

VFA New Provider Orientation

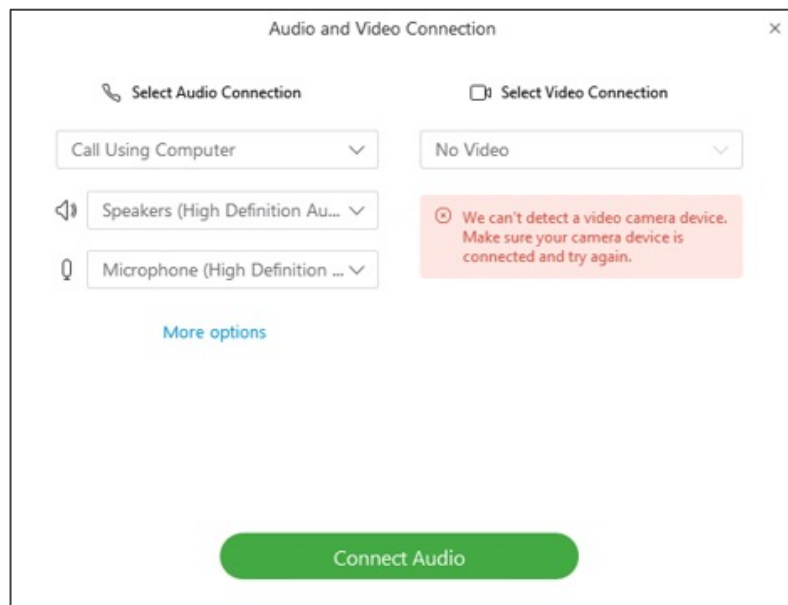

CDPH Immunization Branch

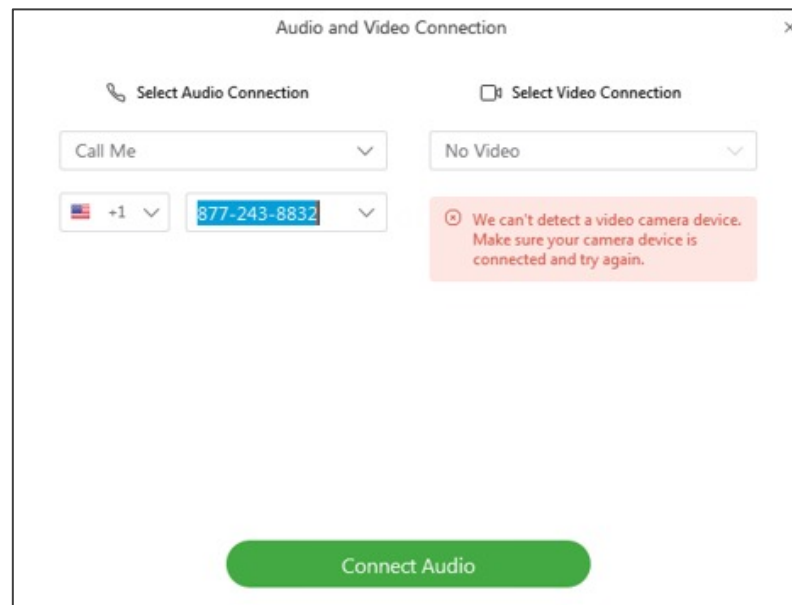

August 26, 2021

Webinar Tech Tips!

1. Listen to today's webinar through computer audio.

2. If you cannot connect through computer audio, have WebEx call you.

Housekeeping

Attendee lines are automatically muted.

