Allocations of Nirsevimab (Beyfortus) Added to your Account!

Dear VFC Provider,

Nirsevimab (Beyfortus) is available to order through the VFC Program for all enrolled VFC Providers that serve VFC infants and toddlers eligible to receive the vaccine. Although adequate immunization supply is expected this season, California will receive product allocations from CDC every 2 weeks, from September 2024 through February 2025. Initial allocations received in September and early October will be allocated in phases to VFC providers, approximately every 2 weeks, to ramp up immunization inventories ahead of RSV season to prepare for administration starting in October. **These doses are intended to build an initial supply for your practice ahead of RSV season, which typically starts in October and extends through the end of March in most of the continental U.S. Please order all the allocated doses to your location.**

If you are unable to submit an order for RSV doses due to an existing order for your account that is currently being fulfilled (i.e. status of Submitted, Assigned, Corrections Needed, Corrections Submitted, Pending, Approved), please contact our VFC Customer Service Center at 877-243-8832, select option 8, so one of our representatives can help you. Due to longer wait times to reach a representative, please feel free to email us at MyVFCVaccines@cdph.ca.gov with your PIN, Provider Location Name, and amounts requested for each Beyfortus product (50 mg and/or 100 mg) if that is easier.

Submit your order as soon as possible, but no later than **Tuesday, September 24** so that enough doses are ordered prior to our next CDC allocation. **Any unordered allocations may be reallocated to other providers who are ready to order nirsevimab.**

As a reminder,

Thank you,
