local health jurisdictions are eligible to request as many tests needed to support these organizations in their counties.
- **Over the next few months, the State is planning to transition from direct distribution of COVID-19 tests (for example directly to organizations/schools) to distribution solely to the LHJs by December 1, 2023.**
- **We encourage LHJs to order tests as needed and work on local test distribution plans.** CDPH is happy to work with LHJs on their plans and provide contact information of organizations in your jurisdiction that have been directly ordering from the state.

# At-Home Test Eligibility and Ordering Criteria

- Organizations eligible to directly request At-home tests include:
  - **Skilled Nursing Facilities and Long-Term Care Facilities:**
    - At-home tests for up to 16-week need to support residents, staff, and visitors with symptoms.
  - **Community Based Organizations:**
    - At-home tests for up to a 16-week need to support the uninsured/underinsured populations, those that have poor access to medical care, and those populations that are high risk. Populations that have Medicare B- as Medicare B does not cover at-home COVID-19 tests.
  - **K-12 Organizations:**
    - At-home tests for the fall semester, up to a 16-week, for K-12 schools, foster care, and before and after school programs.
    - Tests should be requested to support the uninsured/underinsured student populations.
    - Deadline to order for fall semester is October 31, 2023.

# At-Home Test Eligibility and Ordering Criteria

- **Early Childhood Education Programs:**
  - At-home tests can be requested for uninsured/underinsured students and staff only.
  - This is a one-time order request. Can request 8 tests per uninsured/underinsured person.
  - Deadline to order is October 31, 2023.
- **Community College Health Centers:**
  - At-home tests can be requested for uninsured/underinsured students only.
  - This is a one-time order request. Can request 8 tests per uninsured/underinsured person.
  - Deadline to order is October 31, 2023.

Questions? Please email [OTCtesting@cdph.ca.gov](mailto:OTCtesting@cdph.ca.gov)

# COVID-19 Test to Treat Reminders

## TESTING

- COVID-19 antigen tests continue to work on new variants
- For symptomatic people that test negative, recommend repeat testing at 24-48 hours
- Many over-the-counter tests have extended expirations by the FDA

## TREATMENT

- Oral antivirals remain very effective against all circulating variants, free to patients, and are in ample supply
- Patients should be evaluated for treatment regardless of vaccination or booster status
- There are many ways patients can access treatment if they are unable to see their healthcare provider
- Positive test not required for treatment

# Skilled Nursing Facility Populations

## Improve Therapeutic Access in Congregate Health Settings

- Skilled Nursing Facilities and congregate living settings have the best opportunity to test and prescribe within 5 days of symptoms.
- **Despite their high risk, only 1 in 4 nursing home residents with COVID-19 had been treated with evidence-based antiviral treatments by the end of 2022.**
- During the study period, there were 763,340 resident cases of COVID-19 and 136,066 residents treated for COVID-19 among 15,092 nursing homes, equating to an overall oral antiviral or monoclonal antibody treatment rate of 17.8% (95% CI, 17.4%-18.3%).
- By the end of 2022, 41.0% of facilities still had not reported any use.

# LTC Residents and Severe Risk for COVID-19

- Paxlovid and other COVID Tx are recommended for people with “risk of progressing to severe COVID-19”
- LTC facility residents, by definition, almost always fall in severe risk category
- Risk factors include older age, medical conditions, or being immunosuppressed
- Note that even when vaccinated and/or boosted, LTC residents are generally on higher end of risk continuum for other risk categories

# SNF and LTCF Surge Readiness

## Prepare Congregate Health Settings for COVID-19 Surge

- Providers are encouraged to minimize barriers to prescribing COVID-19 treatment prior to a Covid-19 surge by:
  - Working with residents' healthcare providers to specify patients' renal and hepatic function (whether normal or impaired)
  - Encourage providers to write orders for testing symptomatic residents
  - Make a plan for which treatment to prescribe if patients test positive
- Confirm pharmacy or infusion service provider supplies and options to accessing prescriptions.
- Encourage staff and providers to review the [Surge Readiness Fact Sheet](#).

