VFC Providers: We Need Your Help in Vaccinating Against COVID-19!

COVID-19 vaccines for infants and toddlers are here! After extensive clinical trials, the vaccines are proven to be safe and effective in protecting children ages 6 months and up against COVID-19. Infants and toddlers receive a smaller dose of the vaccine, and it is recommended that they are vaccinated against COVID-19 along with their other regular immunizations. Your ability to properly store vaccine, immunize young children, and serve as the medical home for infants and toddlers makes you ideal for the California COVID-19 Vaccine Program. Most pharmacies in California cannot vaccinate patients younger than 3 years old, so it is critical that your younger patients receive their vaccine at their medical home. CDC Director Dr. Rochelle Walensky has also recently shared a message (see attached) with VFC Providers on the importance of your role and continued service to our nation’s children.

Since COVID-19 vaccines cannot be ordered through the VFC Program, all providers interested in ordering and administering COVID vaccines will need to enroll in the California COVID-19 Vaccination Program. Vaccines will then be available to request through the myCAvax system once your location is enrolled and approved. Please consider enrolling if you have not already.
Apply now for the KidsVaxGrant before the 7/15/22 deadline!

The KidsVaxGrant can reimburse practices up to $25,000. This grant is available exclusively to VFC Providers through Friday, July 15, 2022.

Allowable expenses may include staffing, training, technology, infrastructure, supplies and equipment, and administrative overhead.

- VFC providers enrolling in myCAvax (from 12/17/21 through 7/15/22) could receive $10K to support enrollment and launching a vaccination center!
- Enrolled providers could also receive $15K for expanding operations a minimum of 15 hours to provide additional options for working families!

Funding is limited! Visit the KidsVaxGrant page for additional details.
