

Dear Immunization Coordinator,

317 ordering paused: Due to the increases in orders by Vaccines for Adults (VFA) providers and LHDs, we have depleted our limited 317-budget for the rest of the 2022 Federal Fiscal Year (FFY). As a result, the 317 Vaccine Order Form has been closed on myVFCvaccines.

In the meantime, CDPH is continuing to work with CDC to obtain any additional 317 redistribution funds. We expect to open 317 vaccine ordering again by the start of the new FFY in October, or sooner if additional 317-funds are received from CDC. Orders that are currently pending will be processed once additional funding is made available.

CDC has a separate 317-funds for responding to outbreaks. If vaccines are needed for an outbreak, complete the 317 Outbreak Vaccine Request Form available on the [IZ Coordinators website](#), submit the Form to your Senior Field Representative, and we will work with CDC on the order.

State purchased Tdap available for children and adolescents: Separately, CDPH has State-General Funded (SGF) Tdap for your back-to-school efforts.

- To request SGF Tdap vaccine, please complete [this survey](#) by 8/12.
- Questions about state-funded Tdap can be sent to Nisha Gandhi ([Nisha.Gandhi@cdph.ca.gov](mailto:Nisha.Gandhi@cdph.ca.gov)).

If you have any other questions regarding 317-funded vaccine, you can reach out to [my317vaccines@cdph.ca.gov](mailto:my317vaccines@cdph.ca.gov).
