1. Super Users

My Turn Public Updates

Scheduling an Appointment

functionality

Patient Information

Race & Nationality question is now a multiselect – picklist.

interface

Confirmation Page

Vaccine Brand and dose confirmation have been added to the bottom of the page.

interface

New Tags for Select a Location –Homebound Flow

When selecting a clinic location for the appointment, clinics have updated tags to include the vaccine type and dose types offered at that location.

Find Walk-In Clinic

interface

Walk-In Clinic

New tags for clinics that offer free flu vaccine.

My Turn Clinic: Clinic Manager Updates

Clinics Tab

functionality

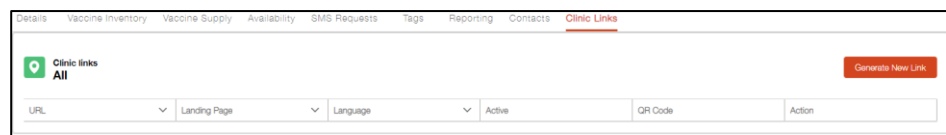

Access Codes

- Clinic managers previously had to go through an external team to generate access codes; With this update, clinic managers will be able to generate codes for their own clinic.
- Refer to the **flu– Set Up a Clinic** quick sheet on the My Turn Knowledge center to find the steps on how to generate the codes.

functionality

Clinic Links

- Generate clinic-specific link button has been removed.
- Clinics Link tab has been added and includes all clinic-specific generated links.

functionality

Clinic Set up – Nasal Spray

- Checkbox for Nasal Spray has been removed.
- Tag will automatically be added when you enter the vaccine supply.

My Turn Clinic: Vaccine Administrator Updates

Add Walk-In Appointment Tab

functionality

Walk-In Appointment

- State field and Zip Code field have been reorganized for clarity.
- Race & Nationality question is now a multiselect – picklist.
- IIS Toggle has been removed and a checkbox for record information has been included in the VA workflow.
- Home street address field is now required; If the user is experiencing homelessness, they will be required to enter a home street address or cross street fields.

Appointments Tab

functionality

Vaccination Consent

- New checkbox stating the patient understands that the information in the patient's CAIR2 record will be shared with the local health department and California Department of Public Health has been added.
- If patient does not want to allow their information to be shared, they can submit a web form called "Request to Lock my CAIR Record".

I understand that all immunizations will be reported to the California Immunization Registry (CAIR2). I understand the information in the patient's CAIR2 record will be shared with the local health department and California Department of Public Health, shall be treated as confidential medical information, and shall be used only as allowed by the law. I may refuse to allow the information to be further shared and can request the CAIR2 record be locked by visiting the [Request to Lock My CAIR Record](#) web form.

functionality

Add New Appointment Button

New Appointment Button has been added to the end of the check-in workflow. Patients will be able to schedule a new appointment at the end of their existing appointment.

Clear form

Assess Later

Add New Appointment

Complete Appointment

functionality

Bulk Update

When completing a bulk update on multiple appointments with different age ranges, you will only see the vaccine brand and dose eligible for the group selected.

Bulk Walk-in Upload Tab

functionality

Bulk Upload Template

The template has been updated to make the Address as a required field.

Vaccine Supply

functionality

Vaccine Supply Details

Presentation field is now a required field.
