

Immunization Branch

The pandemic has [reduced routine immunizations](#) and disrupted the school year for children and school staff.

To protect the health and safety of school communities, in the Fall of 2021, schools will be requested to check records and report the immunization status of 1st and 8th graders as well as the usual checks at [TK/K and 7th grade](#). These additional efforts will help students get caught up on routine immunizations and avoid school outbreaks of serious diseases like measles. More details coming in the Fall.

Schools can let parents know which shots their children need by using the template [Letter to Parents: Immunizations Needed](#) | [Spanish](#) | [Arabic](#) | [Farsi](#) | [Vietnamese](#) | [Chinese](#).

Thank you again for keeping California's schools healthy.
