

## Save the Date!

Join the California Department of Public Health (CDPH) and pediatric specialists from California for **two FREE webinars** on Multisystem Inflammatory Syndrome in Children (MIS-C).

### Don't MISS the signs of MIS-C

Multisystem Inflammatory Syndrome in Children, or "MIS-C", is a health condition in children and teens under age 21 who have been infected with SARS-CoV-2 and later have an immune response characterized by persistent fever, inflammation, and multiorgan dysfunction.

While MIS-C is rare, it can be very serious and even deadly.

### Webinar 1 - Data, Trends & What Providers Need to Know

Wednesday, July 28

12:30-1:45pm PDT

[Register Here for Webinar 2](#)

This webinar includes a panel of pediatric specialists who will present clinical experiences with MIS-C, how MIS-C relates to Kawasaki Disease (KD) and other diseases, imaging strategies and findings, and recommendations for acute and long-term management. There will also be time for participant questions.

## **Speakers:**

### *Panelists*

- Dr. Jackie Szmuszkovicz, Pediatric Cardiologist, Children's Hospital Los Angeles
- Dr. Adriana Tremoulet, Pediatric Infectious Disease, Rady Children's Specialists of San Diego
- Dr. Helen Harvey, Pediatric Intensivist, Rady Children's Hospital
- Dr. Minakshi Vasudeo Chaudhari, Pediatric Rheumatologist, Southern California Permanente Medical Group

### *Moderators*

- Dr. John Openshaw, Team Lead, CDPH Clinical COVID-19 Team
- Dr. Chloe Le Marchand, Medical Officer, CDPH Clinical COVID-19 Team

## **Learning Objectives:**

1. Identify the spectrum of presentations of MIS-C, including how to differentiate from other diseases
2. Apply current treatment strategies for MIS-C in own clinical practice
3. Describe the different management approaches to MIS-C
4. Recognize the acute and long-term outcomes of MIS-C cases
