

The Shots for School website is moving!

Same Great Resources for Schools, New Location:

The Shots for School website is now located on [the CDPH website](#). Here's what you need to know:

- The **shotsforschool.org** domain will be redirected to this new location tonight (5/24).
- You will be able to find all the same information about immunization requirements moved over from the old website.
- **All of the links to pages have changed. You may need to update your website with the new links.**
- **Links to PDFs have not changed yet.** We will be migrating PDFs over one by one to the new website. Refer to the [Implementation Tools](#) page where most of these resources are available if you don't want to keep track of updating links to individual pdfs.

Navigation Changes

- The 7th Grade tab was combined with the TK-12th Grade tab as much of the content was the same.
- New tabs for Resources & Training and Reporting were added.
- Drop-down menus make all the content easier to access and the pages have the added benefit of adapting to mobile devices.
