

Vaccine Tips

April 2023

Let's review some important tips on vaccine documentation and reporting!

All providers are required to document vaccine information into the California Immunization Registry (CAIR) or Healthy Futures/RIDE. If you haven't already done so, [enroll in CAIR](#) now!

- For more information about this registry law see [AB 1797 VFC Letter](#) and [FAQs](#).
- Refer to [CAIR User Guides](#) to learn how to properly use all CAIR functionalities.
- Follow [4 steps in Data Exchange](#) to submit your vaccine documentation from your electronic health record system (EHR) to CAIR.

Administration errors and adverse vaccine effects sometimes occur, but do you know where and how to report these? Check out the links below to learn more about how comply with these requirements.

- The [Vaccine Adverse Effects Reporting System \(VAERS\)](#) collects information about adverse events (e.g., negative reactions or serious side effects).
- The Healthcare Practitioner's [Vaccine Error Reporting Form \(VERP\)](#) collects information on preventable vaccine administration errors (e.g., incorrect dose, wrong or expired product, or wrong administration site).
- Check out the [VAERS v. VERP](#) job aid to help you out!
