How to Have Effective Conversations with Parents about COVID-19 Vaccines for Children

November 10, 2021
Housekeeping

For Panelists: Please remember to mute yourself when not speaking.

For Attendees: Please access today’s slides through the following link: https://eziz.org/covid/

Please use “Q&A” to ask a question.

If you have technical difficulties, please contact samuel.kerr@cdph.ca.gov
Questions and Answers

Please use the Q&A panel to ask a question
Webinar Objectives

Provide attendees with:

• The latest updates on pediatric COVID-19 vaccination.

• Key messages addressing common concerns among parents about the COVID-19 vaccine.

• Communication tools for effective patient conversations.
We appreciate your feedback

How confident are you in your ability to effectively speak with patients about COVID-19 vaccines?

1. Very confident
2. Confident
3. Somewhat confident
4. Slightly confident
5. Not confident

Tips for Effective Conversations with Parents about COVID-19 Vaccines for Children

Eric Ball, MD, FAAP

#ThisIsOurShot, AAP-CA, CIC
Confirmed Cases by Age in California

- Children aged 0-17 are making up a greater proportion of total cases.
- 15% of total cases in California were in Children aged 0-17.
- Vaccinating children will play a critical role in continuing to limit the spread of COVID-19.
Unvaccinated and Vaccinated Cases in California

From October 18, 2021 to October 24, 2021, unvaccinated people were **6.8 times more likely** to get COVID-19 than fully vaccinated people.
Pediatricians are the Most Trusted Source of Information about COVID-19 Vaccines

Hierarchy of Information Needs

As those undecided navigate the decision-making process, safety is the most important consideration.

- **Safety**: How will the vaccine affect me? What side effects can I expect?
- **Efficacy**: Do the vaccines work? If I already had COVID-19, why do I need to get the vaccine?
- **Development Process**: How were the vaccines developed so quickly?
- **Access**: Do I need insurance?
3-5-3 Methodology

3 Steps to Initiating Conversations → 5 Key Messages → 3 Steps Post-Conversations
3 Steps to Initiating Conversations

1. Ask and listen to the answer
   - “What do you think about the vaccine?”
   - “Why do you feel that way?”
   - “What concerns do you have about the vaccine?”

2. Create an alignment of safety
   - “I would be scared too. Let’s do what’s safe here.”
   - “We both want what’s safest for you.”

3. Find common goals
   - “We all want our kids back in schools.”
   - “We all want to be able to safely be with our loved ones again.”
   - “What reasons would motivate you to get vaccinated?”
   - Find their personally motivating reason.
5 Key Messages

1. The vaccine will keep you safe.

The vaccine will protect you from getting very sick. Over 176 million Americans have been safely vaccinated and are now protected.
2. Side effects are common.

Side effects are a sign your body is activating to protect you. For a few days after vaccination, many people temporarily feel:

- Sore arm (at administration site)
- Tired or fatigue
- Headache
- Muscle pain
- Joint pain
3. Vaccines are very effective.

Each vaccine is extremely effective at preventing hospitalization and death from COVID-19 and its variants. It will allow us to do the things we love and miss most. Vaccinated individuals can get a mild COVID-19 infection.
4. The vaccine is built on 20 years of research and science.

It is good to be careful when new things come along. Health experts took all the necessary steps to produce a safe vaccine, and it was built on 20 years of research and science.
5. Have questions? Please ask.

I’m glad that you want to know more. Ultimately, the choice is yours. If you have questions, talk with your doctor or healthcare provider soon. Go to myturn.ca.gov or text your zip code to GETVAX or VACUNA to get your free vaccine today.
3 Steps Post-Conversation

1. **Acknowledge their agency and personal choice**
   
   “I want you to get vaccinated today, but ultimately it’s your choice.”

   “I’m here as a resource to help you.”

2. **Keep lines of communication open**
   
   Trust is a journey. Give folks a way to reach you that you are comfortable with as they consider their decision.

3. **Offer to find a vaccine**
   
   Offer myturn.ca.gov or have them text their zip code to GETVAX or VACUNA to find a free vaccine location in their neighborhood.
Common Concerns Among Parents

“COVID-19 does not affect children.”

- Over 6.4 million children have become ill with COVID-19 (17% of all cases nationwide).
- Almost 60,000 children have been hospitalized with COVID-19 since August 2020 and over 600 have died.
- 5,200 children were hospitalized with Multisystem Inflammatory Syndrome (MIS-C).
- More than 140,000 children have lost a caregiver.
Common Concerns Among Parents

"The vaccine causes myocarditis."

- Myocarditis is an extremely rare and mild side effect of some COVID-19 vaccines, particularly in young men (ages 16-29).
- Risk is around 2 per 100,000 people (highest risk group is 10 per 100,000 people).
- Cases are mild and almost always self-limiting.
- Myocarditis occurs in about 150 per 100,000 patients with COVID-19 disease.

