♥ With our best wishes.♥

California Department of Public Health
Immunization Branch
850 Marina Bay Parkway • Richmond, CA 94804
Now you have a new baby to love. Give your baby lots of love. And get your baby’s immunizations on time. They will keep your baby safe from some very dangerous diseases.

Your baby will need the first immunization at birth. The list on the back shows when the others are due. Get each one on time to protect your baby. Make an appointment now with your doctor or clinic for the first ones.

The doctor or nurse will give you your baby’s Immunization Record. Take it with you whenever your baby visits the doctor or clinic. You also will need to show it when your child goes to child care and school. Please safeguard it: Your baby will need it for a lifetime.
