

TO: EZIZ Users
FROM: CDPH
SUBJECT: Celebrate National Infant Immunization Week
DATE: 4/28/14

Join us in celebrating National Infant Immunization Week (NIIW) on April 26-May 3 and Toddler Immunization month in May. Both observances are geared towards highlighting the importance of routine immunizations for children younger than two.

This is a great time to step up efforts to protect children against vaccine-preventable diseases and thereby give them a healthy start in life. This year, we are focusing on the importance of a whooping cough shot for pregnant women during the third trimester. Remind pregnant women and new parents to protect themselves and their babies against vaccine-preventable diseases.

Print these materials or order them for free from your [local health department](#) :

- [Immunizations for a Healthy Pregnancy](#) brochure highlights the shots needed before pregnancy, during pregnancy, and after baby is born

- [Immunization brochure for parents](#) with an easy-to-follow immunization schedule

- [Vaccine Safety: Facts for Parents](#) provides simple, straightforward answers to parents' top vaccine concerns

Thank you for your efforts to protect California's children.
