

Use real-time data to monitor and improve vaccine uptake throughout the respiratory season! Use last year's data to prebook flu doses for the upcoming season!

What Provider Data Is Available?

Total Ordered

Pulled from myCAvax

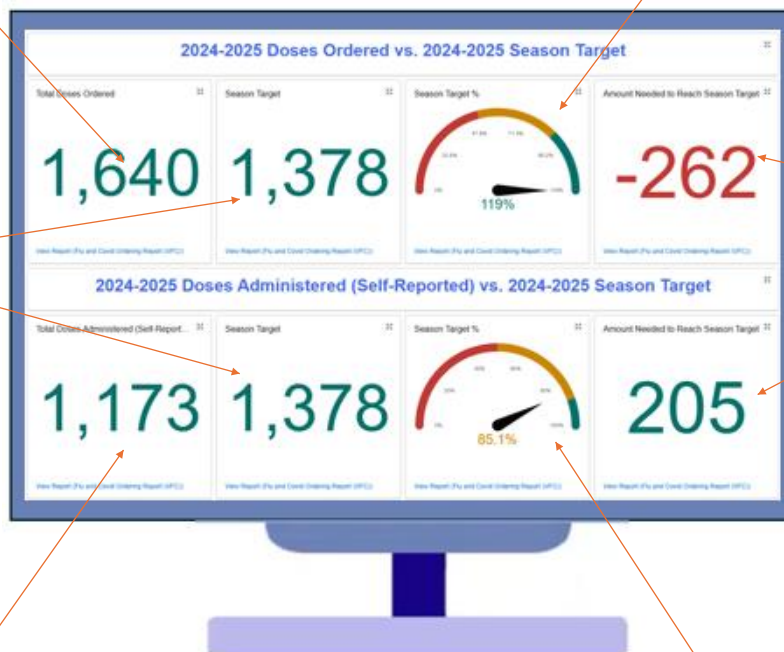

Season Target %

Progress to date as
Doses Ordered / Season Target

Season Target

Doses allocated
by CDPH

Amount Needed to Reach Season Targets

Total Doses

Administered

Self-reported on myCAvax
vaccine orders

Season Target %

Progress to date as
Doses Administered / Season Target

How Is Provider Rating Assessed?

End-of-season report rates your location's ordering performance based on the dashboard's final ordering Season Target %. Ratings range from excellent to needs improvement.

■	Excellent ≥ 90%
■	Very Good 71-89%
■	Good 51-70%
■	Needs Improvement ≤ 50%

How Can You Improve Vaccine Uptake?

Use dashboard resources to increase Total Doses Administered to meet your location's Season Target %!

1. Implement the [Flu Action Plan – 3 Habits of Highly Successful VFC Providers \(PDF\)](#)!
2. Share [EZIZ flu materials](#) with patients!
