Protect your kids from getting severely sick from flu and COVID-19.

Children 6 months and older can now get the updated (bivalent) COVID-19 vaccine at least 2 months after their 2nd dose.

It is safe, effective, and convenient to get the flu and COVID-19 vaccines at the same time as other vaccines.

Children 8 years and younger need 2 doses if they are getting the flu vaccine for the first time.

Schedule the next shots before leaving the office!