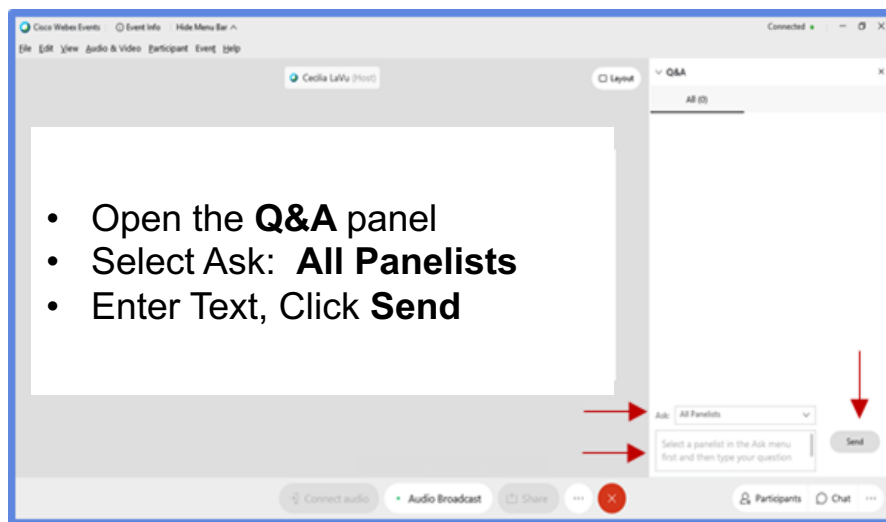

Please access today's slides at <https://eziz.org/vfa-317/vfa-resources/>. The webinar is being recorded and will be posted there after the event.

For webinar troubleshooting, please email Cecilia LaVu at Cecilia.LaVu@cdph.ca.gov

During the webinar, please use the Q&A panel to comment or ask a question:

Q&A Panel

Agenda

- Program Overview
- Vaccines – Ordering, Reporting, and Documentation
- Patient Eligibility
- Storage and Handling
- Adult IZ Resources
- Q&A Session

PROGRAM OVERVIEW

NISHA GANDHI, MPH

California Vaccines for Adults (VFA) Program Overview

Program Goals and Objectives

- To provide vaccines at no cost to eligible adults
 - Expand access to 317-funded vaccines to Community Health Centers (CHCs) in California
- To integrate the standards for adult immunization practice into routine adult clinical care
 - **ASSESS** immunization status of all adult patients at every visit
 - Strongly **RECOMMEND** vaccines that adult patients need
 - **ADMINISTER** needed vaccines or **REFER** to a provider who can immunize
 - **DOCUMENT** vaccines received by your adult patients

Catch Up Your Adult Patients!

Non-Flu, Non-COVID Doses Submitted to CAIR2 for Adults 19 Yrs and Older By Month, Jan 2019 – July 2021

Month	Dose Ratio* (2020/2019)	Dose Ratio* (2021/2019)
JAN	1.23	0.79
FEB	1.25	0.71
MAR	0.75	0.69
APR	0.26	0.70
MAY	0.33	0.74
JUN	0.55	0.97
JUL	0.62	0.95
AUG	0.73	
SEP	1.05	
OCT	0.88	
NOV	0.95	
DEC	0.88	

California Immunization Registry (CAIR) 2021 doses still indicate a need to catch up on missed doses in 2020.

* Dose ratio: 2019 doses submitted are used as the pre-pandemic baseline; 2021 and 2020 doses are compared to this baseline for the calculation of dose ratios.

VFA Providers

Community Health Centers (CHCs) that can demonstrate:

- Participation in the CA Vaccines for Children Program (VFC);
- Experience providing a safety net for uninsured and underinsured adults;
- Participation in an Immunization Information System (e.g., California Immunization Registry - CAIR) or use of an Electronic Health Record (EHR) system

Total of **595** providers enrolled in the VFA Program

Resource: [VFA Program Overview](#)

A healthcare professional, likely a nurse or doctor, is shown from the chest down. They are wearing a white lab coat over a light-colored top. A black stethoscope is draped around their neck. They are holding a silver tablet with both hands, and their right index finger is touching the screen. The background is blurred, showing what appears to be a clinical setting with shelves and equipment.

VFA VACCINES – ORDERING, REPORTING, AND DOCUMENTATION

NISHA GANDHI, MPH

VFA Vaccines

Most ACIP-recommended adult vaccines are available through the program:

- | | |
|----------|----------------|
| ✓ Hep A | ✓ Td ONLY when |
| ✓ Hep B | Tdap is not |
| ✓ HPV | indicated |
| ✓ MCV4 | ✓ Tdap |
| ✓ MMR | ✓ Varicella |
| ✓ PCV13 | ✓ Zoster |
| ✓ PPSV23 | |

Vaccine-Related Charges

To reduce financial barriers for eligible patients and ensure that they will not incur additional costs outside of any routine copay for the clinic visit, program sites shall:

- Not charge eligible patients or third-party payers for the cost of VFA vaccines.
- Not charge a vaccine administration fee to eligible patients for VFA vaccines.
- Prominently post a sign (such as the VFA poster) clearly visible to patients which states that:

“FREE vaccines are available to adult patients who are uninsured or have insurance that doesn’t cover (certain) vaccines. We do not charge these patients for getting the vaccine or for the cost of the vaccine.”

