

Are your patients protected against COVID-19? View your report.

Dear VFC Providers,

Did you know that [only 5% of California's children under 5 years of age](#) are immunized against COVID-19? Are your patients protected against COVID-19?

Sign on to your [MyVFCVaccines](#) account to view your personalized October 2022 Pediatric COVID-19 Awareness Quarterly Update. We recommend that you share the information with your clinic team, quality improvement staff, and managers.

By law, most California Pharmacies cannot vaccinate children younger than age 3, so your youngest patients especially depend on you for protection against COVID-19! For clinics not yet meeting their COVID-19 immunization goal, the update includes tips and strategies that can help.

Thank you,

California Department of Public Health | Immunization Branch