Common Concerns Among Parents

"The vaccine was rushed."

- 7.1 BILLION doses of COVID-19 vaccines have been given worldwide; almost 50% of the world’s population has been vaccinated.
- COVID-19 vaccines have been widely given now for almost a full year.
- Over 4,000 children participated in the trial for 5–11-year-old Pfizer vaccines and no safety concerns were found.
- All steps in traditional trials were done and the number of patients in clinical trials was similar to previous vaccine trials.
"The vaccine causes infertility"

- Many medical studies have shown no differences in pregnancy success rates in people who are vaccinated versus people who have not received the vaccine.

- Over 170,000 pregnant women have been monitored by the CDC v-safe system with no concerns about their pregnancies.

- A major study of over 35,000 pregnant women showed that the COVID-19 vaccine "did not show obvious safety signals among pregnant persons who received mRNA COVID-19 vaccines".

Common Concerns Among Parents

“It’s better to get immunity from the disease”

• Recent studies suggest that immunity from vaccination is superior than immunity from a case of COVID-19 disease.

• Rates of ‘breakthrough’ disease were 5.5 times higher in those with prior disease versus those vaccinated.

• It is recommended that everyone get vaccinated, even those with a prior COVID-19 infection.
Common Concerns Among Parents

“I’m worried about long-term effects of the vaccine”

• Historically, adverse effects of all vaccines almost always happen within 6 weeks of receiving a vaccine dose.

• Billions of people have received COVID 19 vaccines with no “long term” side effects noted (after almost a year and more than a year for trial participants).

• “Long haul COVID” has been described extensively in adults and children but studies of prevalence in children are ongoing.

• If families are worried about long term effects, the vaccine is far safer than the effects of COVID disease.

#ThisIsOurShot Toolkit
30 Conversations Campaign

COVID-19 VACCINE CONVERSATIONS

TOP 5 MESSAGES

SAFETY
The vaccine will protect you from getting very sick from COVID. Over 130 million Americans have been safely vaccinated and are now protected.

SIDE EFFECTS
Side effects are common. They are a sign your body is building up its defenses to protect you. Many people temporarily feel:
1. Sore arm (near site of vaccination)
2. Fatigue
3. Headache
4. Muscle pain
5. Joint pain

EFFECTIVENESS AND VARIANTS
Each vaccine is nearly 100% effective at preventing hospitalization and death from COVID and its variants. It will allow us to do the things we love and miss most. Vaccinated individuals can get a mild COVID infection.

SPEED
It’s good to be careful when new things come along. Health experts took all the necessary steps to produce a safe vaccine, and it was built on 20 years of research and science.

QUESTIONS?
I’m glad you want to know more. Ultimately, the choice is yours. If you have questions, talk with your doctor or healthcare provider soon. Text your zip code to GETVAX (438829) to get your free vaccine today.

Help spread the truth about COVID vaccines.

YOUR KIDS SHOULD GET THE COVID-19 VACCINE

TOP 5 REASONS

Your Kids Should Get the COVID-19 Vaccine

With students heading back to in-person instruction, here are some things you need to know about protecting your children with the COVID-19 vaccine.

1. Unvaccinated children are at risk of getting COVID-19, and can suffer very serious complications, and potential lifelong impacts that we are still learning about. The vaccine is safe and effective, and no long-term problems have been seen for any vaccine.

2. The science behind the vaccine has been under development and studied by the U.S. Department of Health and Human Services for over 20 years.

3. Getting those who are eligible vaccinated can help keep school communities safe.

4. Kids have missed critical social and emotional milestones with their school community. Getting them safely back to the classroom and their favorite after-school activities helps support their mental health and wellness.

5. Vaccines are safe, effective, and free, regardless of insurance or immigration status.

Get your children back to school safely. Get them vaccinated against COVID-19 today! Learn more at VaccinateALL58.com.

Next 30 Conversations in 30 Days Webinar

How to Have Effective Conversations about COVID-19 Vaccination and Fertility & Pregnancy

**Speakers:** Dr. LaTanya Hines and Dr. Michael Policar, OB-GYNs

**When:** Thursday, November 18 from 12:30PM – 1:30 PM

Register [here](#)
We appreciate your feedback

I will commit to talking to 30 patients or clients in 30 days about COVID-19 vaccines.*

1. Yes
2. No

* By choosing yes, you will opt in to weekly #ThisIsOurShot “Hero Alerts” with the latest information on COVID-19 vaccine misinformation trends and conversation resources.
Special Thanks to
Today's Presenter:
Eric Ball, MD, FAAP

Webinar Planning & Support:
Leslie Amani, Michael Conrique, Edgar Ednacot,
Rachel Jacobs, Sam Kerr
Thank you for your commitment to protect the health and well-being of all Californians

And for joining today's webinar!