Vaccine Ordering and Reporting

- Quarterly ordering and reporting of inventory and doses administered
- Ordering and reporting done at the clinical site level (vs. organization-level)
- **New providers will be able to order VFA vaccine from August 30th, 2021, through September 24, 2021.**
- Subsequent orders should be submitted on a quarterly basis (the next open ordering period will not be until January 2022).

Vaccine Documentation and Reporting

- Immunization of patients will be documented using either the **local immunization information system (IIS): CAIR2/SDIR/Healthy Futures**; or **Electronic Health Record (EHR)**.
- Review doses reported in the IIS a minimum of every six months

Vaccine Documentation

- In 2022, you will be required to submit all VFA doses accurately (labeled "317") to an IIS (CAIR/SDIR/Healthy Futures). Prepare now!
- If you have questions:
 - CAIR data exchange user [Local Data Exchange Representative](#)
 - CAIR manual entry user [Local CAIR Representative](#)
 - [SDIR](#) user: Phone: 619-692-5656 Email: sdir.hhsa@sdcounty.ca.gov
 - [Healthy Futures](#) users: Phone: 209-468-2292 Email: support@myhealthyfutures.org

Vaccine Documentation

Federal law (42 U.S.C. §300aa-25) requires that providers include all of the following:

- name of the vaccine
- date given
- route and administration site
- lot number and manufacturer
- name and **title of the person who administered the vaccine**
- practice's name and address
- **VIS publication date and date VIS was provided**

Vaccine Documentation Tips

Review all required vaccine documentation elements

Add “hard stops” to your EHR/EMR (if applicable) so that staff have to fill them out before exiting the record.

Ensure that all staff, including new staff, have their credentialing added correctly to their EHR staffing profile.

PATIENT ELIGIBILITY

NISHA GANDHI, MPH

VFA Patient Eligibility

Patients 19 years of age and older who are

- Uninsured: Does not have (public or private) health insurance coverage.

OR

- Underinsured: Has health insurance but coverage
 - does not include vaccines OR
 - covers only select vaccines.

Resource:

- ✓ [Eligibility Based on Insurance Status](#)
- ✓ [FAQs](#) (Part II. Patient Eligibility)

Patients NOT Eligible for VFA

- Full Scope Medi-Cal FFS or Managed Care
- Share of Cost Medi-Cal
- Pregnancy-Only (otherwise known as Presumptive Eligibility) Medi-Cal
- Medicare Part B AND Part D
- Private insurance coverage for vaccines EVEN IF patient has
 - A high deductible or co-pay
 - A deductible that has not been met
 - Insurance with cost-sharing (and must pay out of pocket)

VFA Eligibility Documentation

At each IZ visit, providers are required to screen for and document, in the EHR or registry, the

- screening date,
- VFA eligibility (Y/N). If yes, list eligibility criteria:
 - **date of birth [to verify age 19+] AND**
 - **uninsured OR underinsured**

Resources:

- ✓ [317 \(VFA\) Eligibility Screening Record | Spanish](#)
- ✓ [Program Participation Requirements at a Glance](#) (Eligibility Screening & Documentation section)

VFA Eligibility Documentation Tips

Determine best method of capturing eligibility screening elements:

- ☐ **Strongly Recommended:** Modify (VFC Eligibility section in) your EHR to include fields that capture VFA eligibility
- ☐ Systematically note eligibility elements in the EHR comments/notes
- ☐ Scan completed 317 Eligibility Screening form into the patient's EHR record

