

End-of-Season VFC Flu Vaccine Ordering Report is Coming Soon!

Dear VFC Provider,

In the next couple of days, we will be sending you your practice's **End-of-Season VFC Flu Vaccine Ordering Report**. We encourage you to share it with your colleagues, including medical assistants, clinicians, medical directors, clinic managers, and quality improvement (QI) staff. Your *End-of-Season Flu Vaccine Ordering Report* will show how well you met your VFC Flu Vaccine Target for the 2021-2022 season, a calculation based on your reported usage of other routinely-recommended childhood vaccines. This report will indicate the percentage of your target met and subsequent rating (Excellent, Very Good, Good, Needs Improvement). VFC providers who achieved an "Excellent" rating this season will be recognized on [EZIZ.org](https://www.eziz.org) and can look forward to a certificate of achievement. Certificates will also go out clinics that had at least a 30% improvement from the previous flu season. For your convenience, you can also view your flu reports in your [MyVFCvaccines](#) account.

If you met your 2021-2022 VFC flu vaccine target this year, congratulations! If you're looking to improve, or just keep up your good work, now is the time to start planning for flu season. *If you are vaccinating pediatric patients against COVID-19 (especially as you begin to vaccinate your youngest patients under 5 years and call those 5 and older in for boosters) it's a great opportunity to co-administer with all childhood vaccines, including flu.*

What can you do?

We encourage you to use VFC's [Flu Action Plan: 3 Habits of Highly Successful VFC Clinics](#) to help your clinical team prepare for flu season during the summer. The Action Plan includes many easy "early-start" best practice strategies that your clinic can readily implement to get ready for flu season. **Gather your staff, choose at least two strategies**, and get started! Ensure everyone in your team is recommending influenza vaccine in the same way they recommend other routine immunizations.

The VFC Program will partner with you throughout flu season.

VFC will work with your practice to ensure that you have an adequate supply of VFC flu vaccine for your VFC patient population. **Refer to the [VFC communication about initial flu orders](#) that was sent on July 20, 2022.** Should the doses allocated for your initial flu order recorded in our system fall short of your needs for the beginning of the season, we're here to help! Your practice will have the ability to order flu vaccine throughout the flu season. Together we will save lives!

If you have questions or concerns, please contact the VFC Program at 877-243-8832.

In recognition of all you are doing under long-term extraordinary circumstances, thank you so much for protecting California children. Our VFC team supports you in protecting California's kids against influenza!

Thank you,
