September 2022 VFC Program Update

Shipment Delays at McKesson

We continue to experience shipment delays at McKesson. These delays are affecting shipments of all refrigerated vaccines, excluding influenza vaccines. There are no delays for shipments of Influenza, Varicella, and MMRV vaccine orders. McKesson is currently working on orders received during the week of September 12. If you received an order confirmation email for an order approved before this date and are still waiting for your shipment, please contact our Customer Service Center. The backlog of orders is expected to be cleared by the end of this week. Any orders received starting the week of October 3 will follow the regular shipping schedule and should arrive within 14 days of order approval.

For daily updates on these shipment delays, please visit the [Vaccine Order Status](#) tab on the EZIZ.org homepage.

2022-2023 VFC Flu Vaccine Updates

Initial Shipments

The VFC Program continues to fulfill initial VFC Influenza orders as inventory becomes available. Please refer to the most recent [communication sent on September 21](#) for a detailed listing of products shipped.

Additional Ordering

We are getting ready to open the additional flu ordering system as soon as all initial order requests are fulfilled. A communication will go out prior to launching additional ordering in the next couple of weeks. For additional updates, please visit the [Vaccine Order Status](#) tab on the EZIZ.org homepage.

Thank you,