STORAGE AND HANDLING REQUIREMENTS

CHRISTINA SAPAD,
MPA

Key Elements in Storage and Handling

Skilled
and trained staff

Written Vaccine
Management Plans

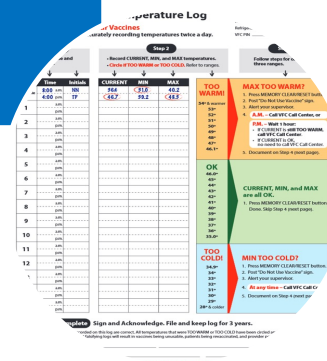

Appropriate
vaccine storage
units

Accurate
temperature
monitoring
equipment

Proper
temperature
monitoring AND
documentation

VFA Vaccine Storage Requirements

- Storage of VFA vaccines must meet the same requirements as VFC vaccines, even when stored in separate units and managed by different staff.
 - Store and label VFA, VFC and privately-purchased vaccines separately and grouped by vaccine type
 - Utilize vaccine refrigerators and freezers that meet VFC requirements
 - Utilize DDLs that meet VFC requirements
 - Monitor and document MIN/MAX/CURRENT temperatures twice each day using VFC temperature logs
 - Download and review temperature data files for any unreported out-of-range temperatures at the end of every two-week reporting period
 - Identify and report every temperature excursion to the Storage and Handling Online Triage System (SHOTS) at MyVFCvaccines.org and comply with any instructions provided.

Vaccine Shipments

Label vaccines received according to their funding source and store them in the pre-designated shelf/area of the vaccine storage unit.

INSPECT packing slip for number of vaccine doses (VFC, 317 and State-purchased) received from McKesson

STATE
General Fund

VACCINE ELIGIBILITY GUIDELINES

For FQHCs, FQHC Look-Alikes and Rural Health Centers (RHC) enrolled in the California Vaccines for Adults (VFA) and Vaccines for Children (VFC) Programs

	Vaccines for Children (VFC) Funded Vaccine	California Vaccines for Adults (VFA) 317-Funded Vaccine
Age	Children birth through 18 years of age meeting any of these eligibility criteria:	Adults 19 years of age and older meeting one of the following eligibility criteria:
Eligibility	<ul style="list-style-type: none"> • Medi-Cal/CHDP eligible • Uninsured (no health insurance) • Underinsured (health insurance does not cover vaccines or only covers select vaccines (only eligible at FQHCs and RHCs). • American Indian & Alaskan Native 	<ul style="list-style-type: none"> • Uninsured (no health insurance) • Underinsured (Eligible only if listed vaccines are not covered by insurance) <p>Note: Fully insured adults are not eligible to receive VFA vaccines (adults enrolled in Medi-Cal/Medi-Cal managed care plans are considered fully insured).</p>
Vaccine	<ul style="list-style-type: none"> ✓ DTaP ✓ Hepatitis A ✓ Hepatitis B ✓ Hib ✓ HPV ✓ Influenza ✓ Meningococcal Conjugate (MCV4) ✓ Meningococcal B (MenB) ✓ MMR ✓ Pneumococcal Conjugate (PCV13) ✓ Pneumococcal Polysaccharide (PPSV23) ✓ Polio (IPV) ✓ Rotavirus ✓ Td ✓ Tdap ✓ Varicella 	<ul style="list-style-type: none"> ✓ Hepatitis A ✓ Hepatitis B¹ ✓ HPV² ✓ Meningococcal Conjugate (MCV4) ✓ MMR ✓ Pneumococcal Conjugate (PCV13)³ ✓ Pneumococcal Polysaccharide (PPSV23) ✓ Td ONLY when Tdap is not indicated³ ✓ Tdap ✓ Varicella ✓ Zoster

¹Adults with Medicare Part B are eligible for Hepatitis B, Pneumococcal Conjugate (PCV13), and other vaccines (such as Td, Hep B, Hep A, and Rabies vaccines) directly related to the treatment of an injury or direct exposure to a disease or condition. As such, Medicare Part B will cover Td as preventative care for tetanus when patient has a wound. Similarly, Hep B vaccine is only available to low-risk patients through VFA because Medicare Part B will cover Hep B vaccine when a patient is considered high or intermediate risk for contracting Hepatitis B.

