SUBJECT: Clinician Health Advisory: meningococcal disease outbreak in SoCal
DATE: 8/16/16

Dear EZIZ Users:

Since March 2016, 24 confirmed cases of serogroup C meningococcal disease, including two fatal cases, have been reported among residents of Los Angeles and Orange Counties and the City of Long Beach.

Please see the attached [Clinician Health Advisory](#) to learn about new vaccine recommendations and what providers need to do to help contain the outbreak of meningococcal disease in Southern California.

Thank you for your attention to this matter.

California Department of Public Health, Immunization Branch
