

VFC Providers

COVID-19 is still a threat. We need YOU to protect vulnerable Californians.

Medi-Cal-eligible families have lower rates of immunization and higher rates of illness.

You have the skills and equipment to help now!

- COVID-19 vaccines, including Pfizer, can be now stored in **routine** units (freezers and refrigerators) that meet VFC standards. **Ultra-low freezers are not required.**
- VFC providers able to provide COVID-19 vaccines to all (not just kids or VFC patients).

Reimbursement

- \$40 per dose administration [reimbursement](#) for Medi-Cal patients and contracted rates for commercial insurance plans
- [CalVaxGrant](#) offers **up to \$55,000** per organization to help with enrollment, staffing, technology and overhead. The current application deadline is October 15, 2021.
- COVID-19 vaccine supplies are free.

Updates make it easier

- Contract with State TPA (Blue Shield) no longer needed.
- Smaller orders of vaccine are now available by the vial, requiring less storage space.

What do I need to do?

- Review program requirements and enroll in the myCAvax system.
- Report administered doses to your local immunization registry within 24 hours.
- Report unused Inventory daily into VaccineFinder.
- Training and support are a click or call away: Visit the [California COVID-19 Vaccination Program website](#)