# Updated COVID-19 Treatment Guidelines for Pregnancy

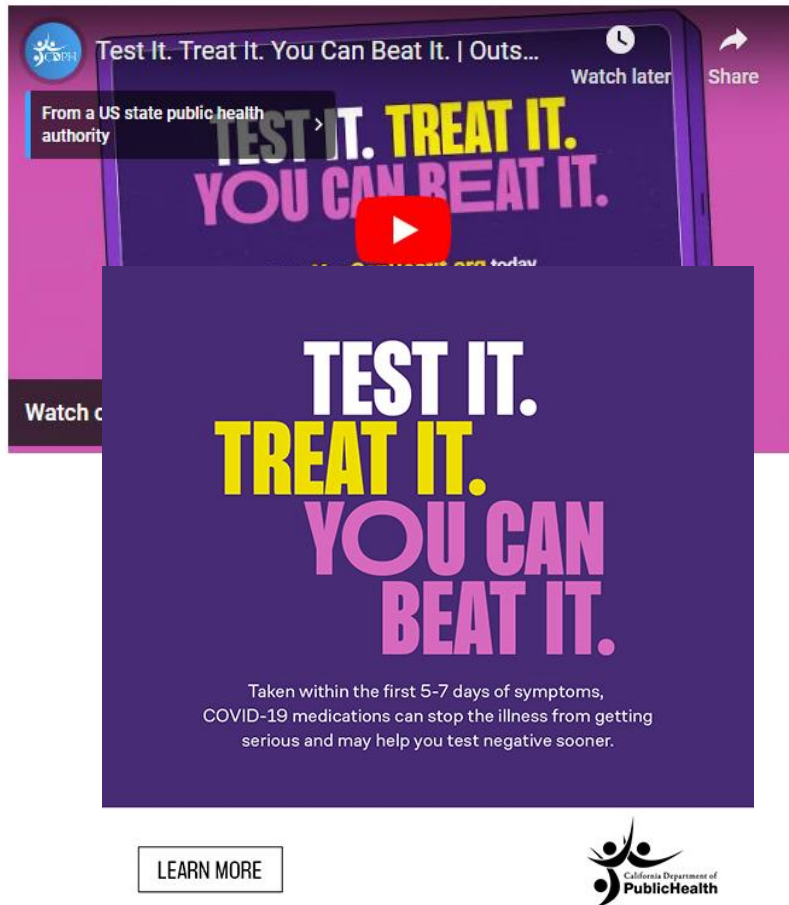

This summer updated guidelines for COVID-19 antiviral treatment for Pregnant and Lactating individuals was published on both the CDC and NIH treatment websites. Please look at the links below for the most up to date information.

## Video

Test It. Treat It. You Can Beat It. | Outs...