CA Vaccines for Adults (VFA) Program Eligibility Based on Insurance Status

Patient Health Insurance Status	VFA (317 – Funded Vaccine) Eligibility
Uninsured/No Insurance (includes those who receive primary care through county safety net programs; these are NOT considered health insurance)	Eligible for ALL VFA vaccines
Medi-Cal Fee-For-Service/ Medi-Cal Managed Care bit.do/healthplandirectory	NOT Eligible for VFA vaccines ¹
Medicare Part B (medical benefit)² AND Part D (prescription drug benefit)	NOT Eligible for VFA vaccines
Medicare Part B Alone³	Eligible for these routine VFA vaccines: <ul style="list-style-type: none"> • Zoster • Tdap • Td if patient does NOT have a wound • Hep B if patient NOT high or intermediate risk
Medicare Part D Alone³	Eligible for these routine VFA vaccines: <ul style="list-style-type: none"> • PPSV23 • PCV13 • Hep B
Insurance NOT through Medi-Cal or Medicare	Only eligible for VFA vaccines that are NOT covered by patient's private insurance plan ⁴

¹Full scope Medi-Cal covers all ACIP-recommended vaccines.

²Medicare Part B covers medical services including: influenza, pneumococcal (PPSV23 and PCV13), and other vaccines (such as Td, Hep B, Hep A, and Rabies vaccines) directly related to the treatment of an injury or direct exposure to a disease or condition. As such, Medicare Part B will cover Td as preventative care for tetanus when patient has a wound. Similarly, Hep B vaccine is only available to low-risk patients through VFA because Medicare Part B will cover Hep B vaccine when a patient is considered high or intermediate risk for contracting Hepatitis B.

- End Stage Renal Disease (ESRD) patients;
- Hemophiliacs who receive Factor VIII or IX concentrates;
- Clients of institutions for the mentally disabled;
- Persons who live in the same household as a Hepatitis B Virus (HBV) carrier;
- Men who have sex with men;
- Illicit injectable drug users;
- Persons diagnosed with diabetes mellitus;
- Staff in institutions for the mentally disabled; and
- Workers in health care professions who have frequent contact with blood or blood-derived body fluids during routine work.

³Except for vaccines covered under Part B, Medicare Part D covers all commercially available vaccines as long as the vaccine is reasonable and necessary to prevent illness. Contact your patient's plan to find out about coverage.

⁴Fully insured adults whose insurance covers the cost of the vaccine(s) are **NOT** eligible for VFA vaccine(s), even if the insurance includes a high deductible or co-pay, the plan's deductible has not been met, or the insurance has cost sharing.

HEPATITIS A VIRUS IS SPREADING: GET IMMUNIZED

Why should I care about Hepatitis A?

Several states have outbreaks of Hepatitis A. The disease can easily spread from person-to-person and cause serious liver disease lasting a few weeks to many months. Some people die from Hepatitis A. If you are using drugs or living on the streets and in shelters, you are at greater risk for catching Hepatitis A.

I think I may be at risk for catching Hepatitis A. What can I do?

- Get the Hepatitis A shot!
- Wash your hands with soap and water after using the bathroom and before eating or preparing food
- Avoid having sex with people with Hepatitis A
- Don't share toothbrushes, food, drinks or smokes

What are the symptoms of Hepatitis A?

Fever

Fatigue

Nausea

Loss of appetite

Jaundice
(yellowing of the skin or eyes)

Stomach pain

Vomiting

Dark urine,
pale stools, and
diarrhea

If you think you have Hepatitis A, see your doctor or visit the closest Emergency Room.

For More information

- Contact [\[enter contact information for your county here\]](#)
- Dial 2-1-1 on your phone to learn where you can get the Hepatitis A vaccine

What is Shingles?

- Shingles is a painful rash that can cause long-term nerve pain.
- 1 out of 3 people in the U.S. will get shingles. Your risk goes up as you age.
- Serious complications include pain that can last for months.

Get 2-doses of the New Shingles Vaccine (Shingrix®)

I got another shingles vaccine before 2018.

Do I need the new vaccine?

Yes! It's over 90% effective in preventing shingles.

I had shingles already. Do I still need this shot?

Yes! The vaccine can prevent shingles from happening again.

How many shots of the new vaccine do I need?

Two. Come back for the 2nd shot 2-6 months after the first.

Is Shingrix® covered by my health plan?

Shingrix® is covered by most private insurance, Medicare Part D, and Medi-Cal. Call your plan to confirm coverage or fees.

What should I expect after my shot?

