

**Does your
child qualify
for no-cost
vaccines?**

Ask about the Vaccines for Children Program. We're helping California's families.

Children from 3-18 years of age must meet at least one criteria:

- Eligible for Medi-Cal (or enrolled)
- American Indian or Alaskan Native
- No health insurance
- Underinsured*

Our staff will check if you qualify every time your child gets immunized. There may be a vaccine administration fee for non-Medi-Cal patients. VFC vaccines cannot be denied even if you can't pay.

* If your private insurance does not cover all vaccines, you can receive VFC vaccines for no cost at a Federally Qualified Health Center or a Rural Health Center. Find a location with this [vaccine locator](#).

California
Vaccines for
Children Program

This pharmacy is enrolled in the California Vaccines for Children Program.

Office Staff:

Screen patients for VFC eligibility every time they are immunized. Follow VFC Program Policies.

Only give VFC vaccines to eligible patients, 3-18 years of age who:

- Are eligible for Medi-Cal, or
- Are American Indian or Alaskan Native
- Have no health insurance coverage, or
- Are underinsured*

No other factors can be considered when screening for VFC eligibility.

Do not charge a vaccine administration fee more than \$26.03 for non-Medi-Cal patients. Do not deny vaccines to eligible patients due to the inability to pay an administration fee.

* If private insurance doesn't cover vaccines, doesn't cover all ACIP-recommended vaccines, or covers vaccines but with a fixed dollar limit, you may refer patients to a Federally Qualified Health Center or Rural Health Center to receive non-covered VFC vaccines. Direct patients to find a location with this [vaccine locator](#).