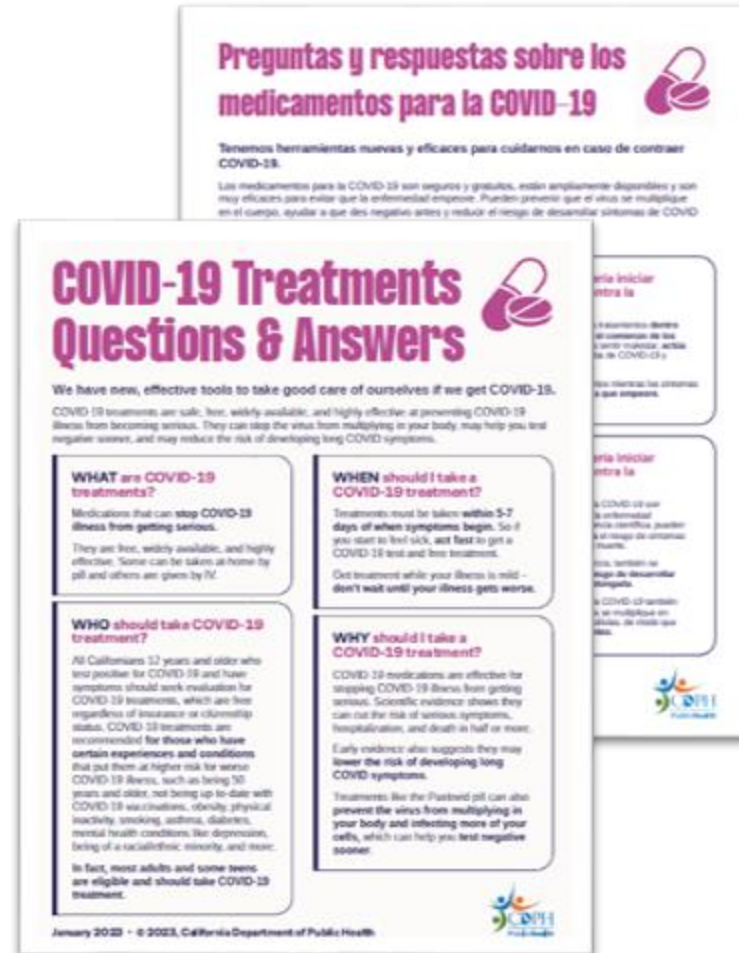

From a US state public health authority

TEST IT. TREAT IT. YOU CAN BEAT IT.

Taken within the first 5-7 days of symptoms, COVID-19 medications can stop the illness from getting serious and may help you test negative sooner.

LEARN MORE

California Department of PublicHealth

**Preguntas y respuestas sobre los medicamentos para la COVID-19**

Tenemos herramientas nuevas y eficaces para cuidarnos en caso de contraer COVID-19.

Los medicamentos para la COVID-19 son seguros y gratuitos, están ampliamente disponibles y son muy eficaces para evitar que la enfermedad empeore. Pueden prevenir que el virus se multiplique en el cuerpo, ayudar a que des negativo antes y reducir el riesgo de desarrollar síntomas de COVID.

**COVID-19 Treatments Questions & Answers**

We have new, effective tools to take good care of ourselves if we get COVID-19. COVID-19 treatments are safe, free, widely available, and highly effective at preventing COVID-19 illness from becoming serious. They can stop the virus from multiplying in your body, may help you test negative sooner, and may reduce the risk of developing long COVID symptoms.

**WHAT are COVID-19 treatments?**  
Medications that can stop COVID-19 illness from getting serious. They are free, widely available, and highly effective. Some can be taken at home by pill and others are given by IV.

**WHEN should I take a COVID-19 treatment?**  
Treatments must be taken within 5-7 days of when symptoms begin. So if you start to feel sick, act fast to get a COVID-19 test and then treatment. Get treatment while your illness is mild - don't wait until your illness gets worse.

**WHO should take a COVID-19 treatment?**  
All Californians 12 years and older who test positive for COVID-19 and have symptoms should seek evaluation for COVID-19 treatments, which are free regardless of insurance or citizenship status. COVID-19 treatments are recommended for those who have certain experiences and conditions that put them at higher risk for serious COVID-19 illness, such as being 50 years and older, not being up-to-date with COVID-19 vaccinations, obesity, physical inactivity, smoking, asthma, diabetes, mental health conditions like depression, being of a racial/ethnic minority, and more. In fact, most adults and some teens are eligible and should take COVID-19 treatment.

**WHY should I take a COVID-19 treatment?**  
COVID-19 medications are effective for stopping COVID-19 illness from getting serious. Scientific evidence shows they can cut the risk of serious symptoms, hospitalization, and death in half or more. Early evidence also suggests they may lower the risk of developing long COVID symptoms. Treatments like the Paxlovid pill can also prevent the virus from multiplying in your body and infecting more of your cells, which can help you test negative sooner.

March 2023 • © 2023, California Department of Public Health

**COVID-19 Surge Readiness: Long Term Care Facilities**

Outreach to providers caring for your residents:

## COVID-19 Surge Readiness

### Best Practices for Skilled Nursing Facilities

**Saving lives and avoiding hospitalizations**

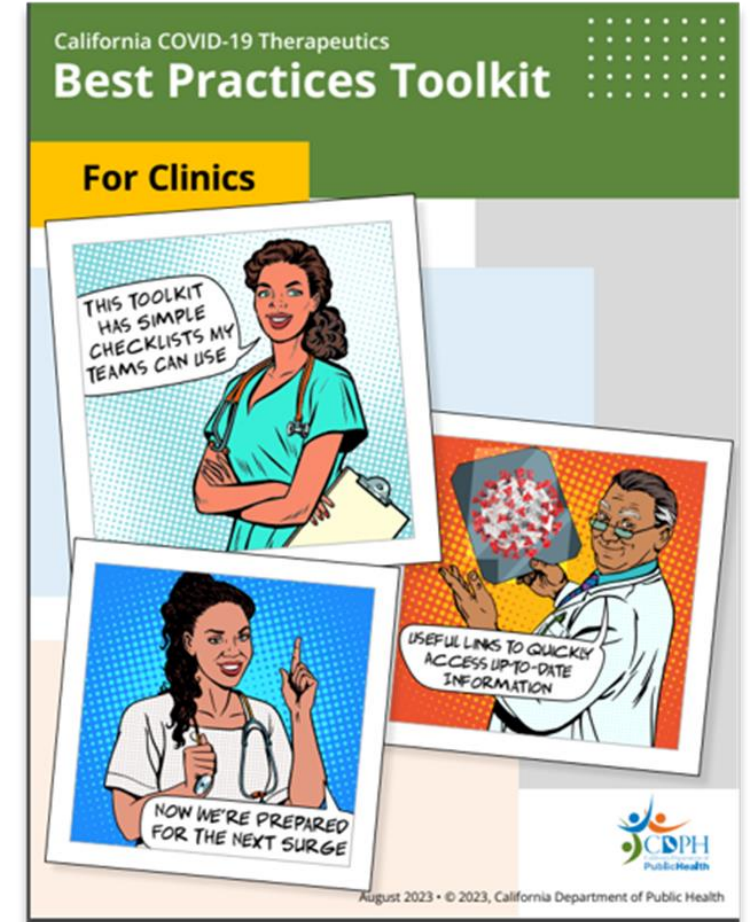

Lives are being saved (and hospitalizations avoided) with timely COVID-19 treatments. Treatments are safe and effective, even with changing variants. Treatments can keep residents, clients and staff from developing severe disease and may help them test negative for COVID-19 sooner. Preparing before a positive COVID-19 case occurs will help residents and staff get treated faster.

This notice reminds providers that ALL long term care residents are considered at higher risk for severe COVID-19 and the decision to not prescribe COVID-19 treatment should be reserved for situations in which the risk of prescribing clearly outweighs the benefits of treatment in preventing hospitalization, death, and the potential for reduced risk of long COVID.

The California Department of Public Health (CDPH) COVID-19 Therapeutics Task Force wants to support you in getting ready for potential COVID-19 surges in your facility. CDPH understands that facilities do not control the actions and decision of individual health care providers. However, you can help facilitate treatments for your residents and staff with preparedness education, awareness, and getting the right plans into place. The CDPH COVID-19 Therapeutics Task Force is available to assist you with developing best practices and education for your situation. You can contact us at [COVIDRxProviders@cdph.ca.gov](mailto:COVIDRxProviders@cdph.ca.gov) or give us a call (833) 502-1245 from Monday to Friday 8am to 6pm. You can also use the Provider COVID-19 Call Center email: [covidcallcenter@cdph.ca.gov](mailto:covidcallcenter@cdph.ca.gov).

**Surge preparedness tips: baseline strategies**

- Encourage wearing masks with good fit and filtration like N95s, KN95s and KF94s
- Isolating and cohorting ill patients
- Testing staff and residents with symptoms
- Preparing for increasing use of COVID-19 treatments:
  - Reach out to your residents' health care providers
  - Confirm supply with your pharmacy, if possible
  - Develop a plan
  - Educate your staff
  - Inform resident/resident representatives of treatment availability

# COVID-19 Oral Antivirals

## Message from the CDPH Warehouse Team:

*"In 2022, the total number of hospitalizations was higher than those experienced prior to the COVID-19 pandemic. As we transition into the 2023 fall influenza, RSV, and COVID-19 season, the CDC is warning of another "triple-demic", similar to last year's. We expect COVID-19 therapeutic allocations to remain static in the coming months, but the CDPH warehouse has an available stockpile of Paxlovid, Paxlovid Renal, and Molnupiravir which we can provide directly to providers/local health departments in addition to their weekly allocation. Expiry dates are similar to those therapeutics shipped by Cencora (formerly known as AmerisourceBergen)."*

If you need extra/above allocation:

Please provide with the following information to your reply **in the weekly email body and not directly on the Order Sheet:**

- Provider Pin
- County
- Provider Name
- Product name and quantity

❖ Please ensure your inventory is updated in HPOP to keep the **COVID-19 Therapeutics Locator** accurate.

# COVID-19 Vaccine Provider FAQs

- Answers to provider questions
- Updated 9/14/2023
- Currently in its 132nd iteration!

