

## Instruction for flipping off cap for MVA-BN.

1. On the cap there is a mark for where to flip up the yellow plastic cap, see figure 1a and 1b.

**Figure 1a**

**Figure 1b**

2. Hold the vial in your hands and use your thumb to flip up the cap where indicated. See figure 2.

**Figure 2**

- Carefully open/flip off the yellow cap to a 90° angle. See figure 3a and 3b.

**Figure 3a**

**Figure 3b**

- Let the cap stay on the metal crimp cap or alternatively flip it all the way off and let the metal crimp cap stay on the stopper/vial to ensure stopper is still fixed to the vial. See figure 4.

**Figure 4**

- Extract volume for vaccination using a needle and syringe through the indicated circle on the rubber stopper.
