

## Resources for Immunization Catch up

Dear Child Care Providers and Staff,

Thank you for all your efforts to make sure California's children are safe and healthy. As you may be aware, [many children have fallen behind in routine immunizations during the pandemic](#). We are reaching out to ask for your assistance in helping them get caught up now. Ensuring that our children are up to date on their shots will help reduce the risk of preventable and serious diseases like measles and whooping cough from spreading in your child care center.

Please remind parents of [required immunizations](#) and collect immunization records at each age checkpoint. We urge you to follow up with parents now to take their children to the doctor to receive any [required immunizations](#) they may have missed. Many clinics are taking extra precautions to keep families safe during in-person appointments.

To support this effort, we invite you to use:

- [Letter from Child Care Centers to Parents](#)
- [Tools for Child Care/Preschool Staff](#)

Thank you again for your ongoing efforts to prioritize immunizations so that all children are protected from vaccine-preventable diseases. We deeply appreciate all that you do.