**Q: Following FDA authorization and CDC recommendations for the updated 2023-2024 COVID-19 vaccines, are bivalent mRNA COVID-19 vaccines still authorized for use?**

**A:** No. Bivalent mRNA COVID-19 vaccines are no longer authorized for use. To prevent [vaccine administration errors](#), Providers should report and dispose of COVID-19 vaccines:

- Remove all bivalent mRNA COVID-19 vaccines from storage units regardless of expiration dates.
- Dispose of all bivalent mRNA COVID-19 vaccine vials in pharmaceutical waste containers or comingled pharmaceutical/sharps waste containers in accordance with local regulations and practice protocols for the disposal of regulated medical waste.
- Inactive providers can now report waste in myCAvax. The waste reporting deadline is Saturday, September 30, 2023, by 11:59PM. Report vaccine products as “Waste” in myCAvax and use “Other” to add comment “deauthorized.”

# CA Bridge Access Program: At a Glance

## Requirements at a Glance

This document will be continuously updated as information and new resources become available.

COVID-19 vaccine product and CDC's Vaccine Product Training will be posted after FDA authorization/CDC recommendation.

**Who's Eligible:** Providers serving uninsured/underinsured adults through public health departments, Federally Qualified Health Centers (FQHCs)/Rural Health Centers, tribal clinics, Indian Health Services sites, and additional providers deemed eligible by LHDs

**What You Need to Know:** The California Bridge Access Program provides no-cost COVID-19 vaccines to uninsured/underinsured adults (19 years and older) served by enrolled and approved providers. Vaccine supply is limited. Insured patients—including patients covered by Medicare and Medi-Cal—are NOT eligible. Providers must conduct eligibility screening and proper documentation with each administration to ensure vaccines go to eligible adults. Limited supplies of the updated monovalent (XBB subvariant) COVID-19 vaccine will be provided through two components of the state program:

**Program Components:**

- Public Health Component:** Coordinated by State Immunization Programs, in collaboration with existing public health infrastructure. CDPH will allocate to each LHD doses of COVID-19 vaccines based on federally provided vaccine purchase funding limits. Doses allocated will support vaccination of uninsured and under-insured populations at local health departments, FQHCs/RHCs, Tribal and IHS clinics, and other safety net providers selected by LHDs for enrollment in the CA Bridge Access Program.
- Pharmacy component:** Independently coordinated by CDC with 3 contracted pharmacy chains/organizations: CVS, Walgreens, and E-True North (for independent and other pharmacies), who will receive supplies replenished by the COVID-19 Vaccine manufacturers directly; the specific sites receiving vaccine are not yet determined, and enrollment information is still forthcoming. All information in this document addresses the public health component.

Topic	Requirements & Guidance	Resource Links
	<b>What's new for existing COVID-19 providers?</b> California's BAP Provider Participation Agreement replaces the federal COVID-19 Provider Agreement. While most requirements remain the same, look for orange stars identifying new requirements and job aids to assist you.	
Primary Documents	<ul style="list-style-type: none"><li><a href="#">BAP Provider Participation Agreement</a></li><li><a href="#">BAP Provider Operations Manual</a> (and <a href="#">Startup Worksheet</a> for new providers)</li><li><a href="#">COVID-19 Vaccine Commercialization FAQs</a></li></ul>	

Overview document links requirements and guidance to new resources!

Topics include:

- Provider Participation Agreement
- Required Vaccine Product Training
- Storage and Handling
- Reporting
- Vaccine Product Information
- Fact Sheets
- Much more to explore!

## BAP Requirements at a Glance

# CA Bridge Access Program Provider Operations Manual

This manual provides step-by-step instructions and links to available resources.

## Audience:

- Existing COVID-19 vaccine providers new to BAP
- New BAP organizations & locations

**Startup Worksheet**  
(for new organizations & locations)

# New EZIZ BAP Resources Page!

## Eligibility Screening & Documentation

**Eligibility Based on Insurance Status**

**Bridge Access Program**

A limited supply of COVID-19 vaccine will be made available through the Bridge Access Program for uninsured and underinsured adults (21 years and older) to prevent loss of access when vaccine transition to the commercial market. Insured patients—including patients covered by Medicare and Medi-Cal—are **NOT** eligible for the COVID-19 vaccines provided through this program. This temporary program will sunset at the end of 2024.