Commonly, people have a sore arm or swelling where the shot

“Jim’s Story

We’ve been to multiple emergency room visits, multiple eye specialists... and it’s going on four years.

Ask your doctor or pharmacist for the new shingles shot today!

Do you smoke? Have asthma, diabetes, or a weakened immune system?

You may be at high risk for pneumonia—a serious lung infection.

Pneumonia can be life-threatening!

- 48,000 Americans get pneumonia every year.
- Nearly half a million are hospitalized.
- About 1 in 10 dies.

If you are **THIRTY** or older with any of these conditions, ask your doctor about getting pneumonia shots (pneumococcal [PPV23] and/or PCV13) vaccinated.

✓ Cigarette smoker	✓ Sickle cell disease
✓ Asthma	✓ Cerebrospinal fluid leaks
✓ Diabetes	✓ A cochlear implant
✓ Certain cancers or having chemotherapy	✓ HIV/AIDS
✓ Heart, kidney, and liver diseases	✓ A bone marrow or organ transplant

Get your pneumonia shots. They might save your life.

Recommended Adult Immunization Schedule for ages 19 years or older

UNITED STATES
2021

How to use the adult immunization schedule

- 1** Determine recommended vaccinations by age (Table 1)
- 2** Assess need for additional recommended vaccinations by medical condition and other indications (Table 2)
- 3** Review vaccine types, frequencies, and intervals and considerations for special situations (Notes)

Recommended by the Advisory Committee on Immunization Practices (www.cdc.gov/vaccines/acip) and approved by the Centers for Disease Control and Prevention (www.cdc.gov), American College of Physicians (www.acponline.org), American Academy of Family Physicians (www.aafp.org), American College of Obstetricians and Gynecologists (www.acog.org), American College of Nurse-Midwives (www.midwife.org), and American Academy of Physician Assistants (www.aspa.org).

Vaccines in the Adult Immunization Schedule*

Vaccines	Abbreviations	Trade names
<i>Neisseria meningitidis</i> type B vaccine	Hib	ActHIB® Hibrix® Pneumovax®
Hepatitis A vaccine	HepA	Havrix® Vaqta®
Hepatitis A and hepatitis B vaccine	HepA/HepB	Twinrix®
Hepatitis B vaccine	HepB	Engerix-B® Recombivax HB® Hepivax®
Human papillomavirus vaccine	HPV	Gardasil 9®
Influenza vaccine (inactivated)	IV	Many brands
Influenza vaccine (live, attenuated)	LAIV4	FluMist® Quadrivalent
Influenza vaccine (recombinant)	RV4	FluBlast® Quadrivalent
Measles, mumps, and rubella vaccine	MMR	M-M-R II®
Meningococcal serogroups A, C, W, Y vaccine	MenACWY-D MenACWY-CRM MenACWY-TT	Menactra® Menveo® MenQuadfi®
Meningococcal serogroup B vaccine	MenB-4C MenB-FHbp	Bespevix® Trumenb®
Pneumococcal 13-valent conjugate vaccine	PCV13	Pneumovax 13®
Pneumococcal 23-valent polysaccharide vaccine	PPSV23	Pneumovax 23®
Tetanus and diphtheria toxoids	Td	Tenivac® Tdextra®
Tetanus and diphtheria toxoids and acellular pertussis vaccine	Tdap	Adacel® Boostrix®
Varicella vaccine	VAR	Varivax®
Zoster vaccine, recombinant	RZV	Shingrix

*Administer recommended vaccines if vaccination history is incomplete or unknown. Do not restart or add doses to vaccine series if there are extended intervals between doses. The use of trade names is for identification purposes only and does not imply endorsement by the ACIP or CDC.

Report

- Suspected cases of reportable vaccine-preventable diseases or outbreaks to the local or state health department
- Clinically significant postvaccination reactions to the Vaccine Adverse Event Reporting System at www.vaers.hhs.gov or 800-822-7967

Injury claims

All vaccines included in the adult immunization schedule except pneumococcal 23-valent polysaccharide (PPSV23) and zoster (RZV) vaccines are covered by the Vaccine Injury Compensation Program. Information on how to file a vaccine injury claim is available at www.hrsa.gov/vaccinecompensation.
