Missed immunizations put us all at risk.

- Postponing routine vaccinations puts millions of children at risk for infection with preventable deadly diseases.
- Infants and children who are not protected by vaccines may be more vulnerable to diseases like measles and whooping cough.

Flu shots are more important than ever.

- Influenza and COVID-19 look very similar.
- Getting vaccinated against flu and COVID-19 means fewer people will need to take time off work, seek medical care and get tested for possible COVID-19 or influenza.

Your safety is a top priority!

- It is safe to visit a doctor's office, clinic or pharmacy.
- Your medical team is taking additional safety measures, such as masking, separating sick and well-child visits and extra cleaning to ensure you and your family are safe.

Schedule an appointment now!

- Schedule your vaccine appointment today to keep you and your family protected. You can receive COVID-19 and other vaccines during the same visit.
- COVID-19 vaccine is recommended for children ages 12 years old and above.
- Call your doctor or visit vaccines.gov to find a clinic near you.

California Data Show Dangerous Drop in Vaccination

- The pandemic has resulted in delays and decreases in the number of children getting their recommended vaccines.
- 2020 California Immunization Registry (CAIR*) data shows troubling decreases in administration of childhood vaccines. This suggests that many children may be vulnerable to serious disease.

Don’t Wait–Vaccinate!

• Schedule your vaccine appointment today to keep you and your family protected. You can receive COVID-19 and other vaccines during the same visit.
• COVID-19 vaccine is recommended for children ages 12 years old and above.
• Call your doctor or visit vaccines.gov to find a clinic near you.

*All MMR Doses for Children Ages 4-6 years submitted to CAIR by week, from 2019- present

* Doses in CAIR are from a subset of clinics in 49 of 58 counties in California. Numbers as of 8/07/2021, subject to change as providers submit data.