**✓ Eligible for COVID-19 Vaccine through BAP (317 Funds)**

Patient health insurance status:

- **Uninsured/No Insurance** (includes those who receive primary care through county safety net programs; these are **NOT** considered health insurance)
- **Underinsured** (has health insurance, but the insurance does not include any vaccines; insurance covers only selected vaccines; insurance does not provide first-dollar coverage for vaccines.)
- **Insurance NOT through Medi-Cal or Medicare** (only eligible for COVID-19 vaccines if **NOT** covered by patient's private insurance plan)<sup>1</sup>

**✗ Not Eligible for COVID-19 Vaccine through BAP (317 Funds)**

Patient health insurance status:

- **Medi-Cal Fee-For-Service/Medi-Cal Managed Care** (not **by** CAhealthplans)
- **Medicare Part B** (medical benefit) **AND** Part D (prescription drug benefit)
- **Medicare Part B Alone**
- **Medicare Part D Alone**
- **Insurance NOT through Medi-Cal or Medicare<sup>1</sup>**

1. Fully insured adults whose insurance covers the cost of the vaccine(s) are **NOT** eligible for COVID-19 vaccine—even if the insurance includes a high deductible or co-pay, the plan's deductible has not been met, or the insurance has cost sharing.

California Department of Public Health, Immunization Branch | BAP-12473 (01/23)

**317 (VFA & BAP) Eligibility Screening & Documentation Requirements**

**1. Screen for Eligibility**

Eligibility screening must be conducted prior to the administration of any 317-funded vaccine (e.g., Vaccines for Adults and Bridge Access Programs). Eligibility is self-reported by the patient and verification of eligibility can be obtained verbally from the patient.

- ✓ **Eligible for VFA and/or BAP (COVID) vaccines if at least 19 years of age and**
  - 1. Has no insurance, or
  - 2. Is underinsured (public or private health insurance does not cover all vaccines or covers vaccines with a fixed dollar limit which has been reached)
- ✓ **Eligible for certain VFA vaccines if at least 19 years of age and**
  - 3. Has Medicare Part B, but **NOT** Part D; patient is eligible for:
    - Hep A
    - Hep B (if considered low risk for Hep B)
    - HPV, MMR, Varicella, and Zoster
    - Td (if no wound exposure) and Tdap
  - 4. Has Medicare Part D, but **NOT** Part B; patient is eligible for:
    - Hep B, PCV20

**2. Document Patient's Eligibility**

There are three important elements to include when you document a patient's eligibility:

1. Date of screening.
2. If patient is eligible for the Vaccines for Adults (VFA) and/or Bridge Access Program (BAP)
3. If patient is eligible **AND** at least 19 years of age, document which of the criterion above is met

**3. Use a Compliant Record Keeping System**

- **CAIR and Electronic Health/Medical Record (EHR/EMR)**  
Note: If your practice's EHR/EMR does not capture all the necessary screening elements, they may be documented in the system's notes section.
- **CAIR and 317 Eligibility Screening Form (MM-1226)**

Make sure to maintain patient eligibility screening records for a minimum of 5 years. [Refer to the 317 CAIR Documentation Requirements.](#)

**4. Communicate the Patient's Eligibility**

All staff should be knowledgeable of eligibility. Ensure practice protocols are in place so vaccination know when to use 317-funded versus private vaccines.

California Department of Public Health, Immunization Branch | BAP-1476 (01/23)

**317 (VFA & BAP) Eligibility Screening Record for Adult Patients**

At each immunization visit, determine if patients are eligible for COVID-19 vaccines (if participating in the Bridge Access Program) and/or other routinely recommended vaccines through 317 funds (e.g., VFA).

