

# Where can children 18 years and younger get COVID-19 vaccines?

## Children who:

- **Have private health insurance**

Most children with private insurance can receive COVID-19 vaccines at no cost from their primary care provider or local pharmacy.

**Your child's doctor should have vaccine available and it is your right to request it.** You can also confirm with your insurance company about other options where COVID-19 vaccines are covered, such as your local pharmacy for children 3 and older.

- **Do not have health insurance**
- **Have private health insurance that does not cover the full cost of the vaccine (underinsured)**
- **Have Medi-Cal**
- **Are insured through the DHCS Child Health and Disability Prevention Program**
- **Are American Indian or Alaskan Native**

Most children in these categories can receive COVID-19 vaccines at no cost from a participating **Vaccines For Children (VFC)** provider. VFC Providers should have vaccine available and it is your right to request it.

Underinsured children may be able to get VFC supplied vaccines at Federally Qualified Health Centers or Rural Health Centers.
