2025-2026 RSV Immunization Shipments Coming Soon!

Dear VFC Provider,

Thank you to those who have submitted their pre-book for RSV monoclonal antibodies for the upcoming 2025-2026 season. Now that the RSV Pre-Book is closed, the California Vaccines for Children (VFC) Program will begin processing initial orders of nirsevimab (Beyfortus®) for providers who have pre-booked. We will notify providers once clesrovimab (Enflonsia™) is available for ordering.

To build up your supply prior to the start of RSV season, VFC will process 12.5% of providers' approved nirsevimab pre-book amount for this first round of shipments at the end of this week. It is expected that these shipments will arrive the week of August 18. Providers that pre-booked nirsevimab do NOT need to submit a VFC order form to receive their initial shipments. If you did not pre-book RSV monoclonal antibodies, doses will be allocated based on available supply.

Subsequent shipments for the remaining balance of pre-booked RSV doses will be processed as additional supply doses become available, but we will notify you again in advance.

IMPORTANT: If your clinic is NOT able to receive shipments during this period, please notify the VFC Program right away and update your availability in myCAvax by indicating a temporary closure to prevent shipping incidents leading to immunization spoilage. For more details on submitting a temporary closure in your myCAvax account, click on the ["Managing myCAvax Provider Accounts"](#) Knowledge Center Resource.

Thank you,

California Vaccines
for Children Program