**Patient Information**

Patient Name (Last, First, MI) \_\_\_\_\_ Date of Birth: \_\_\_\_\_

Provider Name: \_\_\_\_\_

**Eligibility Criteria for 317-Funded Vaccines (e.g., VFA and BAP)**

- ✓ **Eligible for VFA and/or BAP (COVID) vaccines if at least 19 years of age and**
  - 1. Has no insurance, or
  - 2. Is underinsured (public or private health insurance does not cover all vaccines or covers vaccines with a fixed dollar limit which has been reached)
- ✓ **Eligible for certain VFA vaccines if at least 19 years of age and**
  - 3. Has Medicare Part B, but **NOT** Part D; patient is eligible for:
    - Hep A
    - Hep B (if considered low risk for Hep B)
    - HPV, MMR, Varicella, and Zoster
    - Td (if no wound exposure) and Tdap
  - 4. Has Medicare Part D, but **NOT** Part B; patient is eligible for:
    - Hep B, PCV20

**Document Patient's Eligibility**

Write the screening data and check appropriate status. (Note: verification of responses is not required. Keep this record for at least 5 years and make it available to state or federal officials upon request.)

Screening Date	✓ Eligible for VFA and BAP (COVID) (No insurance)	✓ Eligible for VFA and BAP (COVID) (Underinsured)	✓ Eligible for some VFA vaccines (Medicare Part B or Part D only)	✗ Not Eligible for BAP (COVID) (Medicare Part B or Part D only)	✗ Not Eligible for VFA or BAP (COVID) (Both Medicare Part B & D or insurance pays for vaccine)

# Commercialization at a Glance: Provider Transition Guide

## Commercialization at a Glance: Provider Transition Guide

California COVID-19 Vaccination Program

Commercialization is the transition of COVID-19 medical countermeasures—vaccines, treatments, and test kits—previously purchased by the U.S. Government (USG) to established pathways of procurement, distribution, and payment by both public and private payers. This guide summarizes the [HHS Commercialization Transition Guide](#), [HHS Bridge Access Program Fact Sheet](#), and CDPH guidance as the USG prepares to stop distributing COVID-19 vaccines and vaccines transition to the commercial market. Updated topics highlighted below. Sections include:

- Fall Transition Timeline
- Sunsetting of the Federal COVID-19 Vaccination Program
- Commercialization of COVID-19 Vaccines
- Anticipated Vaccination Schedule for the Fall

Topic	Guidance	Effective Date
Section 1	Fall Transition Timeline	
	<div><div><div>Week of July 31, 2023</div><div>• CDC set vaccine thresholds to -0- in anticipation of decreased vaccine demand</div><div>• Providers were asked to order a 2-month vaccine supply to last until new products are approved by FDA</div><div>• Vaccine doses can still be ordered by States, but the processes, timing, and cadence for ordering processing will change. Based on doses ordered, we ask CDC for allocations, wait 1-3 days for doses, then transmit orders to CDC.</div></div><div><div>August 3-Early September</div><div>• Providers may still submit additional Small Orders if needed. But these are NOT sent to CDC. These are fulfilled locally/TPR.</div><div>• Larger orders are now only available to LHDs/MCEs.</div><div>• ALL healthcare providers are advised to begin planning, prebooking or procuring COVID-19 vaccine doses for privately insured individuals.</div><div>• States begin to plan closeout of USG COVID-19 Program, and implementation of much smaller Bridge Access Program, and addition of COVID-19 vaccines to VFC Programs.</div></div><div><div>TBD (expected early to mid-September)</div><div>• FDA decisions and amendments to Emergency Use Authorizations (EUAs) / Biologics License Applications (BLAs) Approve new products, and de-authorized current products.</div><div>• Concurrently, USG WILL discontinue distribution of current COVID-19 vaccine composition.</div><div>• Advisory Committee on Immunization Practices (ACIP) discussion on COVID-19 epidemiology and vaccine effectiveness and CDC recommendation.</div><div>• CDPH and LHDs work on BAP provider enrollment, and prepare for COVID-19 ordering for BAP Provider and VFC Providers.</div></div><div><div>TBD (ACIP Recommendation + 2 weeks=Late September/Early October)</div><div>• Fall vaccine availability for administration begins across all eligible age groups, with corresponding vaccine supply based on insurance coverage, and eligibility for providers participating in VFC or CA's Bridge Access Program.</div><div>• Providers will dispose of any remaining supply of de-authorized COVID-19 vaccines.</div></div></div>

**A special thank you to myriad COVID-19 presenters, partners, and subject matter experts!**

We wish to thank COVID-19 Providers throughout the State of California. Your efforts opened windows of hope during the pandemic. California reopened has been changed for the better because of you! ...and, as always, we wish you all the best, as we continue to work together to vaccinate California!
