# Reminder: Vaccine Management During Public Safety Power Shut-off (PSPS) Notices

Dear VFC Provider,

As a reminder, local utility companies have started issuing Public Safety Power Shut-off (PSPS) notices in counties that may be at risk of fire danger. Ensure your clinic is ready with the following:

- Batteries for all vaccine storage unit Digital Data Loggers (DDLs), including backup DDLs
- Contact information for your local utility company (PG&E, Edison, SDG&E)

For more detailed information, please refer to the [attached letter](#) regarding steps to take before, during, and after PSPS notices in your area. You may also visit [EZIZ](#) for further details.

**Thank you,**
